Planting Guide

**WAYNESBORO
NURSERIES
WAYNESBORO • VIRGINIA**

Front view of our Modern Storage and Packing House with cold storage facilities for holding deciduous plant material in dormant condition for late spring orders.

WAYNESBORO GROWN TREES and PLANTS

Offered by Virginia's Largest Growers

GROW AND ENJOY YOUR OWN FRUIT—No fruit tastes better than that freshly harvested from your own garden or orchard. However, home freezers and public food lockers are making possible storing and enjoying fresh fruit throughout the year, extending the market and creating greater use for fruits.

MAKE YOUR HOME MORE BEAUTIFUL AND VALUABLE—With planned landscaping instead of haphazard planting. Landscaping is not limited to new homes as homes that have been improperly landscaped or have plant material that has outgrown its usefulness may be modernized.

HORTICULTURAL ADVICE AND LANDSCAPE SERVICE AVAILABLE—Do not hesitate to write us for additional information in regard to fruit varieties or landscaping your home grounds. If you are uncertain as to material that can be used to the best advantage, send us a sketch of the grounds for recommendations. Should your planting problem require the service of a landscape architect, please apply as early as possible as this department is usually scheduled several weeks in advance. No charge is made for information furnished by letter or to customers who call at our office, but a nominal charge is made when it is necessary to send out a landscape architect for making surveys and plans. Helpful information on planting and pruning is furnished with order acknowledgments.

OFFERING THE NEWER, BETTER VARIETIES—We are large, established growers and in position to supply reliable and popular older varieties and also new, improved ones we have tested and found worthwhile. We are anxious to assist you in selecting plant material best suited to your requirements.

DEPENDABLE PLANTS AND INFORMATION—Our plant material is healthy, vigorous, and state-inspected, grown under ideal soil and climatic conditions. We endeavor to be fair in our descriptions, mentioning unfavorable as well as favorable qualities a variety may possess. You may select from us with assurance.

VISITORS WELCOME—Main Nursery three miles south of Waynesboro on Lyndhurst Road. Open Monday through Friday 7 a.m. to 5 p.m.; Saturday until noon. Boxwood Gardens and Garden Shop Route 250, one and one-half miles east of Skyline Drive Entrance. *Asalea Gardens*, Route 151 between Waynesboro and Lynchburg.

WAYNESBORO NURSERIES, Inc. • Waynesboro, Virginia

OUR DELIVERY SEASONS AND GUARANTEES

DATE OF DELIVERY—The delivery of plant material differs from that of most commodities as it is limited to the dormant season. The general conception is that there are two distinct delivery seasons per year—the regular Fall season starting early in November and continuing until late December, and the Spring season starting early in March and ending in June. There, however, is really only one planting season, extending through the dormant period, usually November until June but may be prolonged by modern nursery cold storage facilities. We must be somewhat governed by the seasons and weather conditions, preventing our promising far in advance definite delivery dates. Frequently we can start general deliveries by November 1st, but some years the plants do not mature so we can start digging before November 15th. However, Evergreens, Perennials, Iris, Peonies, etc., can be successfully transplanted as early as September. Any shipping dates requested will be followed as closely as is practical, but not knowing in advance just what the season will be, a better plan is to permit us to ship the plant material when we find conditions most favorable.

CERTIFICATE OF INSPECTION—Issued by Virginia State Entomologist—certifying that our Nursery has been inspected and plant material found to be free of disease and pests—furnished with each shipment. Fruit Trees also frequently inspected and certified as to trueness to name.

TRANSPORTATION—We are located on two trunk line railroads. Fruit Trees, Berry Plants, and other items dug without ball are generally shipped express, while B&B Evergreens and large Shade Trees are shipped by freight or delivered by our truck, for which we can in most cases arrange at a nominal delivery cost. Small shipments which can be more easily sent by parcel post are frequently forwarded that way, permitting the customer to refund to us the amount of cancelled postage found on the package.

PRICES—The prices quoted are f.o.b. our shipping point. We make no charge for packing and delivering to our local freight, express, or post office.

TERMS—Cash with order unless otherwise arranged.

REMITTANCES—Remittances may be made by Postal Money Order, Postal Note, Express Money Order, or your personal check.

LIBERAL REPLACEMENT TERMS—While losses from transplanting our vigorous, carefully handled plant material are at a minimum, there are always some losses to be expected, regardless of how careful both Nurseryman and planter may be. We agree to share with our customers on a fifty-fifty basis any losses from transplanting our plant material by refunding at half catalogue list price any plant material reported dead within twelve months after date of delivery, provided the original purchase was paid for as per sale terms and the plant material has been given reasonable attention.

VARIETIES AND QUANTITIES—If you do not find listed the variety, quantity, or size desired, write or call for further information.

MAKING UP ORDERS—Do not fail to give sizes, quantities, and varieties desired. Also state shipping point if different from post office, and approximately when you would prefer shipment.

WARRANTY—While we are very careful in keeping our varieties true to name—and seldom have a report of plant material proving otherwise—in such instances we limit our adjustments to either refunding without charge or refunding the full purchase price.

Visit

Our New Boxwood Garden Shop

Waynesboro Nurseries' New Boxwood Garden Shop, which recently opened on Route 250, one and one-half miles east of Skyline Drive Entrance. This shop features extensive line of potted plant material, garden tools, spray materials, fertilizers and novelties.

Fruit Department

VIRGINIA'S LARGEST GROWERS!

On the following pages we offer the finest strains of Fruit Varieties our long experience affords. We are constantly improving existing varieties and testing new introductions, offering the outstanding ones.

As Virginia's Largest Growers, we confidently recommend our fruit trees and plants for successful growing in your home or commercial orchard or garden. We offer a new introduction only after its merits have been proven — eliminating the risk of planting untested strains. Commercial growers are now planting chiefly the Double Red Apple strains which we grow in large quantities. At last we have come to realize the importance of growing as much of our fruit as possible, not altogether for the sake of economy, but much pleasure and satisfaction can be found in gardening and fruit raising. Fruit can never taste quite so good as when gathered from our own gardens and orchards.

Don't waste precious time and land by planting stock you can't be SURE of. Let **WAYNESBORO NURSERIES** supply your needs — with strains that have been thoroughly tested for performance.

DECLINE IN FRUIT TREE POPULATION IS ALARMING

Having decreased one-third between 1930 and 1940. For the past 10 years the decrease is thought to be even greater due to light commercial orchard planting and abandonment of old orchards, indicating a serious fruit shortage in the near future.

APPLES—*The King of Fruits*

Plant for Healthful Living. By careful selection of varieties fruit can be harvested from your trees over a period of six months and the better Winter varieties kept in common storage until the new crop is harvested — making fresh fruit possible throughout the year.

Our list of Apples has been carefully made up after many years of growing and testing. The newer, better ones are listed only after having been thoroughly tested and found to excel older varieties of the same class.

Planters differ as to choice of varieties, sized trees, time to plant, etc. The New Double Red Strains have almost displaced the older ones, and the tendency is towards using the best money can buy. Experienced planters are taking pollination into consideration in planting new orchards or even in replanting. So we recommend an assortment to provide for pollination; not depending altogether on one variety.

Summer and Fall Apples

Summer and Fall Apples have been neglected in commercial plantings and are now proving, in many cases, more profitable than Winter varieties. In the home orchard a selection from this list will furnish fried Apples and sauce from early June and ripe fruit from late June until November. See table page 4 listing Ripening Order. We offer following choice varieties:

ANOKA. Semi-dwarf tree; new, early bearing red Summer Apple frequently fruiting second year after being transplanted; fruit large, delicious.

Considered by many as the best early Apple; just the tree for a small lot. **BONUM.** Excellent commercial Fall Apple; popular in western part of North Carolina. Medium size red, good quality, heavy bearer.

CLOSE. New, early red Apple ripening a few days ahead of Yellow Transparent. Introduced by U. S. Dept. of Agriculture. Early, annual bearer.

DOUBLE RED DUCHESS. Differs from the Standard Duchess by having more color and coloring earlier in the season. We recommend this Double Red Strain. Excellent home orchard variety, as well as a popular commercial Apple, having good color and being prolific.

EARLY HARVEST. Well known early Apple. Large, golden yellow. One of the old home orchard varieties continuing in excellent demand.

EARLY RED BIRD. A new scarlet red. Our earliest Apple, several days ahead of Yellow Transparent. Large, high quality, good shipper.

FALL PIPPIN. An old favorite family variety, ripening in August. Large golden yellow. Good for frying as soon as half matured, and most delicious when ripe.

Our Trees Regularly Inspected

In addition to regular inspections by State Entomologist, who has issued the following certificate:

CERTIFICATE OF NURSERY INSPECTION

Inspection No. 1

Richmond, Va., September 1, 1949

This is to certify that, acting under authority of the Crop Pest Law, Chapter 122, Sections 870-905 as amended, the nursery premises of WAYNESBORO NURSERIES, INC., of WAYNESBORO, VIRGINIA, were carefully inspected on June 3, 1949 by a representative of this department and that the nursery stock growing thereon is apparently free from dangerously injurious insects and plant diseases.

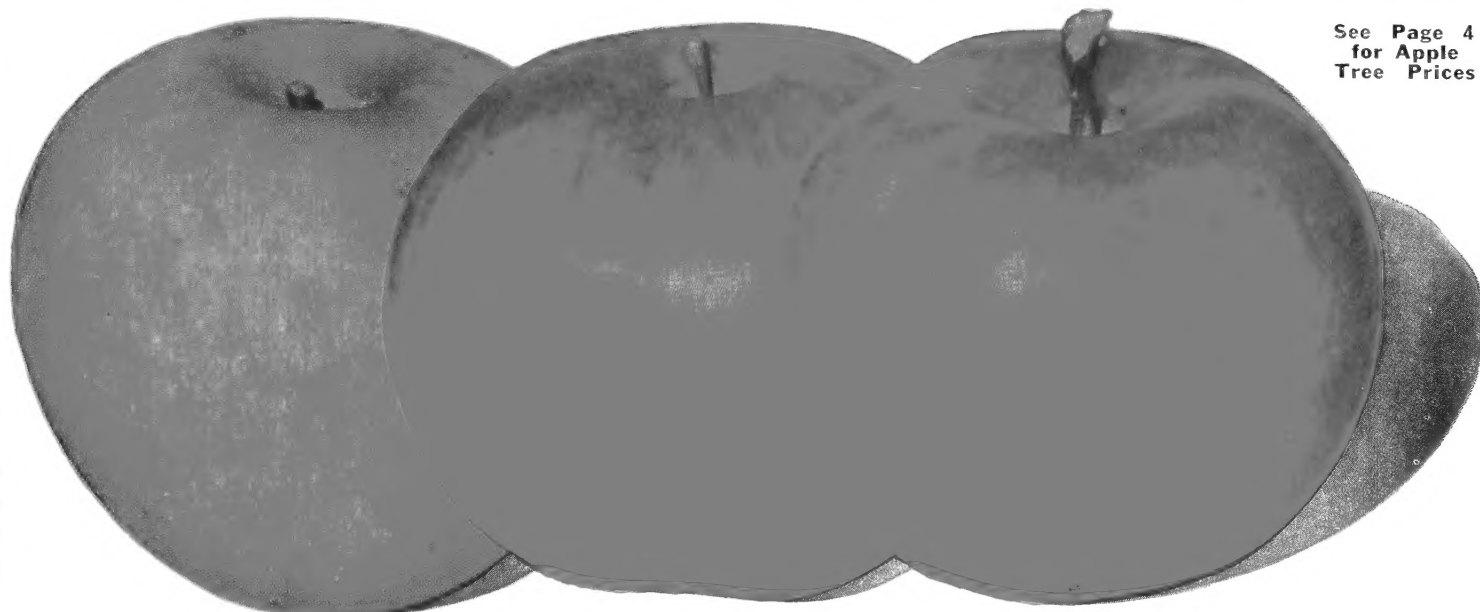

This certificate applies only to such stock as was actually inspected and certified in this nursery, and to such stock as is covered by a valid official inspection and registration certificate. It may be legally used only to cover such stock.

This certificate does not cover the requirements of Virginia Japanese beetle quarantine regulations nor any other special quarantine or regulations promulgated by the State of Virginia or by the United States Department of Agriculture.

This Certificate may be revoked for cause and is invalid after August 31, 1950. Copy must be attached to all nursery stock at time of delivery.

G. T. FRENCH, State Entomologist

We frequently have our Fruit Trees inspected by the Massachusetts Trueness-to-Name Inspection Service, affording planters double protection against mixtures.

Ripening Order

Summer and Fall Apples

Early Fruiting Semi-Dwarf Home Orchard Apples

If you are especially interested in early bearing trees, plant the Anoka, Close, Double Red Duchess, Yellow Transparent, and Winter Banana. These start fruiting within two or three years after being transplanted, require less attention, and are longer lived than Dwarf Trees.

Variety	Color
Early Red Bird	Scarlet-red
Close	Red
Yellow Transparent	Yellow
Lodi	Yellow
Early Harvest	Golden yellow
Red June	Red
Anoka	Red
Summer Yellow Delicious	Yellow
Williams Early Red	Red
Double Red Duchess	Red
Live!and Raspberry	Red striped
Horse	Greenish yellow
Summer Rambo	Red striped
Maiden Blush	Red blushed
Fall Pippin	Golden yellow
Bonum	Red
Smokehouse	Red striped
Transcendent Crab	Red striped
Hyslop Crab	Red
Grimes Golden	Golden yellow

NOTE: On quantities of 100 or more, submit your list for Special Commercial Wholesale Prices. Following Special Varieties offered at 10c. per tree above standard variety prices: Lowry, Vance Delicious, Yorking, Double Red Rome Strain No. 262 and Double Red Stayman Strain No. 201

SUMMER AND FALL TREES—Continued

- ✧ **GRIMES GOLDEN.** A well-known, spicy, medium size golden yellow. Firm, crisp, tender flesh. Excellent for sauce, as well as eating from hand. Ripens late Fall. Recommended for every home orchard as well as a profitable commercial Apple.
- ✧ **HORSE.** Old time Apple found in many southern home orchards. Large, solid greenish yellow. August.
- ✧ **HYSLOP CRAB.** Most popular red, medium size Crab. Used chiefly for jellies and pickling. Tree and fruits ornamental. Strong growing, prolific bearer.
- ✧ **LIVELAND RASPBERRY.** A beautiful, delicious, striped Apple, ripening in August. Planted chiefly for home use, as it is too tender to be a shipper.
- ✧ **LODI.** An improved Yellow Transparent, being larger than its parent and ripening a few days later. Due to its larger size, the Lodi is expected to become even more popular than the well known Yellow Transparent. Good early varieties have been neglected in commercial orchards so we recommend including the Lodi, as well as some of the other Summer Apples, in your next commercial planting.
- ✧ **MAIDEN BLUSH.** August and September. Medium to large, yellow background with red blush. Firm, good shipper.
- ✧ **RED JUNE.** Red, medium sized Apple. Good fryer.
- ✧ **SMOKEHOUSE.** An old home orchard which still deserves a place in every family orchard. Medium to large, firm, greenish background, red striped. Ripens over a period of several weeks, making it ideal for home use. Excellent for cooking and for eating from hand when fully ripe.
- ✧ **SUMMER RAMBO.** In Virginia and adjoining states there is possibly no other variety found in so many orchards. This famous old Apple is so well known that no home orchard is considered complete without it. Also popular with many of the commercial growers as it is always in demand at good prices. August. Large, red striped, greenish yellow background. Makes delicious sauce. You cannot go wrong in planting Summer Rambo.
- ✧ **SUMMER YELLOW DELICIOUS.** Golden yellow; resembles Winter Yellow Delicious, but ripens in July.
- ✧ **TRANSCENDENT CRAB.** Yellow striped with red. Large tree, quick grower. Desirable for shade, as well as fruit.
- ✧ **WILLIAMS EARLY RED.** Considered by many as the best commercial Summer Red Apple. Has been a money maker for commercial growers. Also an excellent home orchard variety. Large for an Apple of its season. Ripens around middle of July. Trees are strong, good growers and prolific bearers. Fruit beautiful in appearance and a good shipper.
- ✧ **YELLOW TRANSPARENT.** Well known, transparent to golden yellow. Late June. Favorite for sauce and good shipper.

Double
Red Rome

Winter Apples

In speaking of Winter varieties we refer to those harvested in late Fall and that may be kept in storage for Winter and next Spring use. A large percent of the commercial crop consists of such varieties. However, some of the Summer or Fall Apples are now proving equally as profitable.

LOWRY

Virginia ranks high as an Apple producing State, growing many good varieties. Among her leading ones is the Lowry, which originated in Nelson County, Virginia, and is believed to be a cross between the popular old-time Pilot and Virginia Winesap, possessing the good qualities of both, and is now becoming one of the State's most profitable Apples as well as it is being commercially planted in almost all other Apple growing sections of the United States. The Lowry is medium to large, mahogany-red, as sweet as the Delicious but is more easily grown and sells for fully as much. An ideal Apple for the roadside stand and truck trade as well as it makes a beautiful storage pack. A remarkable keeper; keeping even better than Delicious in cold storage.

LOWRY withstands cold. In Spring of 1945 when a large per cent of Virginia's fruit crop was wiped out by a freeze the Lowry in our orchard produced a full crop while Delicious and Stayman in same part of orchard were lost. Other growers reported numerous such experiences in 1948.

LOWRY trees vigorous growers. Make large, long-lived, well shaped trees which carry enormous crops, requiring little thinning.

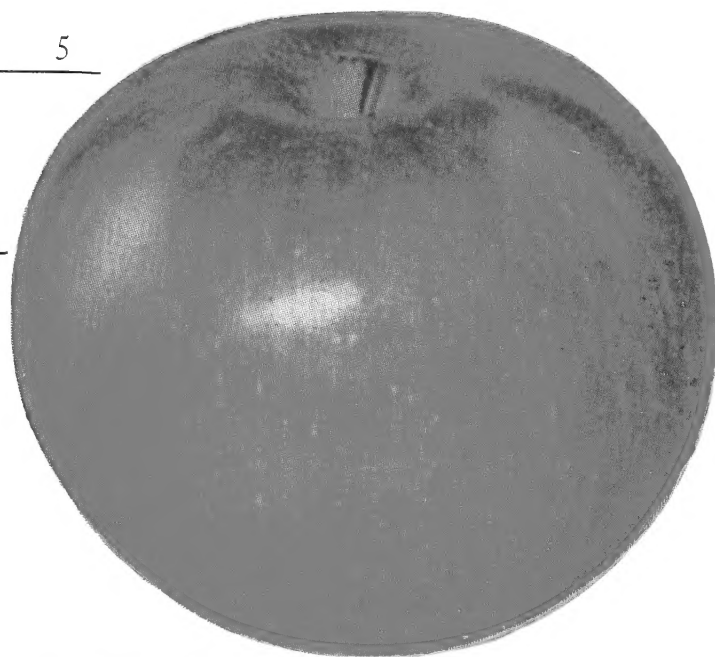

10c. extra per tree

CORTLAND. Improved McIntosh; longer keeper; larger, deeper red. Popular in New York and New England States.

DELICIOUS. Possibly one of the best known Winter varieties. Large, red striped, almost sweet. Late Fall and Winter. Good keeper in storage. Extensively grown and planted as a commercial variety, as well as in home orchards. In the past few years Standard Delicious is being displaced to a great extent, by the Vance Delicious or some of the other Double Red Strains.

DOUBLE RED MCINTOSH. A selected bright red sport of McIntosh. Extensively grown in New York and New England States. Ripens late Fall in Virginia, Winter Apple farther North.

DOUBLE RED SPY. An improved Northern Spy, having all the good qualities of the wellknown, old time Spy, and the advantage of 100% more color, affording it considerably more commercial value. Late Fall and Winter.

DOUBLE RED JONATHAN

An improvement over the well-known Jonathan—having more color and coloring earlier. This means more profit to the commercial and home grower, and more attractive Apples.

DOUBLE RED ROME

Another of the many Red Sports improving on their parent variety by being a Solid Red, which means more Number One Apples and better prices. There are numerous strains of Rome Sports. This particular one originated in the Northwest and is known by some as C & O Red Rome. May be harvested two weeks ahead of Rome. Can furnish limited quantity of Strain No. 262 at 10c. extra per tree.

Another of the many Red Sports improving on their parent variety by being a Solid Red, which means more Number One Apples and better prices. There are numerous strains of Rome Sports. This particular one originated in the Northwest and is known by some as C & O Red Rome. May be harvested two weeks ahead of Rome. Can furnish limited quantity of Strain No. 262 at 10c. extra per tree.

JONATHAN. Well known commercial variety. Medium size, red coloring on greenish background, white flesh. Ready for market early Winter.

LADY. Small, golden background, red blush; highly flavored; excellent quality. Extremely popular for decoration purposes on dining room and dining car tables and eating from hand. Fruit is rare and sells for unusually high prices. 25c. extra per tree.

M. B. TWIG. Well known, large red Apple of the Winesap family. Firm, long keeper. Not as heavy bearer as Paragon, which is very similar.

MCINTOSH. Red striped. Good Winter variety in New England States, where it is extensively planted, but late Fall Apple in the South.

N. W. GREENING. One of the few green skinned Apples in popular demand. Large, greenish yellow. Good cooker and an excellent keeper. Prolific bearer.

PARAGON WINESAP. Resembles M. B. Twig, but a better bearer.

RED GRAVENSTEIN. Deep red late Fall and Winter Apple. Sport of the Gravenstein, but has much more color. Excellent for sauce and desserts. Medium size, crisp, tender, juicy, and sub-acid.

ROME BEAUTY. Well known commercial variety. Red striped. Firm, yellow meat; late keeper and good shipper. Large, mild, sub-acid. Early, regular bearer; late bloomer, frequently escaping Spring frosts when some other varieties fail. A good Winter Apple to include in your home or commercial orchard.

STAYMAN WINESAP. One of the best known, most extensively planted Winter varieties. Large, green background, red stripe. Rich, crisp, tender yellow meat. Excellent cooker, as well as for eating from hand. Somewhat shy of color and subject to cracking in wet seasons.

SWEET PARADISE. One of the few oldtime sweet Apples still in home orchard cultivation. Medium size, dull green with reddish brown blush. Late Fall.

Double Red Stayman

The Stayman Winesap continues to be one of the big commercial varieties of the East, but in recent years the original strain of Stayman is being displaced by its offspring, the Double Red Stayman, which has all the good qualities of its popular parent and the advantage of more color and coloring earlier in the season. This means more Number One Apples, better prices, and bigger profits. One of our best sellers for both commercial and home orchard planting.

DOUBLE RED STAYMAN

NO. 201 STRAIN

A most promising new northwestern introduction. Our supply is too limited to justify the space this Apple deserves. 1 year only.

10c. extra per tree

DOUBLE RED DELICIOUS SPORTS

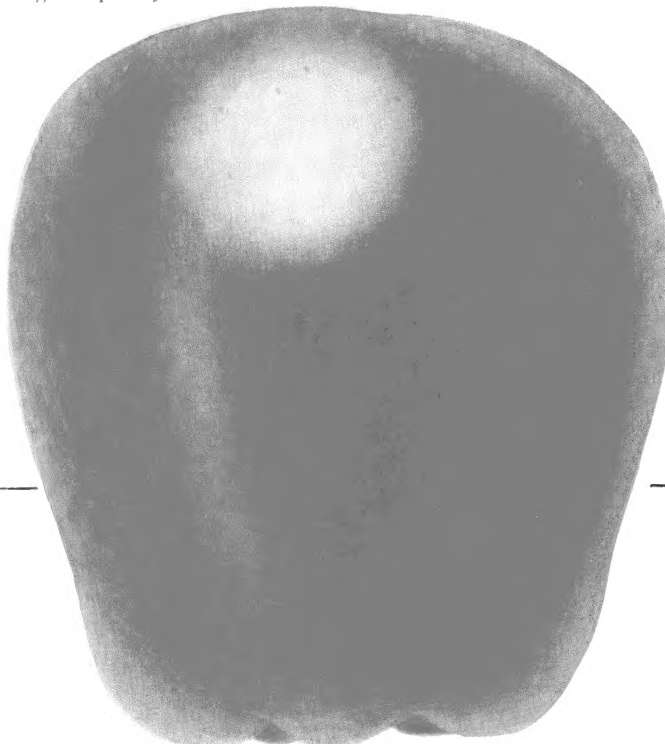

No variety has produced more Red Sports than Delicious. Much thought and time have been given to testing and selecting the most desirable ones. Each has some good quality but all strains are not needed as the better qualities are to be had in the following:

VANCE DELICIOUS

which we place **FIRST** for the following reasons:

1. **Early Coloring**, which makes possible early harvesting and marketing ahead of Western Apples.
2. **Good Color**. VANCE begins coloring with a blush which extends uniformly over the entire surface, affording a smooth, pleasing, bright red which takes polish.
3. **Size**. One of the largest Apples, emphasizing the typical Delicious shape and marks. **10c. extra per tree.**

SENATOR HARRY F. BYRD, Virginia's Largest Apple Grower, in addressing growers at his Annual Picnic August 30, 1947, stated that among the 6 strains of Double Red Delicious being grown in his orchards is Vance Delicious, which is *extremely promising*.

Vance Delicious

WINTER APPLES—Cont.

TURLEY WINESAP. An improved Stayman, resembling the Standard Stayman closely, but less subject to cracking, and has better color.

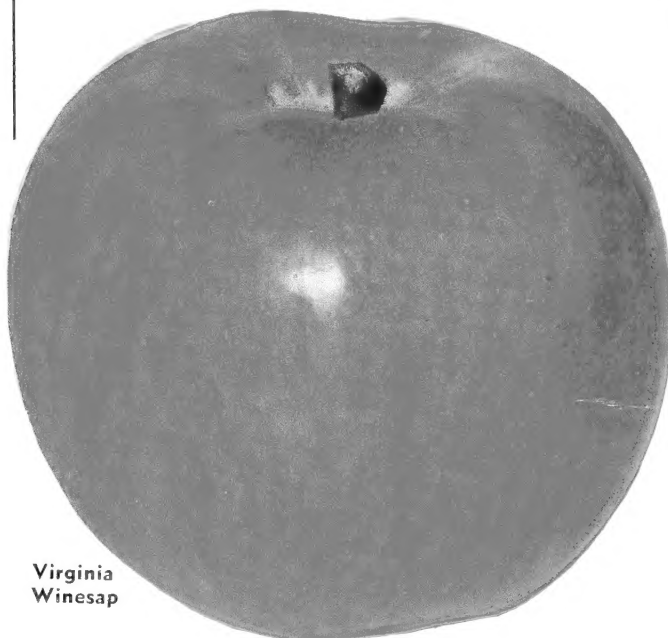

VIRGINIA BEAUTY. A native Apple of which Virginia is proud. Late Fall and early Winter. Resembles Red Delicious in quality and shape, but darker color. Excellent quality.

Improved Winesap C. & O. STRAIN

Improved, all-red Northwestern strain of Winesap. Larger and better color.

WINESAP (OLD VIRGINIA STRAIN)

A variety that has probably done as much as any other Apple in winning a reputation for Virginia Apples on all markets of the world. Also popular in most other parts of the United States and comes as near being adapted to all soils and climates as any Apple we know of. Medium size, red skin slightly streaked on yellow; flesh firm, crisp, sub-acid; can be kept November to May.

Virginia Winesap

RICHARED DELICIOUS

One of the first Double Red Delicious Sports to be offered and still extensively planted. Resembles Vance more than any other strain but differs by being 2 weeks later. These 2 Red Sports make an excellent combination extending season. Size, quality of fruit, fruiting habits same as Delicious.

DOUBLE RED DELICIOUS Eastern Strain

Also known as Starking. Differs from Vance and Richared by coloring with stripes slightly ahead of Richared, becoming much redder than common Delicious. This strain has been extensively planted and rates as one of the leaders.

Selecting Varieties for a Home Garden

We offer a large assortment of Apples so as to make available for home orchard planters varieties ripening from the earliest to the latest, affording fresh fruit throughout the year.

We recommend the following as being especially suited for a home orchard collection:

Early Red Bird
Early Yellow Transparent
Maiden Blush
Summer Rambo
Paragon Winesap
Delicious
Winter Banana
Winesap

POLLINATION

Varieties such as *Winesap, Stayman, M. B. Twig, McIntosh, and N. W. Greening* do not fruit consistently unless pollinated by other varieties. Among the good pollinators are the *Delicious, Grimes Golden, Jonathan, Lowry, Yellow Delicious, and Yorking*.

Save Time in Growing Fruit

By planting our Super, Mammoth, Giant and Bearing Size Apple Trees, which have been twice transplanted and will furnish fruit much earlier than the smaller, younger trees. We especially recommend these larger trees for replanting where pollination is a problem; also for planting home orchards. At this time we have available the following varieties in the large-sized trees, but the supply is limited and we suggest that you make a second choice in case we should be out of the first choice at the time your order is received.

*Bonum	Fall Pippin	Sweet Paradise
*Close	*Grimes Golden	Turley Winesap
*Cortland	*Lowry	Winesap
*Delicious	Maiden Blush	Winter Banana
*Double Red Delicious	McIntosh	*Yellow Delicious
*Double Red Duchess	N. W. Greening	*Yellow Transparent
*Double Red Jonathan	Paragon Winesap	*York Imperial
*Double Red Stayman	*Rome Beauty	*Yorking
	Summer Yellow Delicious	

*Indicates varieties especially recommended for pollination

WINTER APPLES Continued

York Imperial

Yorking

The above print was made from a drawing of average samples of the fruit of YORKING and YORK. While every Yorking on the tree was a solid red, many of the Yorks were green and others only showed traces of red stripes

Yorking—THE YORK SUPREME—A SUPER RED YORK

Inheriting all the good qualities of the famous old York Imperial and 100% more color, which appears earlier in the season.

H. L. Price, Former Dean of Agriculture at V. P. I., on his first visit to the original YORKING tree writes:

"It is a great improvement over its parent in color and I am personally satisfied that there is a marked difference in the foliage and a lesser difference in growth. I consider this sport of equal importance to the appearance of Starking, Richared, Blaxtayman, and other red-fruited sporting forms.

(Signed) H. L. PRICE

Dean of Agriculture
Virginia Polytechnic Institute
Blacksburg, Virginia

Dr. A. H. Teske, Extension Horticulturist for Virginia, after visiting the original YORKING Tree, writes as follows:

"I think you have a real find in this bud sport and I do not hesitate to say that the growers should avail themselves of the opportunity of planting the Yorking when planting York Imperial trees. In my opinion a grower would make a grave mistake to plant the common York Imperial wherever the Yorking is available."

(Signed) A. H. TESKE

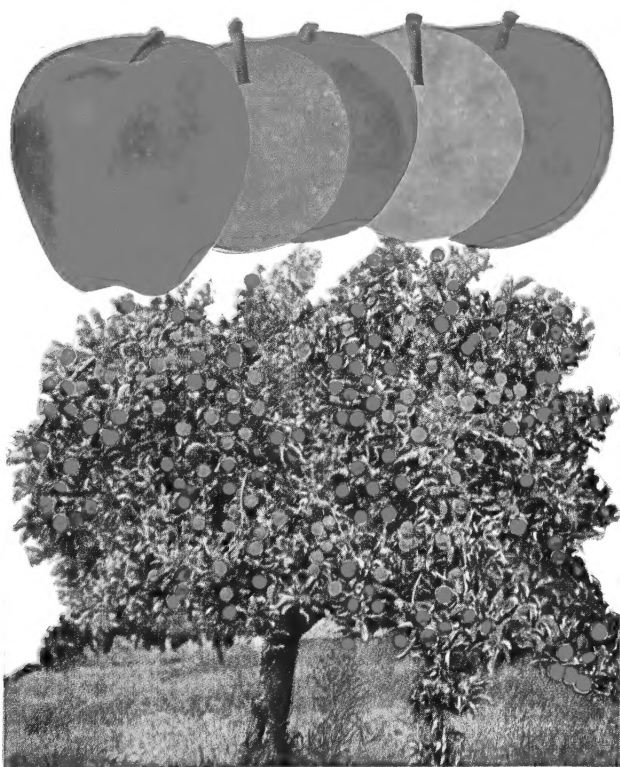

Extension Horticulturist
Agriculture and Home Economics
State of Virginia

YORKING has proven to have been a great discovery. It is now our largest seller, 10c. extra per tree.

Senator Byrd also stated in addressing fruit growers at his 1947 Annual Picnic that he finds **YORKING** the most desirable of the strains of Red Yorks he has tested.

YORKING'S CHIEF ADVANTAGES

1. **Color**—Every Apple being a Solid Red is a tremendous advantage.
2. **Colors Early**—Yorking may be harvested two weeks head of York, resulting in advantage in price.
3. **Quicker Sales**—A basket or barrel of No. 1 Apples, every Apple being a solid red, will sell more readily than a basket or barrel containing just enough color to pass inspection.
4. **More No. 1 Apples**—There being no culls on account of lack of color, pack will be much larger and profit greater.
5. **Does Not Scald in Storage**—A disadvantage of the York, as well as other partially green varieties, is scalding when held late in storage. The Yorking has never been known to scald.
6. **Apparently More Prolific**—Because of having a larger leaf and more feeding capacity, it appears that the Yorking tree is going to be more productive, the fruit being uniform in size and in large volume.
7. **Protected by U. S. Patent**—The tremendous popularity of the Yorking will naturally bring claims of having something "Just as Good." However, the Yorking being a patented variety (U. S. Patent No. 125), you are protected when you insist on Yorking, rejecting any so-called "Just as Good" offered as Red Yorks.

A Whole Apple Orchard on a Single Tree!

5-In-1 TREE

Such a tree is made possible by grafting with varieties from the earliest to the latest. An ideal tree where space can accommodate only one, two or three trees. The varieties grafted on 5-In-1 Trees will vary, but most generally consist of **Yellow Transparent, Summer Rambo, Stayman Winesap, and Delicious.**

5-In-1 Trees are offered only in 2 yr., 4-6 ft. size at \$3.50 each

4-In-1 TREE

4-In-1 Trees are produced in the same manner as the 5-In-1, serving the same purpose, but having one less number of varieties. These Multiple Variety Trees are not only practical for the home garden or lawn, but are new, interesting and the average grower takes pride in showing them to his friends.

2 yr., 4-6 ft. size at \$3.00 each

3-In-1 TREE

Consists of three choice varieties, ripening at different seasons, furnishing fresh fruit over a longer period at very little extra cost. Multiple Variety Trees are usually more prolific than trees of a single variety as they provide excellent cross pollination.

2 yr., 4-6 ft. size at \$2.50 each

Statement of
MASSACHUSETTS TRUENESS-TO-NAME INSPECTION SERVICE

Amherst, Mass., July 28, 1949

To Whom it May Concern:

All of the apple, except one-year grafts and transplants, varieties propagated and now growing in the Waynesboro Nurseries, Waynesboro, Virginia, have been examined by the Massachusetts Trueness-to-Name Inspection Service. To the best of our knowledge, these trees are true to name as they now stand in the nursery row.

(signed) A. P. FRENCH

NOTE: Above inspection covers all salable Apple Trees in our Nursery, except the one-year grafts too small to offer this season and transplants not yet salable.

Waynesboro PEACHES

Peach Industry Being Revolutionized

The Peach, an old favorite in the fruit family, is now making new friends. Recent chemical discoveries have simplified spraying, market expansion has been made possible by modern methods of freezing, home freezing units, frozen food locker plants, new methods of canning and keeping fruit fresh in storage. Planting of properly located orchards consisting of improved varieties has promise of being a profitable investment.

NEW METHODS SIMPLIFY PEACH CULTURE—At one time borers discouraged Peach culture, but Paradow Peach Gas eliminated much of the trouble. The recent introduction of DDT has made possible almost the extermination of the borer, Oriental moth, and curculio with much less effort and expense than the old methods.

IMPROVED MARKET CONDITIONS—Population in the South has advanced with industrial development. Improved highway and hauling facilities are enabling markets, large and small, to provide the consumer with fresh fruit daily from the orchard. For this demand, it is advisable to plant a larger assortment of varieties ripening over a longer period. Since the fruit in various Peach growing sections ripens at different times, the market is seldom congested. However, modern fruit processing plants are ready to handle any surpluses which may develop.

FROZEN PEACHES IN GREAT DEMAND—Frozen fruit processing plants have created a new, profitable market for Peaches. Home freezers and frozen food lockers have likewise extended the local market for fresh fruit. The frozen fruit industry is just in its infancy, so in adding new varieties we are considering their freezing qualities.

ADVANTAGES IN PLANTING WAYNESBORO NURSERIES' TREES—Being located in the Commercial Peach Orchard Section of Virginia, we are able to make variety research in bearing orchards, to take advantage of valuable information furnished by various State and Federal Experiment Stations, and to cut our budwood from fruiting trees. We can thus study new varieties, adding those which are promising and discarding less desirable ones. In this way we attempt to serve the commercial grower as a source of information, as well as furnish dependable trees grown in our sandy loam soil, noted for producing an excellent root system.

We Offer the Following Choice Varieties

Note—See Page 10 for Ripening Order of Peaches

†Indicates good freezing qualities.

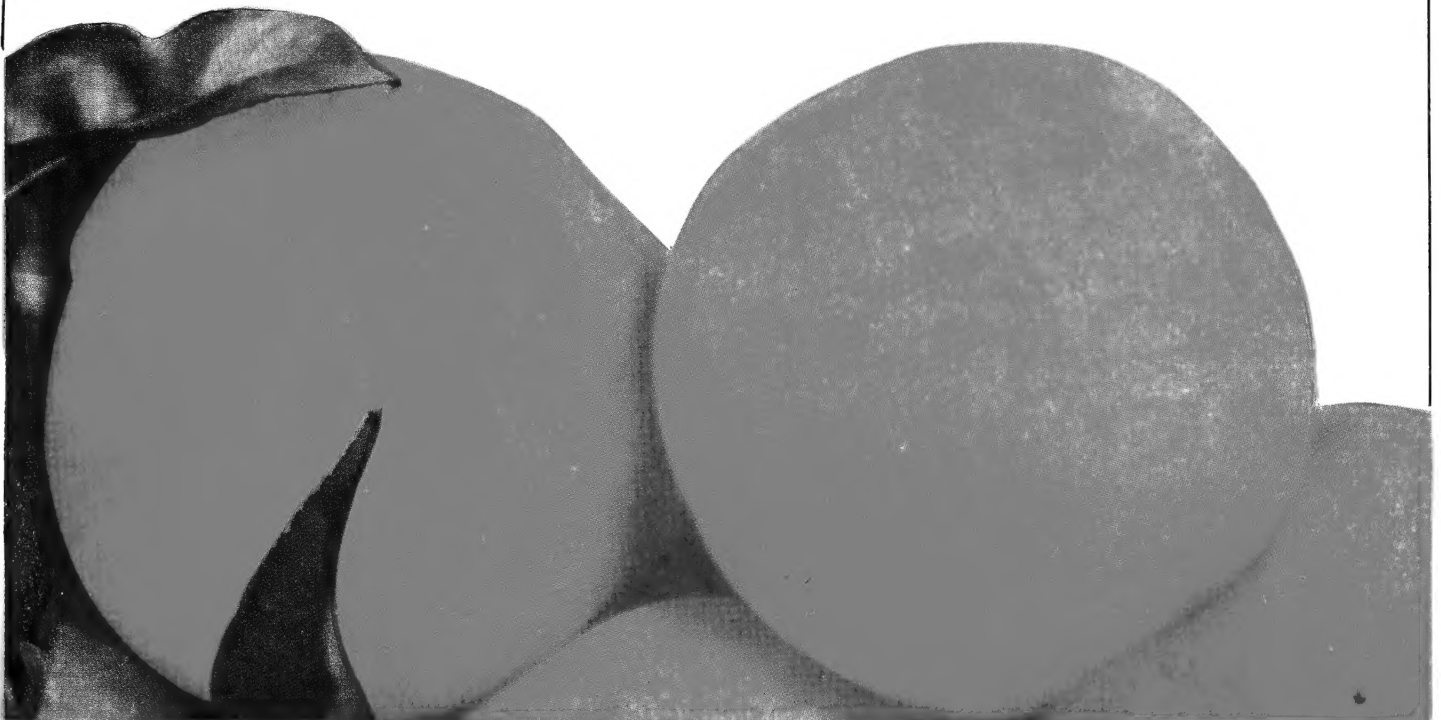

††Indicates excellent freezing qualities.

- ✓ **AFTERGLOW.** Large, well-colored, firm, yellow freestone, following Elberta. Introduced by New Jersey State Experiment Station.
- ✓ **AMBER GEM.** A new clingstone commercial canning Peach which originated in New Jersey. Extensively tested by the Michigan Experiment Station and found to be a most desirable canner. Now being planted in Michigan in large numbers for canning and more recently large quantities have been planted in Virginia for the same purpose. Long, medium size, beautiful color; firm, yellow flesh. Early August.
- † **BELLE OF GEORGIA.** An old Peach, yet unsurpassed for a white freestone home and commercial variety. Large, white skin, red cheek; sweet, excellent, peachy flavor. August.

- † **BRACKETT.** Improved Elberta, ripening a few days later. Same size, better color and quality. Will hang on the tree longer than Elberta, better shipper.
- ✓ **CARMAN.** Old-favorite white semi-freestone. Large, prolific bearer, good canning qualities. July.
- ✓ **CHAMPION.** Large, white semi-freestone. Very hardy in bud, often producing a full crop when other varieties fail. Favorite home orchard Peach for the roadside stand and local market. August.
- ✓ **CRAWFORD'S EARLY.** Excellent large, sweet, yellow, freestone, home orchard variety. Early August.
- ✓ **DIXIRED.** U. S. Department of Agriculture introduction. Medium size, yellow clingstone. Flesh firm but melting, good flavor. Acquires its attractive red blush long before it is ready to pick. Promising early shipper. 10c. extra per tree.

† GOLDEN JUBILEE

Ranks high among leading commercial Peaches. One of the earliest yellow freestones of good quality. Demands top prices because of its earliness and superior quality. Especially profitable for local markets; not quite as firm a shipper as Elberta. Good canner. July.

WAYNESBORO PEACHES—Continued

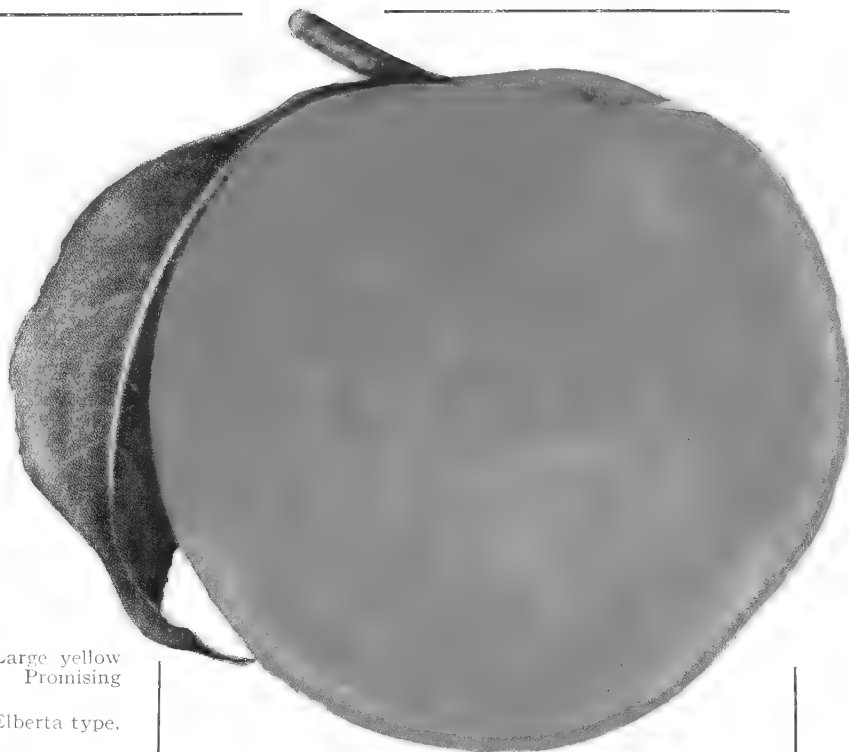

† **ELBERTA.** Continues to be the most extensively planted Peach, not the best in quality, but its size, color and firmness combine to make it the most popular commercial variety. Even takes first place in home orchard planting. More than one-half of all the Peaches we sell is Elberta. Yellow freestone, red cheek. Middle August. The Elberta season has been extended by using the Sullivan's Early Elberta, ripening 10 days earlier and the Gage Elberta 5 days later, making possible Elberta Peaches over a period of 4 weeks.

† **FIREGLOW.** New Jersey Experiment Station introduction. Large yellow freestone, following Golden Jubilee. Firm, excellent shipper. Promising commercial Peach.

† **GAGE ELBERTA.** Resistant to bacteriosis. Yellow freestone. Elberta type, ripening 5 days later.

Shipper's Late Red

Large, round yellow. Freestone, with attractive red coloring. Ripens a few days later than Elberta. Better quality, sells for as much or more. Ranks as a top commercial variety. Equally as popular for the home orchard. Hardy, good growers and prolific bearers.

†† DIXIEGEM

Originated by U. S. Experiment Station, Fort Valley, Georgia. Yellow, freestone, ripening just ahead of Golden Jubilee. Medium size; bright red blush on attractive yellow background. Fine textured, excellent flavor. Vigorous and prolific. Promising new variety. 10c. extra per tree.

† **GOLDEN EAST.** Another recent New Jersey Experiment Station introduction. Large, firm, highly colored yellow freestone, ripening 15 days ahead of Elberta.

† **HALE-HAVEN.** A most promising new, large, yellow freestone. Introduced by Michigan State Experiment Station. A cross between Hale and South Haven. Ripens two weeks earlier than Elberta, making an excellent combination with Golden Jubilee and Elberta. Ranks third in number of trees we sell.

† **HEATH CLING.** Late, white clingstone pickling Peach of good size. September.

† **HILEY.** Large, white freestone of Belle of Georgia type, ripening two weeks earlier. Planted both commercially and in the home orchard. July.

†† **INDIAN.** Solid red clingstone, red to the stone, firm and juicy, medium to large. One of the best pickling Peaches. Sure cropper. September.

†† **J. H. HALE.** Large, firm, yellow freestone. Golden yellow skin, red cheek. Excellent shipping qualities and demands top prices on the market because of its size and good quality. Ranks high as a commercial variety. August.

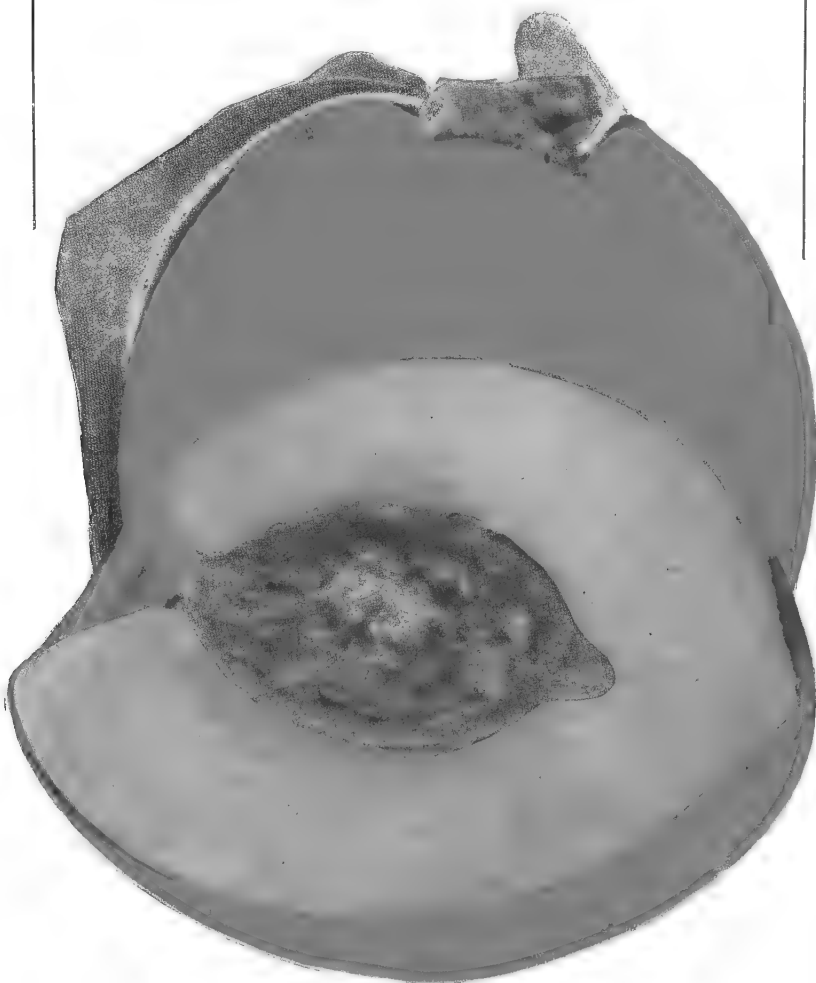

† **KRUMMEL (KRUMMEL'S OCTOBER).** Large, yellow freestone with red cheek. Early October.

† **LATE ELBERTA.** Elberta type, but ripening in early September. Yellow freestone with red cheek. Medium to large.

† **LIZZIE.** Large, firm, yellow freestone. Red skin Peach of Elberta type, ripening two weeks later. Long keeper, good shipper, meeting the requirements of a late commercial variety. Thrifty and productive. Considered the best late Peach.

†† SOUTHLAND

The demand for varieties of fruits better suited for quick freezing is responsible for state and federal experiment station research, breeding and fruiting Peaches adapted to freezing. One of the most promising of these new varieties is a seedling grown from Hale-Haven, introduced by the U. S. Experiment Station at Fort Valley, Georgia, and named Southland. It is not only less subject to discoloration when frozen, but is a large, beautiful, yellow freestone with a red cheek. Firm, good quality and excellent shipper. Ripens approximately 16 days ahead of Elberta, making an excellent combination with Sullivan's Early Elberta and Elberta—covering a ripening period of three weeks. 10c. extra per tree.

Waynesboro Peaches *Continued*

MAYFLOWER. Earliest Peach listed in our catalogue. A beautiful red of medium size; white, clingstone. Sells because of its earliness and excellent color. The quality, of course, does not compare with that of later varieties, but it has a place in the home orchard, as well as for the roadside market. June.

RED BIRD. A beautiful, large, red-skinned, white-meated Early Cling which always sells, even though the quality is not considered the best. Very firm; excellent shipper. Follows the Mayflower.

RED HAVEN. Another new Michigan State Experiment Station introduction. Bright red coloring on a yellow background. Smooth, almost fuzzless. Firm flesh. Fruit ripens uniformly; should be thinned for best results. Trees strong growers and prolific bearers. Has produced full crops in orchards where other varieties were winterkilled. Ripens about 5 days before Golden Jubilee.

REDSKIN. Introduced by Maryland University Experiment Station as a cross between Hale and Elberta. Red skin; yellow, firm flesh. Freestone. Good shipper, excellent quality. We believe this new variety worthy of a test in your orchard. Ripens a few days ahead of Elberta. 10c. extra per tree.

SALBERTA. Late yellow freestone. Cross between Elberta and Salway. Closely resembling Elberta, possessing all its good qualities but ripening 2 weeks later.

SULLIVAN'S EARLY ELBERTA. Yellow freestone sport of Elberta; identical size, color and shipping qualities. Ripens earlier, enabling the grower to have Elberta Peaches on the market 10 days ahead of the main crop. The new Peach originated in Georgia, where it is extremely popular. Now being planted in all commercial Peach sections and ranks second to Elberta in our Peach sales.

SLAPPY. Sweet, highly flavored yellow freestone. Purely a home orchard variety. Considered the best of all as a canner as it retains its sweetness and excellent peachy flavor. Late July.

SUMMERCREST. New, large, yellow freestone of very fine quality, ripening with Belle of Georgia. Introduced by New Jersey Experiment Station. Vigorous grower and buds hardy, withstanding more cold than some varieties.

SUNHIGH. A New Jersey Experiment Station Peach, ripening 15 days before Elberta. Large, bright red, yellow flesh; freestone. Good shipper.

TRIOGEM. Large; early golden yellow, freestone New Jersey Peach, following Golden Jubilee. Very prolific—requiring thinning. These New Jersey varieties are selected so as to furnish yellow freestone Peaches of good quality over a period of more than 30 days.

Red Haven

PROTECT YOUR PEACH TREES FROM BORERS BY USING PARADOW OR DDT

(See Page 24E)

Elberta

PLANTING GUIDE

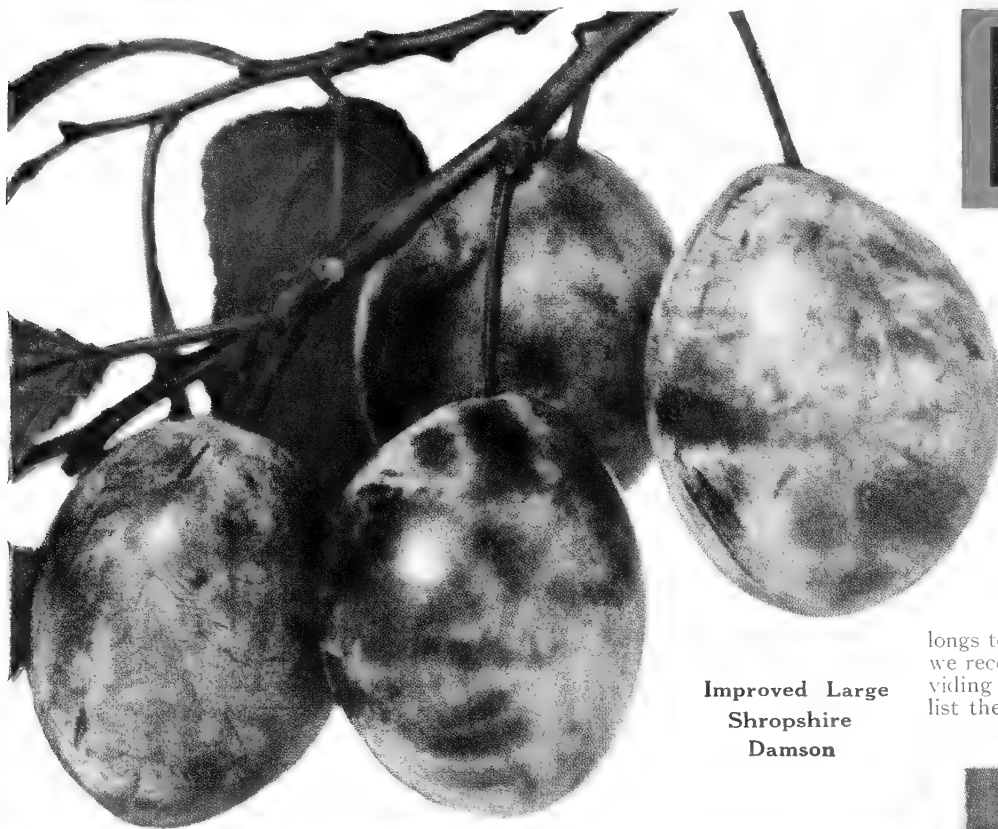

The ripening date given is for a normal season at Waynesboro, Virginia. Some years Peaches ripen earlier and some later. Farther South the ripening period is earlier, and farther North, later.

PLUMS

Early, Prolific Bearers Easily Grown

We too often think of a home orchard as consisting of only Apples, Peaches, and possibly a few Grape vines, omitting important fruits—including the Plums, which may be had in an assortment, ripening at different seasons.

There are two distinct types of Plums—the Oriental and European. The Oriental are generally quite juicy and tender, and can be best served when raw, fresh from tree, while the European are the firmer types, used for canning, preserving, butters, drying, etc. The Prune family belongs to the European type Plums. For best results, we recommend planting two or more varieties, providing for cross pollination. We have endeavored to list the outstanding of each class as follows:

Plum Prices

	1 to 10 Each	10 to 30 Each	30 to 50 Each	50 to 100 Each
4-6 feet.....	\$2.00	\$1.75	\$1.60	\$1.20
3-4 feet.....	1.60	1.40	1.20	.90
2-3 feet.....	1.35	1.15	1.00	.75
6-7 feet, Jumbo Size.....	2.75	2.45	2.25	1.75

NOTE: On quantities of more than 100, write for Special Commercial Wholesale Prices

ABUNDANCE. One of the best known Orientals. Lemon yellow, overspread with bright cherry red. Large, oblong, tapering to a point. Flesh orange-yellow, melting, rich and highly aromatic. Abundant, annual bearer. August.

BURBANK. A long-standing favorite. Oriental. Large, nearly globular. Purplish-red with deep, yellow flesh. Very sweet, with a peculiar, agreeable flavor. Early bearer. August.

EUROPEAN PRUNE. Excellent for canning, drying, and dessert, as well as eating from tree. Large, long, oval, purple; flesh firm, sweet and pleasant. Freestone. Late August.

GREEN GAGE. European type grown extensively for home use because of its excellent quality and adaptability to canning and preserving. Large, egg-shaped; purplish green skin.

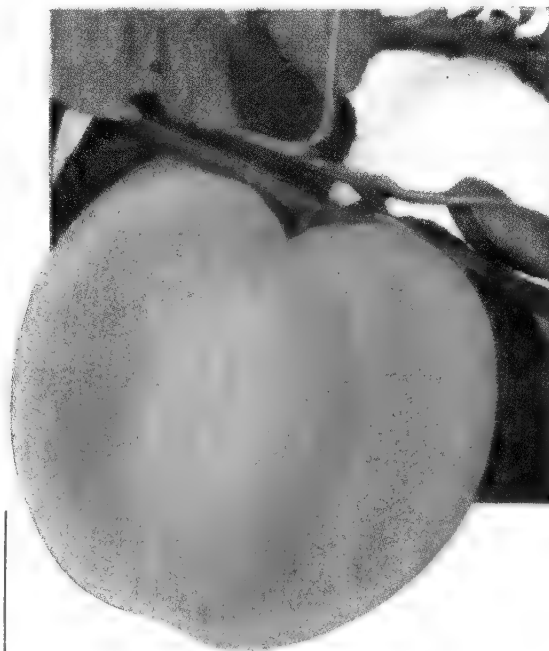

MAMMOTH GOLDEN. One of the largest, most beautiful and delicious of the golden varieties. Early August. Freestone.

RED JUNE. Early red Oriental. Usually a sure-cropper because of its late bloom. Very good Plum of its season.

SHROPSHIRE DAMSON. An improved Damson, larger than the old type, but possessing all of its good qualities. At one time the Damson was considered a home orchard fruit, but is now in great commercial demand, being used by fruit processing plants for jams and preserves. Late bloomer, early bearer, sure cropper.

STANLEY PRUNE. An improved Prune, introduced by the New York Experiment Station and considered by many as the best. Large, firm, dark blue, juicy, fine grained, tender, sweet, and of the very best quality. Also being planted commercially for local processing plants, or for central fresh fruit markets. Late August.

WICKSON. Largest of the Oriental varieties; heart-shaped, deep, maroon-red fruit. Flesh very firm, yellow, sub-acid, rich and sweet. Good shipper. Tree upright. Vigorous grower.

NECTARINES

Another delicious fruit too seldom grown in the East. Listed by some as a fuzzless Peach.

The tree habits and quality of the fruit are similar to those of the Peach, with the exception of the fruit being smooth like a Plum.

There are a dozen or more named varieties. We offer the **SURE-CROP**, which was imported from New Zealand by the United States Department of Agriculture. The fruit is large, bright red, and has a very pleasant flavor.

The tree is hardy and productive, justifying all that the name **SURE-CROP** implies. Flesh white, juicy, fine-grained, tender, sweet, aromatic and very good in quality. Ripens here in mid-August.

	1 to 10 Each	10 to 30 Each	30 to 50 Each	50 or more Each
4-6 ft.....	\$2.00	\$1.75	\$1.60	\$1.20
3-4 ft.....	1.60	1.40	1.20	.90
2-3 ft.....	1.35	1.15	1.00	.75

Superb Hardy Apricot

Delicious. Just as hardy and as easily grown as Peaches and our Russian Strain often succeeds where Peaches fail. Medium size, golden yellow. Freestone. Excellent quality. Early bearer.

Sizes and Prices Same as Nectarines

Cherries

The Cherry has always been one of the most delicious fruits, but has never been as extensively grown as the Apple and Peach. Unfortunately, it is not adapted to as wide a range of soil conditions and climates, but can be successfully grown in many localities where not cultivated at the present.

Sweet Cherries bear heavier and more regularly if cross pollination is provided for and planting two or more varieties is recommended. Pie Cherries are generally self-fruitful.

New processes of freezing afford this fruit great possibilities, as fresh Cherries may now be served throughout the year. As a commercial fruit it is coming into its own, but if you are not in position to grow Cherries commercially, why not grow at least enough for home use? You who are located in the Deep South or in a low, flat country, will not be able to compete with growers in a higher altitude and cooler climate, but by careful selection of varieties and attention, you should be able to grow Cherries for home use, especially the Large Montmorency, the most popular pie variety.

Early Richmond

Two Distinct Classes The SOURS and SWEETS

The Sours are used chiefly for pies, while the Sweets have many uses. Outstanding among the Sweets is the Greenwood, a dark red, and the Napoleon, a light wax. All the others on our list are also good and worthy of a place on any table.

PIE CHERRIES (Sour Cherries)

EARLY RICHMOND. Earliest of the sour, pie varieties. Bright red, round medium size, young, prolific bearer.

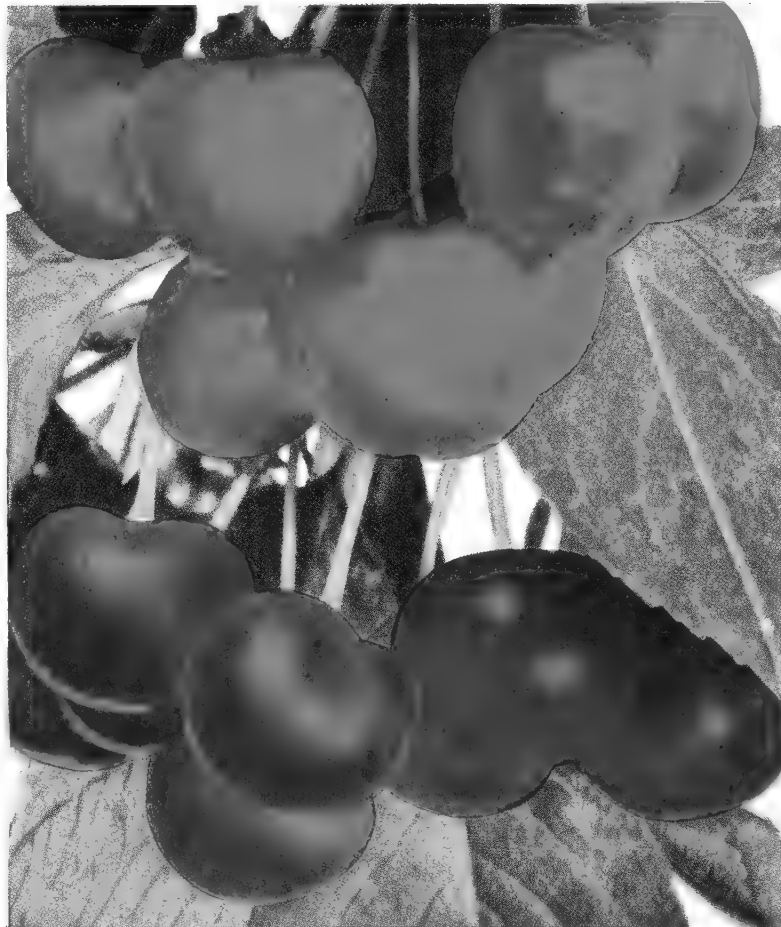

LARGE MONTMORENCY. The leading pie Cherry, and most extensively planted of all Cherries. Large, midseason, dark red; small seed, firm flesh. Ninety percent of all the frozen Cherries used for pies are Montmorency. Also just as popular in the home orchard. Makes beautiful lawn tree.

PRICES ON SOUR CHERRIES

	1 to 10 Each	10 to 30 Each	30 to 50 Each
4-6 ft.	\$2.10	\$1.85	\$1.65
3-4 ft.	1.85	1.65	1.45
2-3 ft.	1.65	1.45	1.25

Note: On quantities of more than 50, write for special commercial prices

Large Montmorency: 5-7 ft. Jumbo size \$3.00 each in lots of 1 to 10; \$2.50 each in lots of 10 to 30.

Top: Large Montmorency—Bottom: Windsor

Standard SWEET CHERRIES

BLACK TARTARIAN. Large, purplish black. Tender, juicy, very rich. Vigorous, upright grower, prolific bearer. Early.

GOVERNOR WOOD. A famous Wax. Large, heart-shaped. Light yellow flushed with red. Firm and sweet. Tree vigorous and productive. Early.

LAMBERT. Large dark red, rich, firm. Heavy, regular bearer. Tree good grower, more resistant to fungous diseases and insects than average varieties. Good shipper. Late.

NAPOLEON. Most popular Wax Cherry, ripening two weeks later than Governor Wood. Larger, better shipper. Beautiful golden background, bright red cheek.

YELLOW SPANISH. Bright amber-yellow, reddish blush. Rich, sweet and tender, but firm enough for shipping. Resembles Napoleon, ripening a few days later. Vigorous grower.

PRICES ON STANDARD SWEET CHERRIES

	1 to 10 Each	10 to 30 Each	30 to 50 Each
4-6 ft.....	\$2.30	\$2.10	\$1.90
3-4 ft.....	1.95	1.75	1.60
2-3 ft.....	1.75	1.60	1.45

NOTE:

On quantities of more than 50, write for special commercial prices

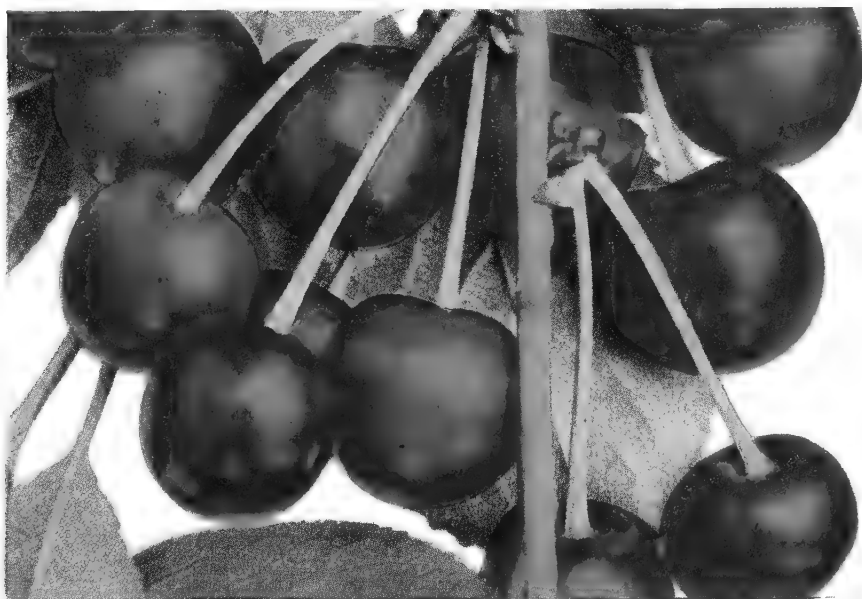

Top:
Napoleon
Bottom:
Black Tartarian

Hansen Hybrid Bush Cherry

Large, purplish red, sweet fruit, 1/2-inch or more in diameter. Excellent for serving fresh and for jellies.

Dwarf grower, approximately 3 feet in height and spread. Ornamental as well as fruitful, being covered with white flowers in Spring, and foliage turning red in Autumn. Ripens early July.

3-YEAR, BEARING SIZE TREES: \$1.50 each, \$15.00 per doz.

Greenwood

PRIZE SUPER SWEET CHERRIES

GREENWOOD. Enormous, mahogany red, sweet fruit; small seed. Firm and excellent shipper, as well as an ideal Cherry for roadside stands and home use. Trees are vigorous growers and prolific bearers. Apparently adapted to a wide range of soils and can be grown with a minimum amount of attention. However, it responds well to modern cultural practices.

WINDSOR. Exceptionally large, juicy, firm. Prolific late blackish maroon. Recommended for cross pollination. Most extensively planted commercial Sweet Cherry in the East.

PRICES on GREENWOOD and WINDSOR

	1 to 10 Each	10 to 30 Each	30 to 50 Each
4-6 ft.....	\$2.50	\$2.30	\$2.10
3-4 ft.....	2.25	2.15	2.00

NOTE: On quantities of more than 50, write for special commercial prices

Waynesboro PEARS

Delicious Fresh from the Tree or Canned

Pears in the East are planted chiefly in the family orchard or in a limited way for local market and roadside stand; few home owners are even growing enough of this delicious fruit for home use. The varieties we offer are those which have been thoroughly tested and found well adapted and desirable for planting in the territory we serve, selected to furnish fresh fruit from July to January. Unfortunately, blight has prevented more extensive Pear culture. This is now being overcome with the New Blight-Resistant Orient.

PEAR PRICES With the exception of NEW ORIENT

	1 to 10 Each	10 to 30 Each	30 to 50 Each	50 to 100 Each
4-6 ft.	\$2.00	\$1.75	\$1.60	\$1.20
3-4 ft.	1.60	1.40	1.20	.90
2-3 ft.	1.35	1.15	1.00	.75
6-7 ft. Jumbo Size.	2.75	2.45	2.25	1.75

NOTE: On quantities of 100 or more, write for Special Commercial Wholesale Prices

Kieffer offered in 7-8 ft. Bearing size at \$3.75 each in lots of 1 to 10; 10 or more, \$3.50 each

Bartlett

GARBER. Very large, greenish yellow with splashes of red. Somewhat coarser grain than the Bartlett, but one of the best of its season. September.

KIEFFER. Large, well known. Somewhat coarse grained, but one of the best canners, and possibly planted in more home orchards than any other pear. Easily grown, less subject to blight than many, strong grower, early and prolific bearer. Somewhat bell-shaped. Golden background, with a red blush. Recommended not only for the home orchard, but for the local market and roadside stands. Late September.

LE CONTE. Medium size, greenish background, red cheek. Somewhat resembles Kieffer, but ripens month later. Can be grown farther South than many varieties.

SECKEL. The famous little brown, rusty-colored sweet Pear, often referred to as Sugar Pear. Very sweet, fine grained; excellent quality. Ideal for pickling and canning whole, as well as enjoyed when served fresh from tree. Late September.

BARTLETT. Large, long, rich golden yellow, red cheek; thin skinned, buttery and melting, with rich, musky flavor; tree strong grower, bears young and abundantly. Extensively grown and well known. August.

BOSC. A new California Pear receiving national attention due to its late ripening and excellent keeping qualities, as well as its superior flavor and dessert qualities. Medium to large, with slender neck and attractive brownish yellow skin. Tree rather slow grower. 25c. per tree extra.

CLAPP'S FAVORITE. An old variety resembling Bartlett in shape, color and quality, but ripening a month earlier

NEW ORIENT BLIGHT-RESISTANT PEAR

Crossing Chinese and European Strains produces a blight-resistant Pear of good quality, adapted to areas where blight makes many varieties impossible. Large, vigorous trees bearing enormous crops. Fruit round, yellowish background with red blush, melting, juicy, mild, sub-acid flavor, creamy white flesh. Late August. Excellent

for canning. If troubled with Pear blight, we recommend New Orient.

We quote the following from the January, 1949 issue of Progressive Farmer: "The Orient Pear seems to be one of the very few almost entirely immune to blight. Its fruit—fresh or canned—is excellent. As it does not pollinate itself very well, plant one Kieffer for each four to six Orient."

	1 to 10—Each	10 to 30—Each	30 to 50—Each

Kieffer

Orient Pear

Everbearing Fig

FIGS (Not Recommended North of Virginia)

The Fig is a Southern fruit, grown only in the southern and eastern part of Virginia and in states farther South; not recommended for general planting north of Virginia. It is one of the earliest trees to bear, often producing fruit the first year after being transplanted. The Fig is too well known throughout the South to require a detailed description. However, there are a dozen or more varieties, the **Brown Turkey**, and **Everbearing** being the most popular at this time, other old ones having been displaced by Everbearing.

BROWN TURKEY. Large; dark brown skin covered with thick, blue bloom. Flesh red, very delicious flavor. An old popular, well-known variety.

EVERBEARING. A wonderful new Fig. Begins fruiting in July and continues until frost. Large, straw-colored, sweet, delicious, firm fruit. Frequently bears the first year planted. Considered the most hardy of the Figs, and by far the most popular. Most Everbearing are now being planted than all other varieties combined. Served fresh from the tree, preserved and canned.

FIG PRICES	1 to 10	10 to 30	30 to 50
	Each	Each	Each

2-3 ft.	1.40	1.25	1.10

Write for commercial prices on larger quantities.

RUSSIAN MULBERRY

Hardy, prolific, sweet fruit greatly relished by birds and poultry. Fruit growers find it profitable to plant Mulberries near their Cherry trees as birds prefer the Mulberries, sparing the Cherries. Many people enjoy fresh Mulberries from the tree; however, they are too sweet for those who prefer more acid fruits. Rapid grower and annual bearer.

	1 to 10	10 to 30	30 or more
	Each	Each	Each
6-8 ft.	\$2.50	\$2.25	\$2.00
4-6 ft.	1.75	1.50	1.25

ORIENTAL PERSIMMON

The culture of this delicious fruit has been somewhat curtailed because many who are not familiar with it have attempted to compare it with our native Persimmon. It is regarded by some as being a tropical fruit. While it will grow in more tropical climates, it can be grown in Virginia, along the coastline much farther north and generally throughout the South. Delicious fruit, averaging as large in size as our biggest Delicious Apples.

We offer the **Tane-Nashi**, a large red, almost seedless, ripening Autumn.

	1 to 10	10 to 30	30 to 50
	Each	Each	Each
4-6 ft.	\$2.75	\$2.45	\$2.25
3-4 ft.	2.25	2.00	1.75

ORANGE QUINCE

A very popular fruit which is seldom found on the market and is always in demand. Large, orange-shaped; fine, golden firm flesh of excellent quality. Best known of all Quinces.

Same sizes and prices as Oriental Persimmon.

PAW PAW

A fruit native to parts of Virginia. Somewhat resembles the Banana and is much relished by many. 2-3 ft. trees, \$1.75 each, \$15.00 per 10.

Paw Paw

Time required for trees and plants to begin fruiting after being transplanted may vary considerably, depending somewhat on the age and size of plant at time of transplanting, as well as the nature of the soil, care given, the season, and many other conditions. Even some varieties of a class will begin fruiting earlier than others. So the above table gives only approximate bearing ages under normal conditions.

GRAPES

**Delicious served fresh from the vine,
in jellies, jams and juices**

The city lot does not always afford ample room for all the tree fruits, but not even a lot is required to grow sufficient Grapes for family use. An arbor may be trained over the walkway to the garage, the vines may be trained on out-buildings, the fence, or even on a trellis, affording a screen. Our large assortment of varieties will furnish Grapes of different types, ripening throughout the season. The vines start bearing early—usually the second year after being planted, are generally annual bearers and easily grown.

Grapes may be divided into two groups—the bunch varieties, which are grown in all parts of the United States, and the Muscadine Cluster class, the culture of which is limited to the South, not being planted north of Virginia.

New Seedless Grapes

Among the fruits being improved on by hybridizing, overcoming objectionable features, is the Grape, in which seeds have been eliminated in two promising new hybrids—the Bronx Red Seedless and Concord Blue Seedless.

BRONX SEEDLESS

A Grand New Hybrid Red Grape. Enormous, attractive bunches as much as 12 inches in length. Berries large, entirely seedless, crisp and firm. May be eaten with skin, as California Grapes. Vine vigorous and productive. Especially recommended for Virginia and states farther South.

CONCORD SEEDLESS

Concord type, but slightly smaller. Blue. Possesses same flavor found in Concord Grape. Early bearer.

PRICES ON NEW SEEDLESS GRAPES

	1 to 5 Each	5 to 10 Each	10 to 30 Each	30 or more Each
2 year	\$1.25	\$1.10	\$1.00	\$0.90

GOLDEN MUSCAT

At last we have a new, hardy California Muscat type Grape which can be grown throughout the East and South, where the old Muscats are not hardy. The golden berries are large, form a compact bunch, and are very attractive. Quality the best, fruit being meaty with a Muscat aroma.

2 year: 1 to 5, \$1.25 each; 5 to 10, \$1.10 each; 10 to 30, \$1.00 each; 30 or more, 90c. each

Bronx
Seedless

Seedless Concord

Improved GRAPES

From this group of improved varieties a selection can be made to extend the fruiting season and to include Grapes of better quality.

CHAMPAGNE. Has made an especially good showing in our test vineyard, producing enormous sized bunches of large greenish white Grapes which have a delicious flavor and hang on the vines until late in the season. Excellent wine Grape. Prolific. Late.

CACO. A red wine Grape having a peculiar Grape flavor. Makes excellent wine and Grape juice. Also delicious to serve fresh from the vine. Berries large, sweet; prolific bearer. Caco is resistant to brown rot. Midseason.

LUCILE. Large red Grape of excellent quality; very sweet; prolific, early bearer. An excellent home variety, possibly a little tender for commercial purposes.

PORTLAND. New, early white Grape of Niagara type. Bunches and berries larger, maturing earlier. Vigorous grower.

FREDONIA

New, early Blue Grape of Concord type, ripening two weeks earlier. Rivals Concord as the leading commercial variety; also one of the most popular early, home vineyard Grapes. Sweet, firm bunches. Excellent shipper. Thick skin, resistant to brown rot and attacks by bees.

SHERIDAN. New, blue Grape of Concord type, ripens later, extending Concord season. Vines just as hardy, vigorous, and productive. Sweeter, richer in quality.

Red, White and Blue GRAPE COLLECTION

- 1 **Caco.** Large, sweet red. Midseason.
- 1 **Champagne.** Greenish white. Immense bunches. Sweet. Long keeper. Late.
- 1 **Fredonia.** New, early blue. Prolific. Excellent for table use or juices.

Southern MUSCADINES

The Famous Grape of the South. May be had in an assortment of named varieties ripening at different times. As some are not self-pollinating, the male, non-fruiting plants are frequently planted with fruiting vines to assure crops. However, new, fruiting, self-pollinating and cross-pollinating varieties are now available, eliminating the need of non-fruiting plants. We recommend planting self-pollinating **Tar-Heel** or the newer **Wallace** with Bronze Scuppernong, Hunt, or Thomas to assure full crops.

The Muscadines are hardy in southern and eastern part of Virginia and states farther South. Somewhat more difficult to transplant than bunch Grapes.

BRONZE SCUPPERNONG. Very large; bronze flesh. Pulpy, sweet, musky flavor. One of the oldest and best of the Muscadine family. September.

HUNT. Early, large, black berries; thin skin. Excellent flavor. Vigorous, prolific vine, regular bearer. One of the leading commercial Muscadines.

THOMAS. Reddish purple; pulp sweet, tender, pleasing flavor. Vigorous and prolific. An old standby.

GRAPE

**Delicious served fresh from the vine
in jellies, jams and juices**

The city lot does not always afford ample room for tree fruits, but not even a lot is required to grow Grapes for family use. An arbor may be trellised, a walkway to the garage, the vines may be trained over buildings, the fence, or even on a trellis, affording a large assortment of varieties will furnish different types, ripening throughout the season. Grapes start bearing early—usually the second year after planted, are generally annual bearers and produce large crops.

Grapes may be divided into two groups: the Vitis varieties, which are grown in all parts of the United States, and the Muscadine Cluster class, the culture of which is limited to the South, not being planted north of the Potomac River.

New Seedless

Among the fruits being improved on by the University of California, is the Grape, in which seeds have been bred out. The new hybrids—the Bronx Red Seedless and Concord Blue Seedless.

BRONX SEEDLESS

A Grand New Hybrid Red Grape. Enormous, attractive bunches as much as 12 inches in length. Berries large, entirely seedless, crisp and firm. May be eaten with skin, as California Grapes. Vine vigorous and productive. Especially recommended for Virginia and states farther South.

CONCORD SEEDLESS

Concord type, but slightly smaller. Blue. Possesses same flavor found in Concord Grape. Early bearer.

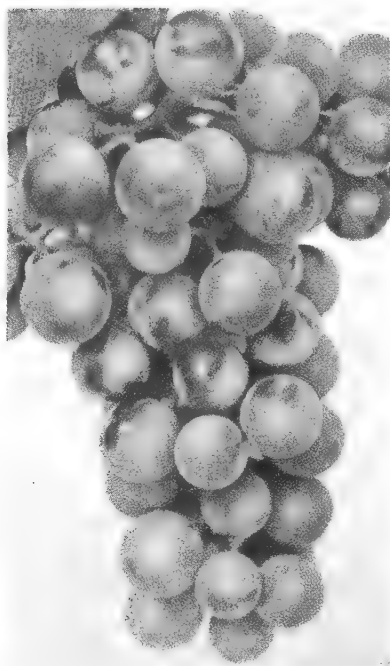

PRICES ON NEW SEEDLESS GRAPES

	1 to 5 Each	5 to 10 Each	10 to 30 Each	30 or more Each
2 year	\$1.25	\$1.10	\$1.00	\$0.90

GOLDEN MUSCAT

At last we have a new, hardy California Muscat type Grape which can be grown throughout the East and South, where the old Muscats are not hardy. The golden berries are large, form a compact bunch, and are very attractive. Quality the best, fruit being meaty with a Muscat aroma.

2 year: 1 to 5, \$1.25 each; 5 to 10, \$1.10 each; 10 to 30, \$1.00 each; 30 or more, 90c. each

Mail the coupon today with your remittance (at our risk) direct to the AMERICAN FRUIT GROWER, 1370 Ontario St., Cleveland 13, Ohio.

Improved GRAPES

From this group of improved varieties a selection can be made to extend the fruiting season and to include Grapes of better quality.

CHAMPAGNE. Has made an especially good showing in our test vineyard, producing enormous sized bunches of large greenish white Grapes which have a delicious flavor and hang on the vines until late in the season. Excellent wine Grape. Prolific. Late.

CACO. A red wine Grape having a peculiar Grape flavor. Makes excellent wine and Grape juice. Also delicious to serve fresh from the vine. Berries large, sweet; prolific bearer. Caco is resistant to brown rot. Midseason.

LUCILE. Large red Grape of excellent quality; very sweet; prolific, early bearer. An excellent home variety, possibly a little tender for commercial purposes.

PORTLAND. New, early white Grape of Niagara type. Bunches and berries larger, maturing earlier. Vigorous grower.

STANDARD GRAPES

Do not let the prices in this group lead you to believe that these Grapes are not good. This collection has been carefully selected from thoroughly tested commercial and home vineyard varieties, chosen not only as to quality, but to afford assorted colors ripening at different times.

- BRIGHTON.** An early, dark red. Medium size. Thin skin. Flesh tender, sweet and of best quality.
- CATAWBA.** A favorite, old-time, late red wine Grape. Rich, aromatic, wine flavor.
- CONCORD.** Most popular and extensively planted of all Grapes. Blue, large bunches. Medium size berries. Midseason. We advise planting along with Concord other varieties extending the season.
- DELAWARE.** Early red. Bunches and berries small; excellent flavor and desirable in the home vineyard.
- LUTIE.** Very sweet, attractive red Grape. Large, compact bunches. Thin skin, tender flesh. So sweet that it preserves itself on the vine, the juice condensing to syrup. Midseason.
- MOORE'S EARLY.** Large blue of Concord type, ripening two weeks earlier. Bunches slightly smaller. Good shipper, as well as popular home variety. Early bearer.
- WHITE NIAGARA.** An old favorite. The best known of the white Grapes. Serves as a standard among the whites as the Concord does among the blues. Berries and bunches large. Does not crack easily and hangs on the vine well after ripening. Midseason.
- WORDEN.** Large, black, early Grape of Concord type. Precedes Concord by ten days. Good quality.

Waynesboro BERRIES

Fill Your Frozen Food Locker With Berries

Modern Home Quick-Freeze Units and Public Frozen Food Locker Plants make possible fresh, frozen fruits and vegetables throughout the year. Naturally it behooves each home owner to fill his locker with home grown foods which always taste better. Berries have a high priority among frozen fruits. Plant not only for home use, but for an increasing commercial demand.

RASPBERRIES

There are two distinct classes of Raspberries—the **Blackcap** and the **Red**, the Blackcap being grown over a large part of the United States, while culture of the Red is more or less restricted to the colder part. Here in Virginia we grow both but sell more of the Blackcaps, among which **Cumberland** is the leader.

BLACKCAPS

CUMBERLAND. Outstanding among Blackcaps; standard commercial variety, as well as popular in the home garden; large, purplish black, prolific. Firm, good quality; most extensively grown Raspberry, succeeding over a wide area. Let your main crop of Blackcaps be Cumberland. Midseason.

Prices: \$1.45 per 6, \$2.10 per 12, \$3.30 per 25, \$5.70 per 50, \$9.90 per 100, \$21.40 per 250, \$34.50 per 500, \$60.00 per 1000.

Write for commercial prices on larger quantities.

NEW MORRISON BLACKCAP. See illustration and description below.

Standard RED RASPBERRIES

LATHAM. Brilliant red, mosaic resistant; good shipper as well as useful for canning. The most extensively planted Red Raspberry. Rates as high among Reds as the Cumberland does among Blackcaps.

SUNRISE. A new Red introduced by the United States Department of Agriculture. Very early with a long picking season making it ideal for the home garden. Hardy, flavor and quality the best. Especially adapted to the South, where not all Red Raspberries are successful. Useful in connection with other varieties, because of its early ripening.

Latham and Sunrise Prices: \$1.80 per 6, \$2.60 per 12, \$4.30 per 25, \$7.50 per 50, \$12.50 per 100, \$27.50 per 250, \$45.00 per 500, \$80.00 per 1000.

Write for commercial prices on larger quantities.

TWO-YEAR TRANSPLANTED RASPBERRY PLANTS
CUMBERLAND, BLACKCAP, LATHAM and SUNRISE RED
\$2.25 per 6, \$4.00 per 12, \$7.50 per 25.

New Morrison Blackcap

New Morrison

The Giant of the Blackcap Raspberry family; nearly an inch in diameter. High quality, not so seedy as other Blackcaps. Midseason, rapid grower, producing enormous crops often where others fail, adapted to a wide range of soils. Disease and drought resistant. Few days later than Cumberland.

\$1.80 per 6, \$2.60 per 12, \$4.30 per 25, \$7.50 per 50, \$12.50 per 100, \$27.50 per 250, \$45.00 per 500, \$80.00 per 1000.

BLACKBERRIES

ALFRED. New, early, large, sweet, prolific berry, almost seedless. Ripens several days ahead of the Eldorado and reported more prolific.

ELDORADO. Best known, most popular, hardiest, sweetest Blackberry. Large, black berries borne in clusters; practically coreless. Midseason.

Lucretia DEWBERRIES

Often referred to as a low growing Blackberry. There are several varieties of Dewberries—**Lucretia** is the most popular and satisfactory. Fruit large, often measuring 1½ inches in length. Sweet, highly flavored.

BLACKBERRY AND DEWBERRY PRICES

\$1.45 per 6, \$2.10 per 12, \$3.30 per 25, \$5.70 per 50, \$9.90 per 100, \$21.40 per 250, \$34.50 per 500, \$60.00 per 1000

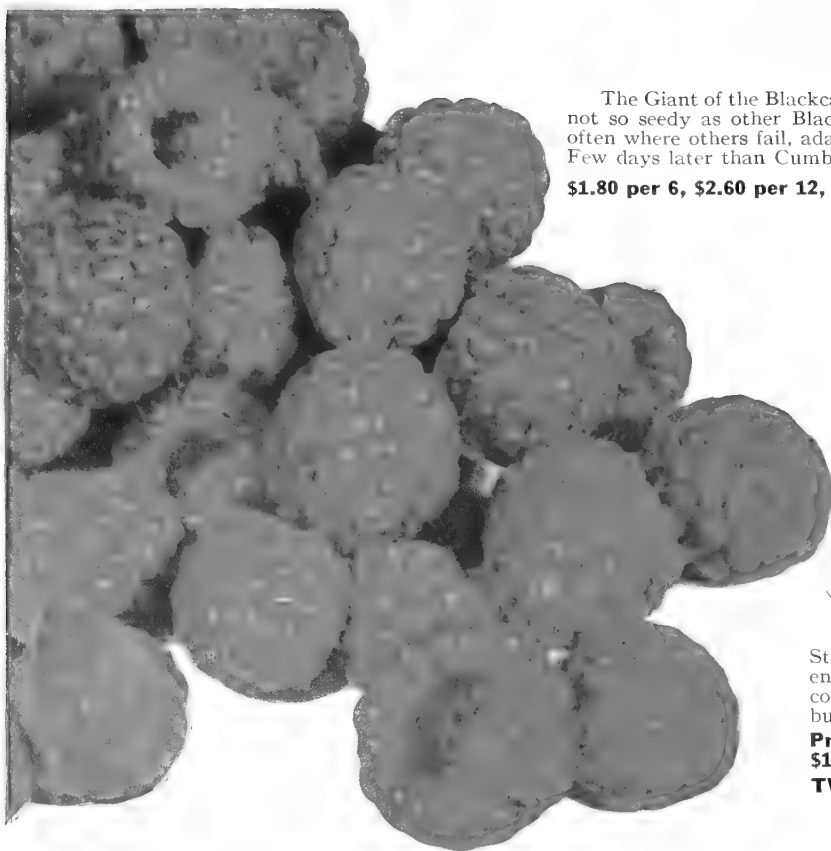

NEW EARLY RED EVERBEARING

INDIAN SUMMER

Best of all Everbearers. Introduced by New York Experiment Station and now being planted from Maine to Florida. Produces enormous crop in early Spring, repeating in the Fall. Large, conical, firm, excellent quality. Especially suited for home use, but also being planted commercially.

Prices: \$2.00 per 6, \$3.00 per 12, \$4.75 per 25, \$8.00 per 50, \$15.00 per 100, \$32.50 per 250, \$55.00 per 500, \$90.00 per 1000.

TWO-YEAR TRANSPLANTED. \$3.00 per 6, \$5.00 per 12.

Giant Cultivated BLUEBERRIES

Possibly no fruit has undergone greater improvement within the past twenty-five years than the Blueberry. Giant cultivated varieties offered are the result of cross breeding the native, wild Blueberries. The new hybrids grow in large clusters; are plump, tender and practically seedless. Plant this delicious fruit and enjoy fresh, frozen or canned Blueberries—and Blueberry Pie is hard to beat.

In addition to bearing a profitable crop, the Blueberry is an attractive ornamental shrub which may be planted on the lawn.

Require an acid humus soil. If your soil is deficient in humus and acidity, we recommend making a heavy application of peat moss, rotted sawdust, decayed leaves, or something of that nature, plus a 1 to 2 lb. application of Rho-Za-Grow, depending upon size of plants.

Five Leading Blueberries

Listed in Order of Ripening

CABOT. Plants seldom exceed 3 ft. in height and make a broad, low bush. Large berries with a delicious, sub-acid flavor.

RANCOCAS. Bush slender, vigorous, upright, rarely surpasses 5 ft. in height. Winter twigs dark red; berries somewhat larger than Rubel. Several days earlier.

CONCORD. Bush of upright habit and at maturity exceeds 6 ft. in height. Berries large, a few days earlier than Rubel; fine flavor and appearance.

RUBEL. Vigorous, productive, well-developed bushes stand 6 ft. in height. Winter color of young wood a rich red. Large berries of fine color usually ready to pick first week in July. Good commercial variety.

JERSEY. Bush vigorous and grows very large. Berries are the largest of any here listed; light blue, and ripen about same time as Rubel.

Thornless Boysenberries

**The NEW MONEY MAKER
THE SENSATIONAL NEW HYBRID FRUIT**

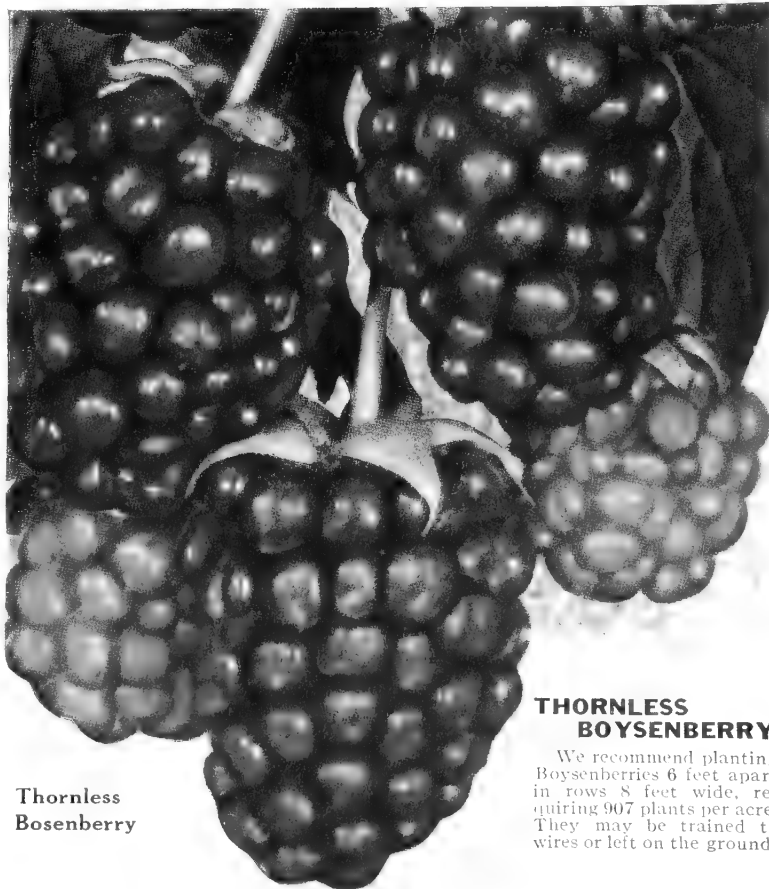

**Enormous Size, Excellent Quality, Vines Vigorous,
Thornless, and Prolific. Produces as Much
as Six Tons per Acre.**

**DELICIOUS SERVED FRESH, FROM THE FROZEN FOOD
LOCKER, CANNED, OR IN JAM**

Within the past few years wonders have been accomplished in cross breeding and selecting outstanding specimens of fruits. Among the greatest accomplishments in cross breeding is the Famous Thornless Boysenberry, often referred to as the Wonder Berry. Produced by crossing Raspberry, Blackberry and Loganberry; larger and sweeter than either. The ideal berry for freezing, retaining its natural flavor and sweetness. Sells for top prices on the market but a little soft for long shipments. Immense in size and when you taste it, you will agree that in flavor it stands supreme. Fruit measures as much as 2 inches in length. Commercially outsells all berries, but its greatest value is its qualities adapting it to home use. Delicious when served fresh, with sugar and cream. Wonderful for canning. Excellent for pies when fresh, canned, or frozen; makes good jam, which is quite conspicuous because of the absence of many of the seeds found in other berries as the Boysenberry is almost seedless. Color a pleasing purplish wine. July.

BOYSENBERRY PRICES:

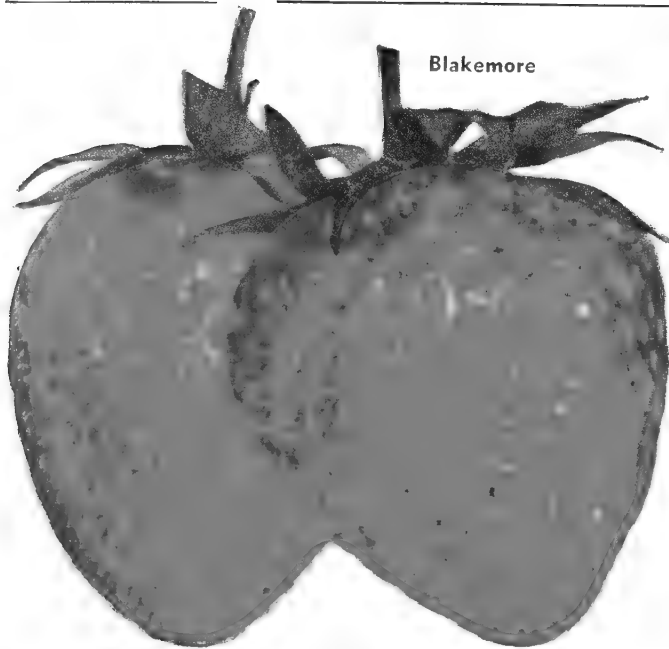

\$2.00 per 6	\$3.00 per 12	\$4.75 per 25
\$8.00 per 50	\$14.00 per 100	\$29.50 per 250
\$48.85 per 500		\$85.00 per 1000

Thornless
Boysenberry

THORNLESS BOYSENBERRY

We recommend planting Boysenberries 6 feet apart in rows 8 feet wide, requiring 907 plants per acre. They may be trained to wires or left on the ground.

Blakemore

Strawberries

A DELICIOUS FRUIT — EASILY GROWN

No fruit is found in more gardens than the Strawberry, which can be successfully grown in almost all soils and climates, requiring little attention other than keeping the beds free of weeds. It, however, responds to fertilization and culture. A lot of delicious fruit can be obtained from a very small section of your garden.

Strawberries may be had in assorted varieties. It is certainly advisable to have a selection furnishing berries throughout the season, but we do not recommend more than a sufficient number of varieties to cover the season and furnish proper pollination. From our list such a selection can be made—including two of the leading Everbearers to furnish fruit during the Fall, when berries are at a premium.

BE SURE TO PLANT FOR THE FROZEN FOOD LOCKER AND ENJOY FRESH STRAWBERRIES THROUGHOUT THE YEAR.

One's imagination can almost run wild in thinking about ways to serve this toothsome frozen fruit, for there will always be something special about serving Strawberries in January with all the garden goodness of June, whether you serve them as a plain fruit sauce in pies, short cakes or myriad other ways.

Spring planting recommended for Strawberries in climates having freezing and thawing. While we can furnish plants for both Fall and Spring planting, we have found by experience that on an average better results are obtained from Spring planting. We can usually start digging and shipping Strawberry plants in early November and continue until June, most Midwinter shipments going to points farther South.

Standard Spring-Fruiting Strawberries

EARLY

BLAKEMORE. The berry of the South, where more Blakemore are grown than all other Strawberries combined, producing year after year crops of early, bright red, firm, sweet berries. Both a good shipper and a popular home variety. The Blakemore can be grown in all parts of the United States where Strawberries are cultivated, but due to its hardiness, freedom from disease and dependability, producing crops under most unfavorable conditions, is the universal berry throughout the South. Excellent freezer.

PREMIER. One of the best known early commercial berries. Also popular for the home garden. Large, excellent quality, firm shipper, good freezer.

TENNESSEE SUPREME—See page 21.

\$5.85

LATE — AMBROSIA

Considered the largest and best of all late Strawberries. Being a recent introduction, it has not been widely planted. We fruited it for the first time in our nursery in the Spring of 1947. Severely damaged by a freeze on May 10th. Ambrosia produced a full crop of enormous, firm, sweet berries without rain from the time of bloom until harvested.

Apparently a sure cropper; in every respect a wonderful berry.

Ambrosia

STRAWBERRIES—Continued**MAJESTIC**

(U. S. Plant Patent No. 345)

A new, patented midseason Strawberry which originated in Virginia but its popularity has now spread throughout the East due to its enormous yield, having doubled that of most standard varieties in the various State Experiment Station tests. Extremely large, rich bright red; firm, and long distance shipper. If your space is limited, plant the Majestic and obtain the maximum yield; or if you are growing berries commercially, plant the Majestic and reap a really handsome profit. One of the few Strawberries ever to be honored with a United States patent, which it deserves.

Everbearing STRAWBERRIES

The Everbearing Strawberry does for Strawberries what the Hybrid Tea Rose does for Roses—extends the season from May until November. We offer two outstanding Everbearers, both of which will bear the first season.

Parcel Post Shipments of Strawberries

Our Strawberry Plants are sold f.o.b. our shipping point, but can often be shipped to the best advantage by Parcel Post. It is impossible to estimate in advance exactly what the postage will be, but if you would like your plants shipped by Parcel Post, advise and we will do so and you may remit whatever postage the package shows.

The Giant and King of All Everbearers—SUPERFECTION

We offer for the first time the brand new **Superfection**, which is all the name implies. Berries exceptionally large, roundish in shape, dark red all the way through, have zippy, sweet flavor. Firm texture, will withstand long-distance shipping without discoloration or softening. Grand freezer. Bears some fruit continuously from a short time after it is planted until the snow flies and heavy crops both Spring and Fall. Vigorous grower, producing new plants freely. As **Superfection** has all the marketing qualities, it is certain to become a leading commercial berry, as well as a favorite for the home garden.

*A barrel of fresh STRAWBERRIES and fun***A WHOLESOME HOBBY, TOPIC FOR CONVERSATION, AND SOURCE OF FRESH STRAWBERRIES FOR BREAKFAST**

Fifty plants can be grown in an ordinary barrel. Bore 40 1-inch holes in side of barrel, fill with good grade of top soil, place in back yard or some other convenient location, and set a plant in each hole on side of barrel; 10 plants can be planted on top. Keep well watered and be sure to bore a few small holes in bottom of barrel for drainage. No weeds, no cultivation necessary; keep runners pinched off. **We recommend planting 25 plants each Streamliner Everbearing and**

New Superfection—total 50 plants—\$4.15, postpaid
SEE PAGE 24G FOR MAKING A STRAWBERRY BARREL

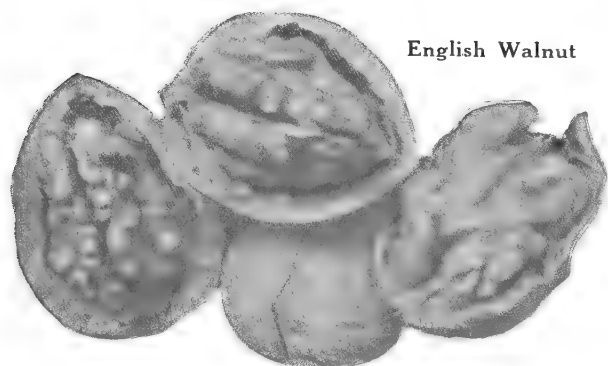

Following is a November, 1946 clipping from the Waynesboro News-Virginian, Waynesboro, Va.,

Heralds November by Picking Ripe, Luscious Strawberries Here

Picking fresh Strawberries in November is not at all uncommon in Waynesboro. In fact it's an accustomed thing at Waynesboro Nurseries, reports E. M. Quillen, president and general manager.

Bright and early this morning Mr. Quillen brought to the *News-Virginian* office a heaping quart basket of red, ripe, luscious, well-formed, well-filled Strawberries just picked at the nursery near Lyndhurst.

These are Streamliner everbearing berries; they yield from May through November. In fact, Mr. Quillen says he has often picked good ripe berries after snow has fallen. And now for some shortcake!

English Walnut

Waynesboro Easy-

FURNISHING SHADE AND PROFITABLE CROPS

At one time the wild, native Nuts in an assortment of varieties, could be harvested in almost all timbered sections of the East, but this is no longer possible. The American Sweet Chestnut was wiped out by the blight. The American Shellbark Hickory has been cut for wood and even the American Black Walnut, one of the most valuable timber trees—has been practically eliminated as a native tree. So if we are to enjoy nuts it is necessary to cultivate them just as we are now cultivating fruits and other farm crops.

Above English Walnut Tree is believed to be more than one hundred years old, seldom failing to produce an annual crop of several hundred pounds

ENGLISH WALNUT

A familiar nut in the stores, but it is not generally known that the English Walnut can be grown to perfection here in Virginia and other Eastern States. It could mean to the Middle Atlantic area what the Pecans mean to the deep South. Two trees on a farm here in the Shenandoah Valley have for the past 20 years more than paid taxes on the entire farm, besides supplying the family. English Walnut trees require no more space and care than Apples, begin bearing just as early.

	1 to 10 Each	10 to 30 Each	30 to 50 Each

3-4 ft.....	3.75	3.50	3.25

Chinquapin (*Castanea Pumila*)

A junior member of the Chestnut family. Makes a small, shrub-like tree maturing at 25 to 30 feet. Begins bearing early—often first year after transplanting. Delicious nuts $\frac{1}{2}$ inch in diameter are borne singly in Chestnut-like burs, ripening in September. Surely you have a place on the lawn, in the garden or orchard for some of these interesting, ornamental, as well as fruitful little trees. Just think of the fun the children can have harvesting Chinquapins.

NUT CULTURE PROMISING AS A COMMERCIAL CROP

We quote from the March, 1949 issue of *Home Horticulturist*, published in Chicago, Illinois, emphasizing Nut Culture for profit and as a hobby:

"It would seem that nut culture offers much promise as a commercial crop. In addition it is interesting and a much enjoyed hobby, furnishing food for the home."

Chinese BLIGHT RESISTANT CHESTNUT

LARGE, SWEET CHESTNUTS ARE AGAIN A REALITY

A number of years ago the blight destroyed our Native American Chestnuts. The U. S. Department of Agriculture—after many tests—introduced a type of Chinese Chestnut not only blight-resistant, but an early bearer of large, good quality nuts. Trees start bearing when very young, often in 2 to 5 years, and succeed anywhere the American Sweet Chestnut formerly grew; in fact, they are successful over a wider area and may be grown wherever Peaches thrive. We recommend a well-drained, sunny location. Plant the Chinese Chestnut for attractive home ground shade trees and also reap a harvest of delicious, sweet nuts.

to-Grow NUT TREES

PECANS

Profitable as a commercial crop in the warmer parts of Virginia and in states farther South. May be planted for desirable shade trees and home-grown nuts in areas bordering the commercial belt. After once established, the Pecan is a strong-growing, shapely, long-lived tree — ornamental as well as fruitful. From numerous improved varieties we attempt to offer only selected ones satisfactory in the territory we serve. Write for commercial growers' special prices on 50 or more.

Schley. Medium to large, thin shell. Kernel full, plump. Nutty, rich flavor. Good grower. Old favorite.

Stuart. Possibly the best known and most extensively planted of all Pecans because of its adaptability to a wide range of culture. Can be grown in the deep South and being early, it matures farther North than later varieties. Good size nuts with thin shell. As the Mayhan becomes better known, it is gaining rapidly on Stuart in popularity.

Prices on Schley and Stuart Pecans

	1 to 5	5 to 10	10 to 30	30 to 50
	Each	Each	Each	Each
3-4 ft.	\$3.25	\$3.00	\$2.75	\$2.50
4-5 ft.	4.00	3.75	3.50	3.00

Papershell. Nuts are long, slender, with thin shell; good quality. Well-shaped, fast growing tree. Good pollinator for other varieties. Large production of Papershell makes possible following low prices:

	1 to 5	5 to 10	10 to 30	30 to 50
	Each	Each	Each	Each
2-3 ft.	\$2.25	\$2.10	\$1.95	\$1.75

5-7 ft. Jumbo Size	4.25	4.00	3.75	...

Mayhan PECAN

New Giant Early-Bearer

An experiment station reports a yield doubling other varieties. Nuts of enormous size, thin shell, good quality, selling for higher

prices than old varieties. Trees frequently start bearing two or three years after being transplanted.

	1 to 5	5 to 10	10 to 30	30 to 50
	Each	Each	Each	Each
3-4 ft.	\$3.75	\$3.50	\$3.25	\$3.00
4-5 ft.	4.75	4.50	4.25	4.00

NOTE: We recommend wrapping the trunks of Pecan Trees with burlap or paper the first Summer after transplanted, to protect against sun scald.

BLACK WALNUT

Of course, every planter is familiar with the Native Black Walnut, but not all are aware of its possibilities. As a timber proposition, its culture is extremely profitable, especially when planted on pasture land, as the Black Walnut does not interfere with the grass, which thrives under the trees, and when established, the trees afford shade for livestock. Produces nuts which are now in great demand and grows into valuable timber. When planted for nut bearing, we recommend spacing 40x40 feet; for timber, 8x8 feet.

We offer root-pruned, transplanted trees as follows:

	1 to 10	10 to 30	30 to 50	50 or more
	Each	Each	Each	Each
2- 3 ft.	\$1.20	\$1.00	\$0.85	\$0.75
3- 4 ft.	1.75	1.60	1.45	1.30
4- 6 ft.	2.25	2.00	1.85	1.75
6- 8 ft.	3.00	2.75	2.60	2.45
8-10 ft.	3.75	3.50	3.35	3.20
1 year, 12-15 in.	\$2.50 per 10, \$18.00 per 100			

Thomas Improved

BLACK WALNUT

There is a variation in Walnuts as in fruits. Only by grafting or budding can a variety or special strain be reproduced absolutely true. Thomas is a selected strain of Black Walnut, with large kernel, thin shell and early bearing habits.

4-5 ft. \$3.50 each; 10 or more, \$3.25 each

Papershell Pecan

FILBERT (HAZELNUT)

In recent years much attention has been given this hardy valuable nut which grows into a small, shrub-like tree seldom attaining a height of more than 15 feet. We offer both the Native American and the much improved Barcelona European Filbert. Both are adapted to a wide range of soil and climate and are being cultivated in most parts of the United States.

Native American. Family favorite Filbert. Attractive bush, yielding abundant crops of tasty, round nuts; young bearer.

	1 to 5	5 to 10	10 to 30
	Each	Each	Each
2-3 ft.	\$1.75	\$1.65	\$1.50
3-4 ft., Bearing Size	2.50	2.30	2.10
4-5 ft., Bearing Size	3.50	3.25	3.00
5-6 ft., Bearing Size	4.50	4.25	4.00

Barcelona. Improved, large English Filbert. The most extensively planted commercial variety. We recommend planting with Native American for cross pollination.

	1 to 5	5 to 10	10 to 30
	Each	Each	Each
2-3 ft.	\$2.75	\$2.65	\$2.50

4-5 ft.	4.25	4.00	3.75

Filbert (Hazelnut)

Asparagus and Rhubarb

FOR YOUR EARLY SPRING GARDEN

Mary Washington Asparagus

NEW — PEDIGREED — RUST-RESISTANT

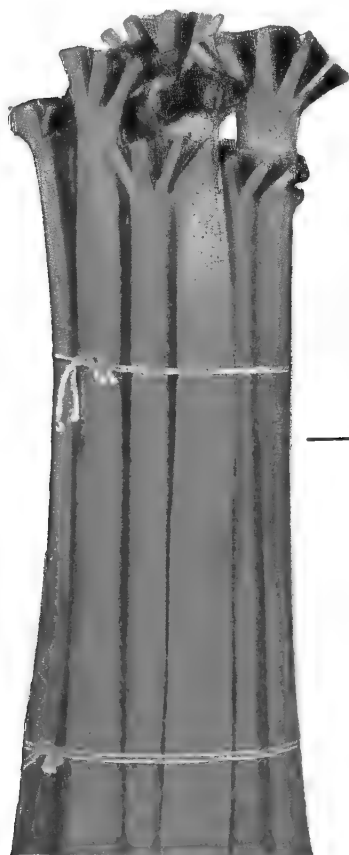

Easily grown, producing an enormous amount of wholesome food at small cost and effort. Readily in demand and a profitable commercial crop, its chief requirement being a deep, fertile soil.

We grow and offer exclusively the **New, Pedigreed Mary Washington**, which is resistant to rust; 100 plants will furnish your table with fresh Asparagus for 6 weeks in early Spring.

Cultural Instructions—For home garden culture, plant 6 inches deep, 12 inches apart in rows 3½ feet wide. Do not cover the crowns more than 2 inches at first, gradually filling in as they grow. If soil is not very fertile, we recommend a heavy application of manure or commercial fertilizer, repeating each year. In commercial plantings, the rows are sometimes 4 feet wide, so as to provide ample space for tractor cultivation.

Write for Prices on Larger Commercial Quantities

Giant Victoria Rhubarb

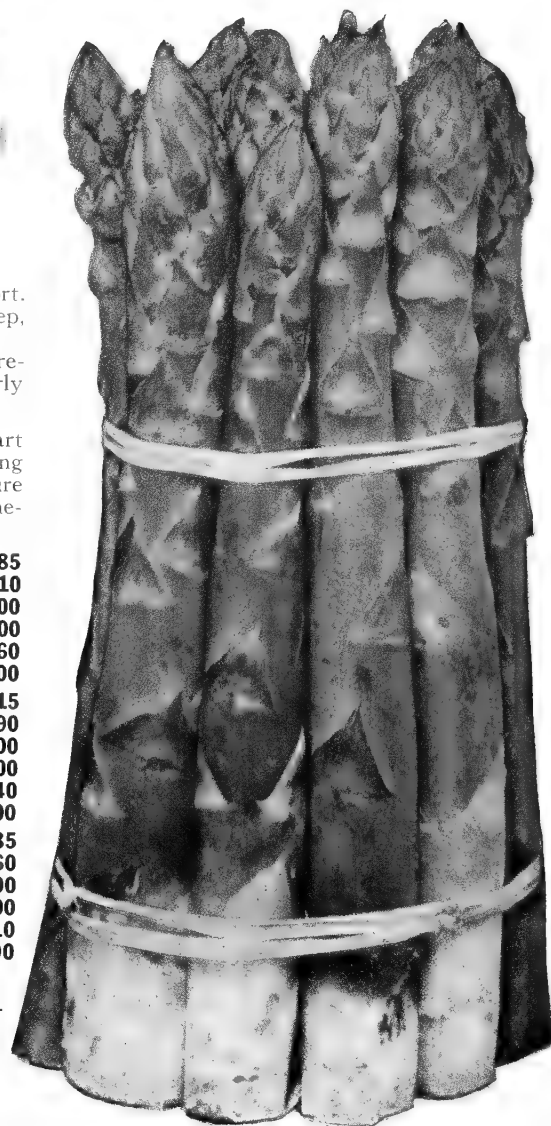

VICTORIA RHUBARB

It would be difficult to conceive of a garden vegetable offering more food value for the cost and effort than Rhubarb, which prefers a deep, fertile soil, but requires very little attention. Not even necessary to move or replant each year.

Produces delicious food in early Spring when garden vegetables are scarce. Also delicious canned or frozen.

We offer the **VICTORIA**, which has enormous, long stalks of cherry red color. Very tender. Varieties have been so greatly improved that Victoria can hardly be recognized as being derived from the old garden pie plant. Plant 3 to 4 feet apart in rows or beds.

2-YEAR ROOTS

New Pedigreed Washington Asparagus

HERBS AND GARDEN ROOTS

An attempt is made to preserve and reproduce the Colonial Flower Gardens containing rows of Boxwood and other famous old trees and plants. It is also desirable to keep up the Herb Garden, from which we can harvest Herbs for the seasoning of foods.

We offer the following popular old Garden Herbs:

CHIVES. Mild, Onion-like flavor. Used for soups and salads.

HORSERADISH. Well known, popular seasoning for meats and used as a relish. Grates fine and tender.

PEPPERMINT. Leaves and tender tops used for cooling drinks and for flavoring.

SAGE. An old time Herb which is still much in demand for seasoning meats.

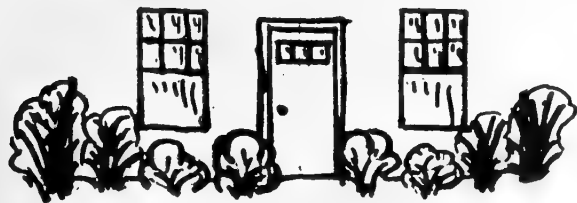

THYME. Seasoning plant and also a lovely ground cover frequently planted in the rock garden or perennial border.

WATERCRESS. Spicy leaves used for flavoring sandwiches and salads. Also affords one of the best Winter and early Spring cooking greens. Plant in small streams or pools.

Prices on above Herbs and Garden Roots: Each 30c. Per dozen \$3.00 Per 100 \$20.00

Waynesboro Ornamental Collections

Shrub Foundation Collection

COLLECTION 9-Q

Consisting of Flowering Shrubs suitable for a foundation planting around the average bungalow-type home:

- 2 **Abelia grandiflora**. For each side of entrance
- 2 **Spiraea vanhouttei**. For corners of house
- 2 **Regal Privet**. At side of Abelia grandiflora
- 2 **Spiraea thunbergi**. Next to Spiraea vanhouttei

All 8 Flowering Shrubs, selected so as to furnish bloom over a long period, 2-3 ft. Size, \$9.65, Express

Dwarf Polyanthus Everblooming Rose Collection

Ideal as a border or in a bed where plants not more than 18 inches in height are desired.

COLLECTION 9-R

- 1 **Golden Salmon**. Salmon-orange
 - 1 **Ideal**. Dark red
 - 1 **Katharina Zeimet**. Pure white
 - 1 **Orleans**. Favorite pink
- 4 Roses—3-year Blooming Size—\$3.65**

Spring-Flowering Tree Collection

COLLECTION 9-M

May be used as specimens or as a group.

- 1 **Eley's Redflowering Crab**
- 1 **Whiteflowering Peach**
- 1 **Redflowering Peach**
- 1 **Whiteflowering Dogwood**

All 4 Spring-flowering Trees in our 3 to 4 ft. size—\$8.35, Express

Pink and White Dogwood Collection

COLLECTION 9-N

No flowering tree is more admired and extensively planted than the Dogwood. The pinkflowering trees mingled with the white in group plantings produce a most pleasing effect. Used on the grounds of small homes, large estates, in parks, or even in roadside plantings.

Our Special Collection 9-N consists of 1 Pinkflowering and 2 Whiteflowering Dogwood in the 18 to 24 in. Size for \$5.45

Fast-Growing Shade Tree Collection

COLLECTION 9-P

Selected for those desiring quick shade and not in position to invest in larger, slow-growing varieties of trees.

- 1 **Popular Chinese Elm**
- 1 **Shapely Silver Maple**
- 1 **Well-known American Elm**

All 3 Trees in the 5 to 6 ft. Size—\$5.85, Express

COLLECTION 9-PP

One each of above trees—total 3 trees—in our 6 to 8 ft. Size—\$8.65, Express

PLANT FOODS AND SOIL CONDITIONERS

Contributing to VIGOROUS PLANTS AND TREES, BEAUTIFUL VELVETY LAWNS

GROW WITH PEP-to-GROW

FOR
LAWNS
TREES
BOXWOODS
SHRUBS
ROSES
PERENNIALS
BEDDING PLANTS
VEGETABLES

A specially prepared, balanced lawn and garden plant food which gives pep and vigor without danger of burning. We recommend an application in both Fall and Spring.

Apply **Pep-to-Grow** on your Lawn, Rose, and Perennial Beds at the rate of 4 lbs. per 100 square feet; on Shade Trees, Shrubs, Boxwoods and other Evergreens at the rate of 1 lb. per plant or more, depending on size. Keep a supply of **Pep-to-Grow** on hand at all times.

Pep-to-Grow excels in safe, gradual feeding, and lasting effects. 10-lb. bag \$1.00, 50-lb. bag \$3.00, 100-lb. bag \$5.50, 1 ton \$90.00

TRANSPLANTONE

Reg. U. S. Pat. Off.

A water soluble powder containing Vitamin B-1 and other parts of Vitamin B, plus certain hormones vital to plant and root growth.

Applied when transplanting vegetable plants, bedding plants, Roses, Shrubs, Evergreens and Trees, it greatly reduces transplanting losses and starts plants off with more vigor and vitality. One 3-oz. box—which makes 30 gallons solution for soaking roots or 2000 to 3000 gallons for watering, \$1.05, postpaid; 1-lb. can \$4.10, postpaid

RA-PID-GRO—See page 24F

This tested and proven soil conditioner and plant food has taken the guesswork out of the culture of acid-loving plants.

Rhododendrons, Azaleas, Camellias, Kalmias, Hollies, Hemlocks, Dogwoods, and other acid-soil plants are sometimes believed to be difficult to grow, merely because of the lack of soil acidity. **Rho-Za-Grow** has revolutionized and simplified the culture of such plants—making their growth possible in soils originally unsuited.

Rho-Za-Grow is a scientifically balanced soil conditioner and plant food. Use it on all plants requiring sour soils. **Rho-Za-Grow** contains exactly the proper balance of acids, neutral plant food, and humus. It sours and lightens the soil, and it has high plant food content. Apply it to your Rhododendrons, Azaleas, Kalmias, Camellias, etc., and they will show their appreciation with a wealth of gorgeous blooms and healthy, deep green foliage.

10-lb. bag, \$1.25; 25-lb. bag, \$2.50; 50-lb. bag, \$4.00; 100-lb. bag, \$7.00

PEAT MOSS

Start your plants right by using a liberal application of Horticultural Peat Moss about the roots in transplanting. Also useful in mulching after planting has been done.

Standard Commercial Bales

18x20x39 in., burlapped, wired, \$7.00 each.

Home Garden Bales, 18x14x30 in., \$4.75 each; 3-bus. bag, \$3.00 each; 1-bus. bag, \$1.25 each.

BONE MEAL

Not a complete fertilizer, but a safe, long-lasting plant food. It is possible to injure plants with an overdose of some of the plant foods with a high analysis, while a double application of Bonemeal may be safely used. This long-lasting plant food is especially popular for Roses, Perennials and other delicate ornamental plants subject to injury by high-analysis fertilizers.

10 lbs. \$1.25, 25 lbs. \$2.50, 50 lbs. \$4.50, 100 lbs. \$8.00

Extensively advertised complete plant food. Contains the essential plant food elements in proper proportions for lawn grasses, most ornamental trees and plants, also vegetable gardens. Clean, odorless, and easily applied. Manufacturer recommends 4 lbs. per 100 square feet for average lawn and garden requirements, applying in Spring, early Summer or late Fall.

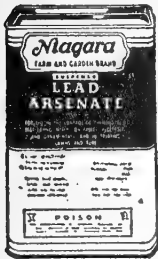

25-lb. bag \$1.60, 100-lb. bag, \$4.25; \$82.50 per ton

Note—Freight prepaid on lots of 300 lbs. or more

Waynesboro INSECTICIDES, FUNGICIDES, Etc.

For the convenience of our customers we have carefully selected some of the most practical sprays and dusts, including the newer and more effective materials, which we carry in stock for immediate shipment. Prices quoted are F.O.B. our shipping point unless offered postpaid. If postpaid shipment is desired on F.O.B. items, we will gladly ship that way and you may refund the amount of postage found on the package.

ARSENATE OF LEAD

Effective poison for leaf-eating insects. Use 1 to 2 lbs. to 50 gallons water (one level tablespoon to gallon) for general spraying. 1 lb. 60c., 4 lbs. \$1.75.

BLACK LEAF 40

Well-known, popular Nicotine Spray. Kills insects by contact and fumes. Contains 40% nicotine. For spraying fruits, vegetables, flowers; delousing chickens; dipping and drenching certain animals.

Use one teaspoon Black Leaf 40 with one ounce soap flakes to one gallon water for average ornamental and garden spraying. For complete spraying instructions, see leaflet spray chart. 1-oz. bottle 45c., 5-oz. bottle \$1.30, 1-lb. bottle \$3.25.

BORDEAUX MIXTURE

Best-known and most extensively used fungicide. Controls mildew and blackspot on Roses and Cherries, Apple Scab, Brown Rot on Grapes, and numerous other fungous diseases. May be used as a dust or spray. 1 lb. makes 6 1/4 gallons liquid spray (three level tablespoons make one gallon). 1 lb. 45c., 4 lbs. \$1.20.

Chaperone Dog Repellent . . See page 29

COPODUST

A copper fungicide for use in the control of early and late blight on Tomatoes, Potatoes, Celery, and certain other vegetables having hardy foliage. 1 lb. 45c., 5 lbs. \$1.20.

DRY LIME-SULPHUR

A dormant and Summer spray. Full strength of lime and sulphur in chemical combination. Convenient material for effective control of San Jose Scale, Apple Scab, Pear Scab, Peach Leaf Curl, Cherry Leaf Spot, Brown Rot on Grapes. Easy to mix. 1 lb. 50c., 5 lbs. \$2.00.

ENDOPEST

A three-way dust—controls chewing and sucking insects, as well as fungous diseases. Comes in an exclusive dust gun, ready for action. Easy and simple to apply. Gun and 10-oz. dust contents, 98c. postpaid. Refill cartridges, 75c. each.

EVER GREEN GARDEN SPRAY

Protects your flowers and vegetables. Safe to use on vegetables, as it is non-poisonous, yet it readily kills Aphids, Cut-worms, Cabbage Worms, Rose-leaf Rollers, Bean Beetles, Leaf Hoppers and numerous other garden pests. One ounce makes six gallons spray material. 6 ozs. \$1.15, 1 pint \$2.45.

POMO-GREEN WITH NICOTINE

Especially recommended for Roses. See page 42.

FRUIT AND VEGETABLE SPRAY

Contains 50% DDT. A wettable powder for use in control of Flea Beetles, Potato Beetles, Leaf Hoppers on Potatoes, insects of various kinds on vegetables and Codling Moth on Apples and Pears. Use 1/2 to 1 lb. in 50 gallons of water (1 to 2 level tablespoons to gallon). 1 lb. 75c., 3 lbs. \$1.85.

FRUIT TREE DUST or SPRAY

Contains Kolo-Sulphur Plus DDT and Basic Lead Arsenate

Ideal for the home orchard. An insecticide and fungicide for complete insect and disease control after the dormant stage. Can be used with safety on Apples, Peaches, Pears, Plums, Prunes and certain ornamentals. Wets immediately when placed in water and gives a uniform deposit on foliage. Excellent for use as a dust or spray in the control of Codling Moth, Curculio, Peach Twig Borer and for such fungous diseases as Apple Scab, Powdery Mildew, Pear Scab, Peach Scab and Brown Rot of stone fruits. 1 lb. makes 8 1/3 gallons spray material. 1 lb. 60c., 3 lbs. \$1.50.

ROTENONE DUST

Non-poisonous to human beings, but kills leaf eating insects on shrubs, trees and plants. Especially effective for Bean Beetles. 1 lb. 50c., 4 lbs. \$1.75.

PARADOW

Kills Peach Tree Borers, when applied in a circle around the trunk of the tree in September or October. Also kills Pin Borers and other tree borers at other seasons of the year when applied in linseed oil. For control of Peach Tree Borers, applied in crystal form at the rate of 1 ounce per tree on trees six years or older, smaller quantities on younger trees. 1 to 5 lbs., 40c. per lb.; 5 to 10 lbs., 35c. per lb.; 10 to 25 lbs., 30c. per lb. Write for prices on larger quantities.

SUNOCO OIL

Kills Red Spider, which is the most common enemy of Evergreens. Also kills San Jose Scale, Rose Scale, Oyster-shell Scale, Pineleaf Scale and Euonymus Scale. 1 gallon makes 25 gallons dormant spray or 100 gallons Summer spray. 1-gallon can, \$1.50; 4 gallons, \$1.25 per gallon; 55-gallon drum, 85c. per gallon.

Tri-Ogen Rose Spray See page 42

WEEDICIDE

(Concentrated Form of 2,4-D)

Recommended for general farm and orchard use. Comes in powder form, easily dissolved and applied with hand or power sprayer at the rate of 200 gallons per acre. One application generally kills Canada Thistle, Dodder, Dandelion, Fennel, Honeysuckle, Morning-glory, Onion (Wild), Poison Ivy, Plantain, Ragweed, Stinging Nettle and many other weeds. Apply on warm, sunny days. In concentrated form—

4 oz. makes 20 gals. Spray Material.....	\$2.25 postpaid
8 oz. makes 40 gals. Spray Material.....	3.85 postpaid
1 lb. makes 80 gals. Spray Material.....	6.60 postpaid
5 lbs. makes 400 gals. Spray Material.....	\$6.00 per lb.
10 lbs. makes 800 gals. Spray Material.....	5.50 per lb.
50 lb. drum, makes 4000 gals. Spray Material.....	5.00 per lb.

WEEDONE

Liquid form of 2,4-D Weed Killer mixable with water. Nationally advertised for killing most garden and lawn weeds, including Dandelion, Plantain, Poison Ivy, Morning-glory, Thistle and Wild Garlic. Use one part Weedone in 100 parts water applying a gallon of spray to each 200 square feet of weeds. 6 oz. 75c., 1 qt. \$2.50, 1 gal. \$6.50.

GARDEN TOOLS AND SUPPLIES

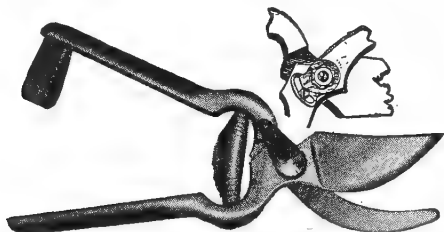

PRUNING SHEARS

No. 2-A

Handy, medium-sized garden and orchard Pruning Shears. Would normally sell for \$3.00—now being offered at \$1.89.

Professional Pruner

No. 124

Made of the finest drop-forged steel. Keen, honed edged blades. Adjustable ratchet nut lock and bolt support insure blade alignment at all times. Non-pinching, hollowed handles provide comfortable grip. We use this Pruner almost exclusively for heavy nursery work. Also popular with commercial fruit growers, landscape men and gardeners who require a long-wearing, smooth-working pruner. Length overall, 8 inches. Price, \$3.65 postpaid.

GARDEN, ORCHARD AND LIVESTOCK POCKET KNIFE

Three blades of best cutlery steel; 3/4 inch embossed stainless steel handle. Normally retails for \$2.00, but being a government war surplus commodity, we are now able to offer it for \$1.10 postpaid.

RA-PID-GRO

PLANT FOOD

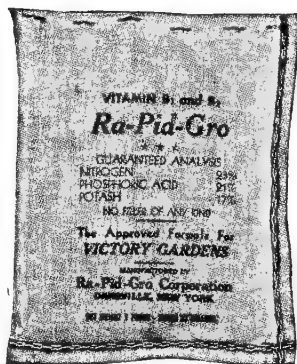

The Sensational New Liquid Plant Food

A clean, odorless powder instantly soluble in water.

Nursery stock that is dipped in a solution of **Ra-Pid-Gro** starts quicker, grows faster.

Enjoy your lawn, garden and flowers at their best—feed **Ra-Pid-Gro**. Easy to apply and economical to use as in larger quantities the cost is only about 1/2c. per pound for a rich, liquid plant food, while a general fertilizer costs much more. Every pound of **Ra-Pid-Gro** makes 22 gallons of liquid plant food. There is no filler in **Ra-Pid-Gro**.

Use **Ra-Pid-Gro** on everything you grow. To estimate your season's requirements, figure at the rate of 1 lb. **Ra-Pid-Gro** for each 100 lbs. other fertilizer you have been using. Normally, 10 lbs. **Ra-Pid-Gro** will take care of the lawn, shrubs and trees on a lot 50 ft. by 150 ft. Directions for use given on every package. 1 lb. for \$1.25, 2 lbs. for \$2.35, 5 lbs. for \$4.50, 10 lbs. for \$8.75

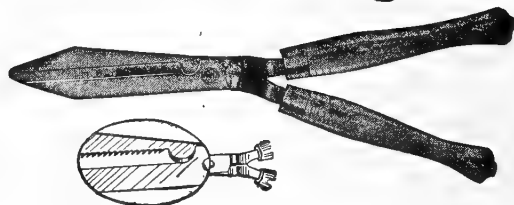

GAT SPRAY NOZZLE—For spraying Ra-Pid-Gro on lawns and large areas. It automatically measures out the right amount of Ra-Pid-Gro. However, you do not need this nozzle for ordinary garden use. Price—\$2.00 each, postpaid.

NOTE:

DUE TO CHANGING CONDITIONS, PRICES ON GARDEN SUPPLIES ARE SUBJECT TO REVISION

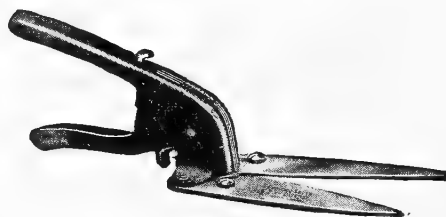

Seymour Smith Hedge Shears

No. 154-N-8

Finest cutlery steel, flame-hardened edge 8-inch blades—long bevels and thin, keen edges. Top blade has sharp, hooked teeth to grip twigs for easy cutting. Both blades hardened, tempered, precision hollow ground and beautifully polished. Hardwood handles with satin-smooth finish. High lift handles above hedge provide ample clearance protecting operator's hands from scratches. Outstanding hedge shears. \$3.75 each.

Seymour Smith Grass Shears

IMPROVED EZY-CUT

No. 157

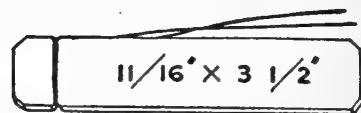

A handsome, highly efficient tool. Cuts clean the full length of the blades. Tempered cutlery steel blades with rust-resisting finish. Easy, non-tiring, non-pinching, "squeeze-grip" action. \$2.00 each.

Swing Label Marker

Model No. 240-E

Identify named varieties of plants by using our Swing Label Marker. 24-inch Green Enamelled Stake, Aluminum Label. May also be used as supports to hold plants erect. \$2.00 per doz., 25 for \$3.75, 50 or more, 14c. each.

Wood Labels

COPPER WIRED

For trees, shrubs, Dahlias and similar plants. 85c. per 100, \$6.00 per 1000.

Rainproof Pencil

For Labeling Both Metal and Wood Labels

20c. each, when sold with above labels—separately, 25c.

FLOWER PICKER

Cuts Flower and Holds It

No. 711

Saves hands from scratches and thorns. Cuts stems clean—better for the plants than hand picking. Useful for the flower gardener. Price, \$1.60 postpaid.

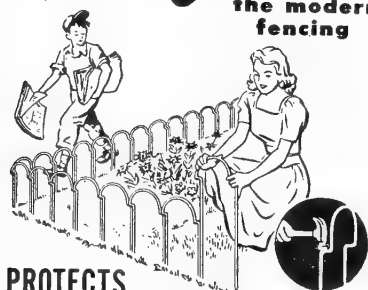

Miscellaneous Supplies

BE SURE WITH SOIL TEST KIT

Test for nitrogen, phosphorus, potash and acidity. Make sure of your soil requirements before applying fertilizers or a soil conditioner. Takes guesswork out of fertilizing and soil conditioning. 20-test kit—ample for average home and small farm—\$2.65 postpaid.

stikit wicket
REG. U.S. PAT. OFF. the modern fencing

PROTECTS AND BEAUTIFIES

\$2.40
THE DOZEN

In cartons of two dozen
(makes 24 feet of fence)

Useful for protecting Evergreens against dogs.
Single dozen, \$3.00, 30c. each.

Easy to hammer
into hard ground

21" High, 12" Wide,
1/4" steel enameled green

GARDEN MAGIC

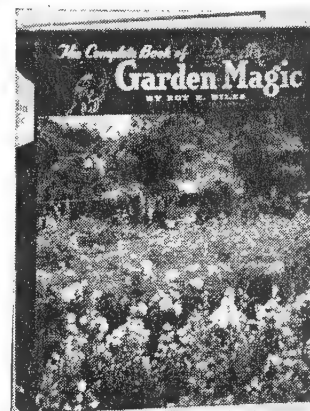

A Complete Book of Gardening

Made up of 320 pages—17 full color illustrations, hundreds of line drawings—practical, helpful ideas in what should be done and how to do it. Deals with the following important garden subjects:

Acid-loving Plants	Planting, Transplanting
Planning	Pruning
Soil Fertility	Coniferous Evergreens
Lawns and Grading	Hedges
Trees and Shrubs	Vines
The Flower Garden	The Vegetable Garden
Roses	Fruits and Berries
Bulbs, Corms, Tubers	Plant Diseases
The Rock Garden	The Garden Calendar
The Water Garden	Flower Arrangement

Also Numerous Other Related Garden Topics

Price: \$3.50 postpaid

Acme Grafting Compound

Effective, practical Grafting Compound, more easily applied than grafting wax and can be used more successfully as it completely covers the graft and union. May be applied with an ordinary small paint brush. We have been using this Grafting Compound for many years in our Nurseries, as well as we supply large quantities to commercial fruit growers for use in bridge grafting, protecting tree wounds and other tree injuries.

1-qt. can, \$1.00; 1-gal. can, \$3.25;
one case (four 1-gal. cans) \$12.00.

MOLOGEN

(Trade Mark)

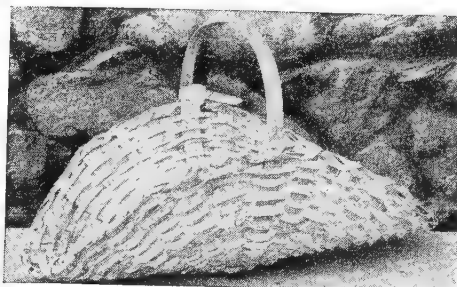

MOLE KILLER

KILLS MOLES

EASY—QUICK

SAFE TO USE

Mologen is an odorless chemical powder that means sure, quick death for moles. Non-poisonous to birds and pets.
8-oz. can, 60c. postpaid; 1 1/2 lbs., \$1.45, postpaid

Virginia Mountaincraft Flower Baskets

White oak split baskets hand made by the mountain people of the Blue Ridge area. Natural oak finish. Attractive, durable, and useful for bringing in cut flowers from the garden, holding magazines, etc.

12 in. size \$1.20 each
18 in. size 1.75 each
22 in. size 2.50 each

How to Make A Strawberry Barrel

Requires little space and care—no weeding, no cultivating. After it is once planted the only attention it needs is watering and fertilizing. Follow these simple instructions for preparing the barrel and planting the Strawberries. See page 21 for Strawberry Barrel Plant Offer.

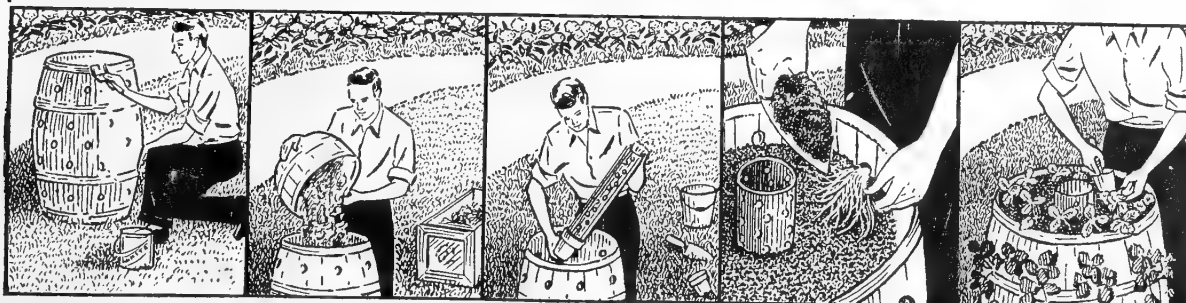

1—Drill five rows of eight holes each around the barrel.

2—To provide good drainage, fill three inches of the bottom of the barrel with cinders, small stones or gravel.

3—Fit one length of perforated pipe into the top of a flower pot, as shown below, or place end of pipe on gravel or cinders. Then set upright in center of barrel as a watering tube.

4—Fill in a good grade of garden soil until it is level with bottom row of holes. Push plants through holes inside of barrel until crowns of plants barely touch soil. Then add soil up to next row of holes, repeating until barrel is filled.

5—Set 10 plants in top of barrel, as shown. Soak thoroughly with water, plus a liquid fertilizer, such as Ra-Pid-Gro.

Japanese Green Cane Stakes

2 1/2 feet in height

Ideal for staking perennials, annuals, and other garden plant material. Light and durable.

Can be used from year to year.
25 stakes for \$1.00
50 for 1.75
100 for 3.25

SPRAYERS and DUSTERS

Effective control of insects and fungus depends not only on suitable spray materials and dusts, but also on spraying and dusting equipment. We offer two handy sprayers and a duster for the home garden. If a sprayer or duster of more capacity is required and you will give us some idea of the amount of spraying or dusting to be done, we will make a recommendation for your requirements.

Hudson Leader Sprayer No. 292G

Three and one-half gallon, electrically, seam-welded, galvanized tank. Convenient funnel top. Easy stroke pump developing 75-lb. pressure. Oil and chemical-resistant, 24-inch, high pressure spray hose. All-brass spray control, quick-acting valve. Easily, comfortably operated. 22-inch brass extension.

Each sprayer tested and fully guaranteed

\$9.85

Hudson Admiral Duster No. 766A

Ruggedly built of the finest materials throughout. Easily filled and used, holding over a quart of powder. Long extension tube makes it easy to reach high or low places. Not only adapted to garden dusting, but ideal for household and poultry-house use, barns, hotels, restaurants and the application of powdered weed killer.

HAVE A BEAUTIFUL LAWN

By properly grading, carefully preparing soil containing organic material such as Peat Moss, and feeding with Pep-To-Grow, Vigoro, or some other special lawn fertilizer—and most important of all, use a suitable Lawn Grass Seed Mixture, as offered below.

LAWN GRASSES

The quality of your lawn will depend much on the seed you use. No one mixture is suited to all soils, climates and altitudes. Neither will any one grass furnish a velvety green lawn throughout the year. With these facts in mind, we have carefully selected and blended mixtures so as to afford a beautiful lawn as much of the year as possible—taking into consideration the nature of the soil, the climate and shade. So we not only offer Grass Seed but Properly Blended Mixtures which have been carefully tested. For an open lawn on loam or clay soil the Waynesboro Evergreen Lawn Mixture is suited, while the Shady Lawn Mixture is recommended for similar soil having fifty percent or more shade. For sandy soils and in other soils where a lower priced seed will meet the requirements, our Virginia Home and Park Mixture will be found most satisfactory.

WAYNESBORO EVERGREEN LAWN MIXTURE. A scientifically prepared Grass Seed Mixture which produces a beautiful sod in a few weeks and is green throughout the year. Extensively used for small home grounds, as well as public parks, college campuses, large estates, and wherever a beautiful, permanent sod is desired. The extensive demand for this mixture enables us to offer it for even less than frequently charged for common mixtures. 1 to 10 lbs., \$1.20 per lb.; 10 to 50 lbs., \$1.10 per lb.; 50 lbs. or more, \$1.00 per lb.

VIRGINIA HOME AND PARK MIXTURE. A high quality blend of quick growing and permanent grasses selected so as to furnish a velvety green lawn within a few weeks after seeding and enough of the slower-growing varieties to make a permanent sod. Offered at a close competitive price. 1 to 10 lbs., 75c. per lb.; 10 to 50 lbs., 70c. per lb.; 50 lbs. or more 65c. per lb.

SHADY LAWN MIXTURE. Produces a good sod in shady places. 1 to 10 lbs. \$1.50 per lb.; 10 to 50 lbs., \$1.40 per lb.; 50 lbs. or more, \$1.30 per lb. **Note:** The old rule for seeding lawns is to use 1 lb. Grass Seed to each 150 to 200 square feet. We have found that our high-grade Grass Seed Mixtures afford excellent stands seeded 1 lb. to each 200 to 250 square feet.

GROUND COVER PLANTS

Represent a class of plant material selected to cover and hold banks too steep for mowing and for covering barren spots too shady for lawn grass.

EVERGREEN BITTERSWEET (*Euonymus radicans*). Dense, small evergreen foliage. Does well in sun or shade. 4 yr., \$1.50 each.

GERMANDER (*Teucrium chamaedrys*). Low, shrublike plant sometimes listed as a perennial. Used as a ground and bank cover and in the rock garden. Rosy purple flowers. Bluish tinged evergreen foliage. 2 yr. plants, 60c. each, \$6.00 per doz.; 4 yr. plants, \$1.00 each, \$10.00 per doz.

HONEYSUCKLE, HALL'S (*Lonicera japonica halliana*). White and yellow, fragrant flowers produced in abundance in early Spring and occasionally throughout the Summer. Used chiefly for holding steep banks, as a ground cover in shady locations, and may also be used as a climber. Bedding size, 25c. each, \$2.50 per doz., \$15.00 per 100; 3 yr., 50c. each, \$5.00 per doz., \$35.00 per 100.

MAX GRAF ROSE. Handsome almost evergreen foliage. Fine for covering exposed banks. Apple blossom pink flowers in June. 2 yr., \$1.20 each, \$12.00 per doz.

PACHYSANDRA *terminalis* (Spurge). One of the best ground covering plants, particularly valuable in shade, averaging 6 to 8 in. in height and branching freely into a dense mat. Its thick foliage is practically evergreen. 2 yr., 35c. each, \$3.50 per doz., \$25.00 per 100.

PURPLE WINTERCREEPER (*Euonymus coloratus*). Evergreen; excellent ground cover for shady locations. The long, narrow leaves are rosy purple underneath and veins penciled in gray. 4 yr. clumps, \$1.50 each, \$15.00 per doz.

VINCA minor (Periwinkle). Old favorite trailing plant; blue flowers, dark green leaves. Used as a ground cover under trees where grass fails, on steep banks, and as a border for garden paths. Bedding size plants, \$2.50 per doz., \$15.00 per 100; clumps, 50c. each, \$5.00 per doz., \$35.00 per 100.

VINCA minor alba (Periwinkle). A desirable white-flowered form. Clumps, 75c. each, \$7.50 per doz.

VINCA minor rosea (Periwinkle). New pink flowering variety. Clumps, 75c. each, \$7.50 per doz.

CLIMBING VINES—See page 44.

A Velvety Green Lawn Bordered with Flowering Shrubs and Trees. See Page 24H for Lawn Grass Seeds and Supplies.

Ornamental and Landscape Department

MAY BE USED to INCREASE the VALUE of YOUR PROPERTY, AS WELL AS CREATE BEAUTY and BRING SATISFACTION

At one time an ornamental planting was by some considered a luxury, but is now generally recognized as an investment and just as important as interior decoration of the home. Plans for civilian housing projects — both federal and privately financed — provide for suitable planting before homes are offered for sale. It enhances the sales value and attracts a better class of home owners.

Planting not only increases real estate value but adds comfort and satisfaction. New homes are made more beautiful and home-like. Old ones are modernized with newer and better varieties carefully arranged in keeping with modern design and the architecture of the home.

Flowering SHRUBS

Beautify Your Home at Low Cost

This important class of plant material has many uses in modern planting. We can hardly conceive a garden without a shrub border, some specimens, and possibly the low growing types used in the foundation planting. Improvements in varieties have extended the blooming season as well as afforded a more beautiful combination of colors. Shrubs, as a rule, are inexpensive, easily transplanted and grown. We offer the following collection of choice varieties:

ALMOND, FLOWERING (*Prunus japonica florepleno*). Dwarf shrub. Double pink flowers appear in Spring in masses, covering the plant. 18-24 in. \$1.00 each, 2-3 ft. \$1.50 each.

ALTHAEA—ROSE-OF-SHARON (*Hibiscus syriacus*). An old-time flowering shrub not only found in old gardens, but worthy of a place in the modern planting. Furnishes Hollyhock-like flowers from Midsummer until late Fall, when few shrubs are in bloom. We offer the following colors: Lavender, Pink, Purple, Red and White. 2-3 ft. \$1.00 each, \$10.00 per doz.; 3-4 ft. \$1.50 each, \$15.00 per doz.; 4-5 ft. \$2.00 each, \$20.00 per doz.; 5-6 ft. \$3.00 each, \$30.00 per doz.

BARBERRY, REDLEAVED (*Berberis atropurpurea*). A sport of the well-known Barberry thunbergi, differing by having bright red foliage, corresponding to the Red-leaved Maple. Yellow blossoms followed by red berries in the Fall, which hang on well into Winter. Grows 4 to 5 ft. Plant in full sunlight. 2 yr., 12-15 in., 60c. each, 6.00 per doz.; 3 yr., 15-18 in., 75c. each, 7.50 per doz.; 4 yr., heavy, 18-24 in., 90c. each, 9.00 per doz.

BARBERRY thunbergi (*Berberis thunbergi*). Too well known to require a detailed description as this popular shrub is found in almost every planting. Used as specimens, borders and hedges. 2 yr., 12-15 in., 35c. each, \$3.50 per doz., \$23.00 per 100; 3 yr., 15-18 in. transplanted, heavily branched 50c. each, \$5.00 per doz., \$35.00 per 100; 4 yr., 18-24 in., transplanted, heavily branched, 75c. each, \$7.50 per doz., \$55.00 per 100.

BEAUTYBUSH (*Kolkwitzia amabilis*). 5 to 6 ft. A shrub with great possibilities. Deciduous. Resembles Abelia, but blooms early in the Spring. May be used in combination with Abelia and other shrubs of similar height and habits to furnish blossom throughout the Summer. Long, arching branches covered in the early Spring with masses of pink, tubular blossoms. 18-24 in., \$1.20 each, \$12.00 per doz.; 2-3 ft., \$1.60 each, \$16.00 per doz.

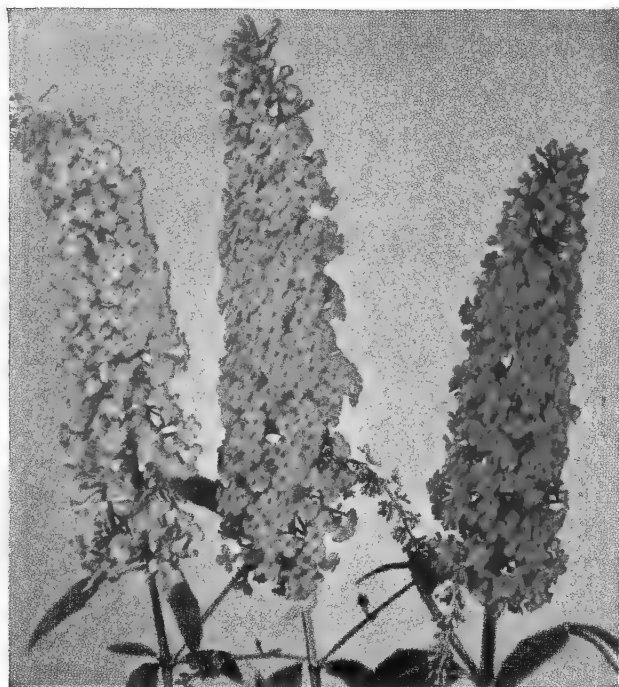

Abelia

ABELIA GRANDIFLORA

One of the most beautiful and useful of all flowering shrubs. Glossy foliage which is evergreen in Virginia, excepting severe Winters—making it eligible for classification as a broadleaved evergreen as well as a shrub. So we are listing it under both Shrubs and Broadleaved Evergreens. Transplants reasonably well dug without ball, provided pruned severely at time transplanted. (See page 32 for balled and burlapped plants.) Grows to a height of 4 to 6 feet, making it ideal for foundation planting; also used for hedges and shrub borders. Small, light pink, tubular blossoms appear in July and continue until frost. Hardy as far north as Philadelphia. Offered in following sizes, dug without ball:

18-24 in.	\$1.20	each,	\$12.00	per doz.
2-3 ft.	\$1.75	each,	\$17.50	per doz.

Buddleia Charming Dubonnet Ile de France
3 BUDDLEIAS: 1 each of the above
 Charming, Dubonnet and Ile de France, \$2.75.

CHINESE BEAUTYBERRY (*Callicarpa purpurea*). 2 to 4 ft. Graceful, dwarf shrub. White flowers July and August, followed by masses of purple berries. Important berried plant. 2-3 ft. \$1.00 each, \$10.00 per doz.

CORALBERRY (New) *chenaulti* (*Symphoricarpos chenaulti*). 3 to 4 ft. Useful, dwarflike shrub which can be grown in almost any kind of soil or location. Somewhat weeping. Light pink flowers in early Summer followed by coral berries which hang on well into the Winter. Hardy, easily transplanted. 2-3 ft. 80c. each, \$8.00 per doz.; 3-4 ft. \$1.20 each, \$12.00 per doz.

COTONEASTER *divaricata* (Spreading Cotoneaster). From China. Grows 5 to 6 ft. High, graceful spreading habit; small, green, polished leaves; red, egg-shaped fruit. Glorious scarlet Autumn tints. 2-3 ft. \$1.50 each, \$15.00 per doz.; 3-4 ft. \$2.00 each, \$22.00 per doz.

CRANBERRY BUSH (*Viburnum americanum*). White flowers followed by orange-red berries. 2-3 ft. \$1.00 each, 3-4 ft. \$1.50 each.

DESMODIUM *penduliflorum*. 6 to 7 ft. Bunches of small lavender, clover-like blossoms in September and October. 3 yr. plants, 75c. each, \$7.50 per doz.

DEUTZIA. An old, popular garden shrub now available in an assortment of improved varieties. We offer the following in 2-3 ft. at 80c. each, \$8.00 per doz.; 3-4 ft. \$1.25 each, \$12.50 per doz.; 4-5 ft. \$2.00 each.

***Crenata*.** 6 to 8 ft. Double pink. Slightly fragrant flowers.

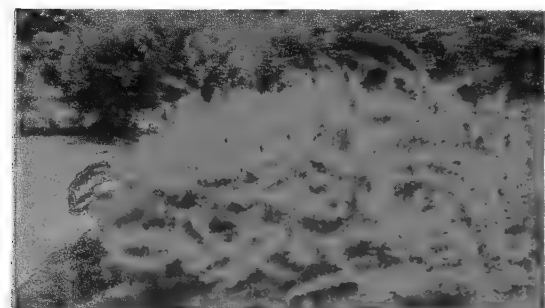

Pride of Rochester (*Deutzia scabra*). 6 to 8 ft. Fast growing, early. Masses of pink-tinged flowers covering the shrub.

DOGWOOD, Red Stem (*Cornus stolonifera*). 6 to 8 ft. Spreading shrub with bright, reddish purple branches which are quite ornamental during the Winter months. Creamy white flowers dense clusters followed by white berries, making it a useful year-round shrub. 2-3 ft. \$1.00 each, \$10.00 per doz.; 6-8 ft. specimens, \$3.50 each.

EUONYMUS *alatus* (Winged Burningbush). 6 to 8 ft. Unusual shrub. Upright, dwarf habit, compact, horizontal, spreading branches, with a unique, corky winged growth. Tiny, chocolate-colored flowers, followed by red berries; beautiful, scarlet Autumn foliage. 2-3 ft. \$1.20 each, \$12.00 per doz.; 3-4 ft. \$1.75 each, \$17.50 per doz.; 4-5 ft. \$2.50 each.

FLOWERING QUINCE (*Cydonia japonica*). 6 to 8 ft. Old shrub found in almost every garden and sometimes referred to as "Japonica". Scarlet and shades of orange and pink flowers in early Spring lasting for several weeks, followed by orange-colored fruits which are ornamental and useful for jellies. 2-3 ft. \$1.00 each, \$10.00 per doz.; 3-4 ft. \$1.50 each, \$15.00 per doz.

FORSYTHIA (Goldenbell). Average height, 6 to 8 ft. One of the first flowering shrubs to bloom—covered with yellow, tubular flowers before foliage appears. Is an attractive, useful shrub throughout the rest of the year. Often used as hedges, screens, shrub borders and especially useful on steep banks, preventing erosion as it can be grown in almost any kind of soil and climate. We offer the following standard varieties in 2-3 ft. at 80c. each, \$8.00 per doz., \$60.00 per 100; 3-4 ft. \$1.20 each, \$12.00 per doz., \$85.00 per 100; 4-5 ft. \$2.00 each, \$20.00 per doz.

Redleaf Barberry

SHRUBS—Continued

BUCKTHORN, Chadwick's (*Thamnus chadwicki*). A new Buckthorn, the best of the family. Beautiful, glossy foliage; shiny, black fruits borne in profusion and retained throughout Fall and Winter. Used in shrub groups and in border plantings. 2-3 ft. \$1.25 each, 3-4 ft. \$1.50 each, 6-8 ft. \$3.00 each.

BUSH HONEYSUCKLE (*Lonicera*). 6 to 8 ft. Hardy, easily grown shrubs which have many uses, thriving in both shade and sunlight, furnishing bloom in Spring followed by red berries later in the season. We offer the following varieties in the 2-3 ft. at 80c. each, \$8.00 per doz.; 3-4 ft. \$1.20 each, \$12.00 per doz.; 4-5 ft. \$1.50 each; 5-6 ft. \$2.00 each.

Fragrantissima (Evergreen Bush Honeysuckle). 8 to 12 ft. Fragrant white flowers in early Spring, followed by scarlet fruits.

Morrowi. Widespreading branches producing a profusion of creamy white flowers followed by bright red berries relished by birds.

Tatarica rubra. One of the few shrubs affording pink flowers in April, followed by bright red berries. Useful in hedges, shrub borders, and backgrounds.

BUTTERFLYBUSH (BUDDLEIA), Azure Fairy (*Alternifolia*). 6 to 8 ft. Most hardy and earliest blooming of the Buddleias. A weeping fountain of beauty; drooping, lilac-colored flowering spikes as much as 2 ft. Worthy of a place in the better gardens. 2-3 ft. \$1.25 each.

BUTTERFLYBUSH (BUDDLEIA), Summer Lilac. Under this class we offer a collection of six of the finest new varieties known which will furnish from early Summer until frost, long spikes of various colors. After you see them, you will agree that great improvements have been made in varieties of Buddleia in the past few years and you are going to be pleased with any ordered from our collection, which we offer in the following Choice Named varieties—2 yr. at \$1.00 each, \$10.00 per doz.

Charming. Best of the pinks. Vigorous; free bloomer.

Crimson King. Same habits of growth and blooming season as the Ile de France, but flowers are deep, purplish red.

Dubonnet. New, reddish purple, similar to Ile de France; somewhat more vigorous grower.

Hartwegi. Compact grower with bright lavender flowers.

Ile de France. One of the best and most popular of new named varieties. Profusion of rosy purple flower spikes 6 to 9 in. long. July to frost.

Mt. Everest. New, pure white, blooming from early July until frost. Beautiful as a garden shrub, as well as excellent for cut flowers.

Mixed Colors. Various shades of lavender and purple. 2 yr., 75c. each, \$7.50 per doz.

Crapemyrtle

(LAGERSTROEMIA INDICA)

The South's most beautiful shrub. May be had in assorted colors; blooms from July until frost. While it has been known to stand temperatures of as much as 15 degrees below zero, it is not considered entirely hardy. However, it can be grown most successfully and is a beautiful shrub in the eastern part of Virginia, Washington, D. C. and along the Atlantic Seacoast even farther north. Throughout the South the Crapemyrtle ranks at the top as a flowering shrub, growing to be much larger and being longer lived than in this area. This beautiful shrub may be had in **Pink, Watermelon Red, Purple, and White**. It is more difficult to transplant than most shrubs, should be pruned back severely when transplanted and given plenty of time to start new growth. Spring planting recommended.

2-3 ft. \$1.50 each, \$15.00 per doz.; 3-4 ft. B&B, \$4.00 each; 4-5 ft. B&B, \$6.00 each; 5-6 ft. B&B, \$8.00 each; 6-7 ft. B&B, Specimen Plants, \$15.00 each

Large Specimens quoted on request

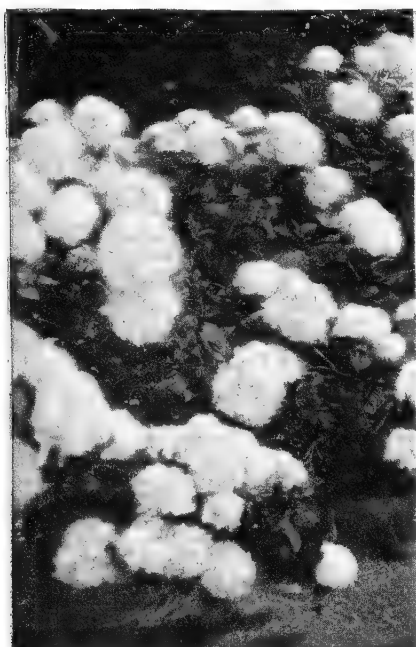

Fortune Forsythia (*Forsythia fortunei*). Vigorous, upright grower; twisted petals.

Green-stemmed Forsythia (*Forsythia viridissima*). Most vigorous; green bark; dark green foliage. Late.

Showy Border Forsythia (*Forsythia spectabilis*). Newest, most popular and most profuse bloomer. Rich, golden yellow.

Weeping Forsythia (*Forsythia suspensa*). Excellent as a ground cover for steep banks and for hiding unsightly objects. Beautiful habit of growth and blossoms.

Dwarf Forsythia. A new, dwarf Forsythia resembling *Spectabilis* but growing only 2 to 3 ft. in height; suitable for foundation planting. 12-18 in. \$1.00 each.

Blue Hydrangea

BLUE HYDRANGEA

(HYDRANGEA
MACROPHYLLA)

Massive flowers lasting for weeks. Blooms from May until frost. For best results and violet-blue blossoms, plant in a moist, acid soil, using peat moss, Rho-Za-Grow or similar organic material. Prefers partial shade and Winter protection, as given Roses. Especially popular along the Atlantic Seacoast from Florida to New York but may be successfully grown in other sections. Beautiful, shapely, low-growing shrub, with glossy green foliage. Useful in foundation plantings. If pink flowers are desired, sweeten the soil with lime.

2 yr., \$1.20 each, \$12.00 per doz.
3 yr., \$1.80 each, \$18.00 per doz.

Spirea Van Houttei

SHRUBS—Continued

HAWTHORN

(*Crataegus*). The Hawthorns somewhat resemble Flowering Crabs, but are usually more compact, rounder-shaped trees. Especially useful in large estates, cemeteries, and parks. 10 to 18 feet. Offered in following choice varieties:

Cockspur Hawthorn (*Crataegus crusgali*). Also noted for its attractive, red berries in Autumn. Compact grower, orange and scarlet Autumn foliage.

English Hawthorn (*Crataegus oxyacantha*). Single white flowers, red berries. More dwarf grower and especially suited for the smaller garden. However, it may be used in any sized planting.

Washington Hawthorn (*Crataegus cordata*). Especially noted for its bright, red berries. White blossoms in Spring and glossy, green foliage throughout the Summer, turning to scarlet in Autumn.

Prices on above Hawthorns: 3-4 ft. \$2.25 each, \$24.00 per doz.; 4-5 ft. \$3.00 each, \$33.00 per doz.; 5-6 ft. B&B, \$9.00 each; 6-8 ft. B&B, \$12.50 each

Paul's Scarlet Hawthorn (*Crataegus oxyacantha pauli*). Brilliant, rosy red, double flowers. One of the most beautiful, shrub-like flowering trees. 3-4 ft. \$3.00 each.

HYDRANGEAS

HYDRANGEAS, Hills of Snow (*Hydrangea arborescens grandiflora*). 3 to 4 ft. Large, flat, white, snowball-like flowers, continuing throughout the Summer. Can be grown in full sunlight or partial shade. 18-24 in. \$1.00 each, \$10.00 per doz.; 2-3 ft. \$1.35 each, \$13.50 per doz.

Peegee (*Hydrangea paniculata grandiflora*). 6 to 8 ft. An old shrub which continues in great demand. Enormous white, conical-shaped heads appearing in August and remaining intact throughout the season but turning to a light pink during the Fall. For best results prune back each Winter. 18-24 in. \$1.00 each, \$10.00 per doz.; 2-3 ft. \$1.35 each, \$13.50 per doz.; 3-4 ft. \$2.00 each.

HYPERICUM moserianum. A most useful, compact, dwarf shrub, which in the Deep South is classed as a Broadleaved Evergreen, retaining its glossy, green foliage throughout Winter. Unless protected in this area, it often freezes back during the Winter, but is up again in early Spring, producing gorgeous, yellow blossoms throughout the Summer and Fall. 3 yr. clumps, \$1.00 each; 5 yr. clumps, \$1.75 each.

JAPANESE MAPLE. Attractive, ornamental, shrub-like tree with beautiful, cutleaved foliage red in early Spring, dark green during Summer, and purplish red in Fall. Tree branched from ground up; used for ornamental purposes rather than shade. 4-5 ft., B&B, \$10.00 each; 5-6 ft., B&B, \$15.00 each.

KERRIA japonica florepleno. 4 to 6 ft. Bright green stems, dark green foliage and double yellow blossoms all Summer. 2-3 ft. \$1.25 each.

LILAC (Syringa)

Named Varieties. An old shrub which has lost none of its popularity; in fact, is more in demand than ever, due to great improvement in varieties. Following high rating well-known, popular named Lilacs have been selected to furnish an assortment of colors:

Belle de Nancy. Double; pink.

Charles Joly. Double; reddish purple.

Doyen Keteleer. Double; pink.

Jan Van Tol. Fine single pure white.

Ludwig Spaeth. Good single violet.

Persian. Fragrant lilac. Free bloomer.

Rubra de Marley. Single, reddish purple.

Prices on above named varieties of Lilacs:

18-24 in. \$1.25 each 2-3 ft. \$2.00 each

LILAC, Common Purple (*Syringa vulgaris*). The old fashioned Lilacs found in almost every garden, regardless of how simple or elaborate. 2-3 ft. \$1.00 each, \$10.00 per doz.; 3-4 ft. \$1.50 each, \$15.00 per doz.; 4-5 ft. \$2.25 each.

JERSEY TEA (*Ceanothus americanus*). 2 to 3 ft. Attractive, dwarf shrub. Prefers shady locations. Sweetly scented, white flowers in early Summer. 4 yr. \$1.00 each, \$10.00 per doz.

MOCKORANGE (*Philadelphus*). Old shrub, has been improved and still has a place in every garden. We offer following selected varieties:

Sweet (*Philadelphus coronarius*). 8 to 10 ft. A vigorous grower and adapted to either full sunlight or partial shade. Very fragrant, creamy white flowers borne in great profusion. 2-3 ft. 80c. each, \$8.00 per doz.; 3-4 ft. \$1.00 each, \$10.00 per doz.; 4-6 ft. \$1.50 each, \$15.00 per doz.

Virginal (*Philadelphus virginialis*). 6 to 8 ft. One of the better, newer varieties. Very fragrant, large, semi-double, pure white flowers in profusion in May and in fewer numbers throughout the Summer. Recommended as the best of all Mockoranges; in fact, one of our most popular garden shrubs. 2-3 ft. \$1.20 each, \$12.00 per doz.; 3-4 ft. \$1.60 each, \$16.00 per doz.

ORANGE TRIFOLIATE (*Citrus trifoliata*). Hardy Orange used for ornamental purpose, and as a root stock for edible varieties. 2-3 ft. \$1.50 each.

PEARLBUSH (*Exochorda grandiflora*). 8 to 10 ft. A large, fast-growing shrub. Pure white flowers in May. Useful in shrub borders, backgrounds and as screens. 4-6 ft. \$2.00 each, \$20.00 per doz.; 6-8 ft. \$3.00 each, \$30.00 per doz.; 8-10 ft. \$4.00 each, \$40.00 per doz.

POMEGRANATE. Medium sized shrub with small, thick, glossy green foliage; double Camellia-like flowers in red and white appear in profusion in June and in lesser numbers throughout Summer. 2-3 ft. \$1.50 each, 3-4 ft. \$2.25 each.

PURPLEFRINGE, or SMOKETREE (*Rhus cotinus*). 10 to 12 ft. Conspicuous, spreading, shrub-like tree. Large clusters of round leaves, overhung in Midsummer by mist-like clouds of tiny lavender-pink, silken fibers hanging on for months. 3-4 ft. \$1.50 each, \$15.00 per doz.; 4-6 ft. \$2.00 each, \$20.00 per doz.; 6-8 ft. \$3.00 each, \$30.00 per doz.

PUSSY WILLOW (*Salix discolor*). 8 to 10 ft. Frequently found in shrub borders. Also useful as cut flowers when the branches are cut in the early Spring and brought indoors to bloom. 3-4 ft. 80c. each, \$8.00 per doz.; 4-6 ft. \$1.00 each, \$10.00 per doz.

ROSE-ACACIA (*Robinia hispida*). 5 to 6 ft. Rosy pink flowers in May and June. Suitable for mass plantings on steep banks. 3 yr. \$1.25 each.

ROSA HUGONIS. Early yellow flowers. Used chiefly as a shrub and for borders. 2-3 ft. \$1.50 each, \$15.00 per doz.; 3-4 ft. \$2.00 each.

SNOWBALL, Common (*Viburnum opulus sterilis*). Very satisfactory, hardy shrub with beautiful clusters of large, globular white flowers in May. 2-3 ft. \$1.25 each, \$12.50 per doz.; 3-4 ft. \$2.00 each.

Oriental (*Viburnum tomentosum plicatum*). 7 to 8 ft. This dwarf-like type is more extensively used than the old-fashioned Common Snowball. In addition to its big white flowers in June, it has beautiful, glossy green foliage throughout the Summer, turning purplish red in Autumn. 2-3 ft. \$1.50 each, \$15.00 per doz.; 3-4 ft. \$2.00 each, \$20.00 per doz.; 4-5 ft. \$2.50 each.

SNOWBERRY (*Symphoricarpos racemosus*). 4 to 5 ft. Handsome, dark green foliage and a profusion of large, white berries in the Fall. Conspicuous in any border planting. 2-3 ft. \$1.00 each, \$10.00 per doz.; 3-4 ft. \$1.35 each.

SPIRAEAS. A desirable class of shrubs, available in many varieties. The following are especially useful for both small home planting and larger landscape developments. Spireas as a rule are easily grown, inexpensive, adapted to a wide range of soils, hardy in almost all climates.

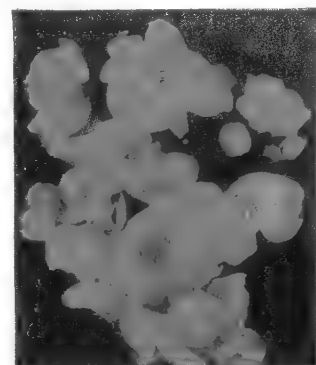

Anthony Waterer. 2 ft. Suitable for planting under windows and along shrub borders, requiring a low-growing plant. Flat, rose pink flower clusters in great numbers in June, smaller numbers during the rest of the Summer. 12-15 in. 75c. each, \$7.50 per doz.; 15-18 in. \$1.00 each, \$10.00 per doz.

Billardi (*Spiraea billardi*). The Everblooming Spirea. Medium height. 4 to 6 ft. Pink and white spikes which are at their best in July but continue until frost. 2-3 ft. 80c. each, \$8.00 per doz.; 3-4 ft. \$1.00 each, \$10.00 per doz.; 4-5 ft. \$1.25 each.

Bridalwreath (*Spiraea prunifolia*). The old-fashioned White Bridalwreath. 2-3 ft. \$1.00 each.

Froebeli (*Spiraea froebeli*). 3 ft. Similar to Anthony Waterer, but stronger grower. Rose pink flowers in July. 15-18 in. 75c. each, \$7.50 per doz.; 18-24 in. \$1.00 each, \$10.00 per doz.

(Spireas continued on page 28)

Flowering Quince

Winter Jasmine

TAMARIX (*Tamarix africana*). 8 to 10 ft. Tall, slender, straggly growing tree with beautiful, feather-like foliage. Delicate, pink flowers in April. 2-3 ft. 80c. each, \$8.00 per doz.; 3-4 ft. \$1.00 each, \$10.00 per doz.; 4-5 ft. \$2.00 each, 5-6 ft. \$2.50 each.

VIBURNUM burkwoodii. One of the outstanding new shrubs. Waxy, bluish-white, snowball-shaped flowers with sweet, Gardenia-like fragrance. Grows into shapely 6 ft. shrub. Blooming in early Spring. 3-4 ft. \$4.25 each; 4-5 ft. \$6.50 each.

VITEX (Chaste-tree). 4 to 5 ft. Large, showy lavender flower spikes from July until frost. We offer the **Macrophylla**, the large-leaf type—also the **Incisa**, the cutleaf. 2-3 ft. \$1.00 each, \$10.00 per doz.; 3-4 ft. \$1.50 each; 4-6 ft. \$2.00 each.

WEIGELA (*Weigela*). Old garden shrub continuing in demand; used in gardens of all sizes and designs. Our selection of varieties below meets the needs of any garden.

Abel Carriere. New, everblooming Weigela; continuous bloom from May until frost. Trumpet-shaped rose carmine flowers with yellow throat. 2-3 ft. \$1.50 each, \$15.00 per doz.; 3-4 ft. \$2.00 each, \$20.00 per doz.

Eva Rathke. 4 to 5 ft. Free bloomer, beginning in May and blooming intermittently until late Fall. Bright red. Dwarf grower, suitable for foundation planting. 18-24 in. \$1.00 each, \$10.00 per doz.; 2-3 ft. \$1.50 ea.

Floribunda (*Weigela floribunda*). 7 to 8 ft. A promising new variety, resembling Rosea in habit of growth, but bright red. One of the better shrubs. 18-24 in. \$1.00 each, \$10.00 per doz.; 2-3 ft. \$1.50 each; \$15.00 per doz.; 3-4 ft. \$2.00 each.

Rosea (*Weigela rosea*). 7 to 8 ft. Best known and most extensively planted of the Pink Weigelas, blooming abundantly in May and June. 2-3 ft. \$1.00 each, \$10.00 per doz.; 3-4 ft. \$1.50 each, \$15.00 per doz.

Weigela Eva Rathke

SHRUBS—Continued

SPIRAEA, Korean (*Spiraea trichocarpa*). One of the newer varieties, resembling Vanhouttei, blooming 2 to 3 weeks later, extending the season. Pure white. 2-3 ft. \$1.00 each, \$10.00 per doz.; 3-4 ft. \$1.50 each, \$15.00 per doz.; 4-5 ft. \$2.00 each.

Reeves Spirea (*Spiraea reevesiana*). 5 to 6 ft. White flowers borne in clusters along the branches in May. Differs from Vanhouttei chiefly by having larger foliage. 2-3 ft. \$1.00 each, \$10.00 per doz.; 3-4 ft. \$1.50 each.

thunbergi (*Spiraea thunbergi*). 4 to 5 ft. A dense, fluffy bush with attractive, green, featherlike foliage which turns to beautiful colors of orange and red in Autumn. Dainty white flowers; first of the Spireas to blossom in Spring. 2-3 ft. \$1.00 each, \$10.00 per doz.; 3-4 ft. \$1.50 each, \$15.00 per doz.; 4-5 ft. \$2.00 each.

Van Houtte (*Spiraea vanhouttei*). 6 to 8 ft. At home almost everywhere planted, under the most favorable and unfavorable conditions. Medium grower. Often used in foundation plantings, shrub borders, as specimens, and serving other purposes. Spreading, attractive shrub with graceful, weeping branches. Good foliage and in the early Spring is covered with masses of pure white flowers. 2-3 ft. 60c. each, \$6.00 per doz., \$45.00 per 100; 3-4 ft. \$1.00 each, \$10.00 per doz., \$75.00 per 100.

SWEET PEPPERBUSH (*Clethra alnifolia*). 4 to 5 ft. Also known as Summer Sweet. Its medium height lends it to many uses in the garden. Desirable because of its spicy fragrance. White flower spikes in August and September when few flowering shrubs are in bloom. 2-3 ft. \$1.00 each, \$10.00 per doz.; 3-4 ft. \$1.50 each.

SWEET SHRUB (*Calycanthus floridus*). 4 to 6 ft. An old garden favorite. Dark, reddish brown; fragrant flowers. May to October. 2-3 ft. \$1.00 each, \$10.00 per doz.

WINTER JASMINE (*Jasminum nudiflorum*).

Low grower, weeping branches. Used for covering banks and walls and in other locations where a low growing shrub is required. Profusion of yellow blossoms in early Spring, usually March. 3 yr. clumps, \$1.00 each, \$10.00 per doz.; 4 yr. clumps, \$1.50 each, \$15.00 per doz.

WHITE FRINGE (*Chionanthus virginica*). Very showy shrub. 12 to 15 ft. in height. Large, leathery, shiny leaves; masses of lacelike, drooping, white flowers in May followed by purple berries. A native of Virginia, but hardy and easily grown over a wide area. Especially useful near streams, affording a pleasing effect when planted in front of Weeping Willows and other drooping trees. 3-4 ft. \$2.00 each, \$20.00 per doz.; 4-6 ft. \$3.00 each, \$30.00 per doz.; 6-8 ft. \$5.00 each.

Grow New Practical Multiflora Rose Fence

(ROSA MULTIFLORA)

Living Farm Fence of Great Value

Inexpensive, easy to grow, stock-tight. Recommended by U. S. Soil Conservation Service. Thousands now planted.

Needs no trimming. Easily destroyed by 2-4-D or clipping.

Practical, ideal for wild life, beautiful. Grow 6 to 8 feet tall, 5 to 7 feet wide. Plant 1 foot apart in single row. Protects soil, crops, game.

	50 to 100	100 to 300	300 or more
6-12 in. . . Each:	\$0.10	\$0.08	\$0.07

HEDGES

A hedge is ornamental as well as it affords protection, costs less than metal, wood or stone fences, requires little attention and upkeep, lasts almost indefinitely. We especially recommend Evergreen Amur River Privet for home planting and landscape effect and Rosa Multiflora for field fences.

EVERGREEN AMUR RIVER (*Ligustrum Amurense*)

New, Improved, Southern Evergreen Type. Just as hardy as California Privet and has added advantage of retaining its glossy, green foliage throughout the average Winter. Rapid, compact grower, making a dense hedge in a short time. May be kept sheared to almost any desired height from 1 to 8 feet. Suitable for surrounding the entire home grounds or as a line between yards.

Planting: For a dense, compact hedge, plant 6 inches apart in a single row, pruning back within 2 or 3 inches of the ground at time of planting. For a screen, plant 12 inches apart.

	10 to 50	50 to 100	100 to 300	300 up
	Each	Each	Each	Each
2 yr., 18-24 in., heavily branched.....	\$0.20	\$0.17	\$0.15	\$0.12

3 yr., 3-4 ft., heavily branched.....	.35	.30	.25	

ECONOMY SIZE: In addition to above Standard Grades of Evergreen Amur River, we offer 1 year, 18-24 in. Lighter, Economy Size Plants in lots of 50 to 100 at 12c. each; 100 to 300 at 10c. each; 300 or more at 8c. each. Not sold in quantities of less than 50.

BARBERRY THUNBERGI

See page 25 for Barberry Thunbergi, which may be used for hedges.

BOXWOOD

See page 33 for Boxwood Hedge Plants

REGEL PRIVET

(LIGUSTRUM REGELIANUM)

4 to 5 feet

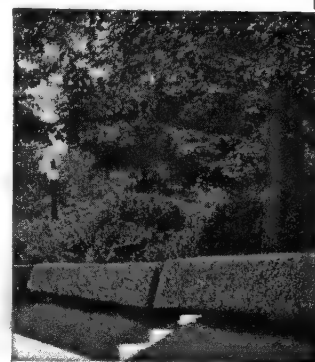

A beautiful shrub. Useful where a low growing plant is required. Very hardy. Dark, shiny leaves. Graceful, drooping branches. Blue berries which hang on well into Winter.

Ideal for covering walls, banks, or a low foundation.

Amur River Privet

Since our Catalogue went to press the cost of supplies and handling plant material has so increased that it becomes necessary for us to advance our present Catalogue prices 20% on Coniferous and Broad-leaved Evergreens, Shade Trees and Grass Seed. We are hopeful that a change in prices of other plant material and supplies will not be necessary before issuing a new Catalogue.

WAYNESBORO NURSERIES

Waynesboro, Virginia

but a... the earth is brown and deciduous trees are barren, our Coniferous Evergreens are offered dug with ball of earth and can be transplanted throughout the year. However, planting during the hotter months—June, July and August—is limited. Cannot be conveniently packed for parcel post shipment.

ARBORVITAE (*Thuja*)

At one time the Arborvitae was one of the most extensively planted Evergreens and is still useful, but Hemlocks, Yews, Junipers and Broadleaved Plants have displaced some varieties of Arborvitae. We continue to list the most popular ones, as follows:

AMERICAN (*Thuja occidentalis*). The mother of this big class. Dark green foliage, pyramidal in form, but more spreading and less compact than American Pyramidal. Useful as a windbreak, screen, or as a specimen. 2-3 ft. \$3.50, 3-4 ft. \$4.50, 4-5 ft. \$6.00, 5-6 ft. \$9.00, 6-7 ft. \$12.00, 7-8 ft. \$18.00.

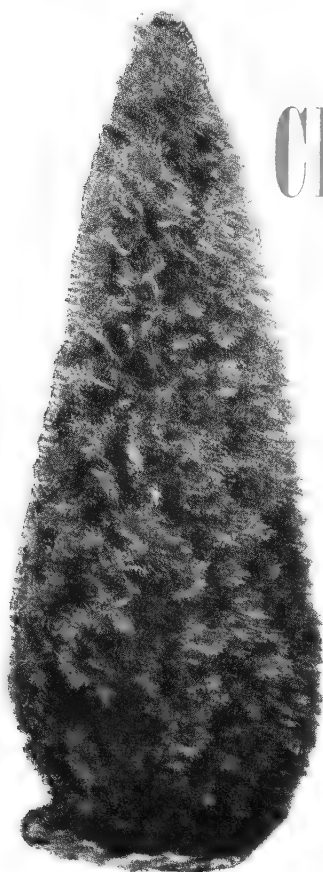

AMERICAN PYRAMIDAL (*Thuja occidentalis pyramidalis*). One of the best pyramidal Evergreens, and an excellent companion of the Globe when used in foundation plantings, being used at the corners and other spaces where pyramidal types are required. More slender and compact than the American, requiring no shearing, unless it is necessary to trim to a desired height; in that case, shearing does not detract from the appearance of the plant. 18-24 in. \$3.00, 24-30 in. \$3.75, 30-36 in. \$4.50, 3-4 ft. \$6.00, 4-5 ft. \$7.50.

GLOBE (*Thuja globosa*). One of the most extensively used of the Arborvitae, being a dwarf, compact, globe-shaped grower, making it an ideal evergreen for foundation planting, for hedges, bordering flower gardens and numerous other uses. Dark green foliage. 12 in. \$2.50, 15 in. \$3.25, 18 in. \$4.50, 24 in. \$6.00, 30 in. \$8.00.

TOM THUMB (*Thuja occidentalis ellwangeriana*). This little dwarf evergreen is what the name suggests; featherlike foliage, globe shape. 18-24 in. \$3.50, 24-30 in. \$4.25.

BERCKMAN'S GOLDEN (*Thuja orientalis aurea nana*). A well-known little gem. Compact, golden foliage. 12-15 in. \$3.00, 15-18 in. \$3.75.

ORIENTAL (*Thuja orientalis*). Often called Chinese Arborvitae, being of somewhat lighter green foliage and a faster grower than the American. Rather compact, pyramidal type. Used for foundation plantings, as well as specimens, seldom growing more than 12 to 15 ft. when matured. Can be kept sheared to almost any desired height. 3-4 ft. \$3.75, 4-5 ft. \$5.00, 5-6 ft. \$6.50.

American Arborvitae

Save Your Shrubs and Trees from Dog Destruction

by spraying with **Chaperone**, a dog repellent. Not offensive to human beings, but dogs don't like it and stay away. Works like magic. Harmless, does not show. Economical to use—each application lasts up to three weeks, rain or shine.

Also effective with cats and other animals.

8-ounce \$1.10 postpaid

Globe Arborvitae

FIRS

A group of Evergreens especially adapted to high altitude, well drained soil and colder climate. Not recommended for the Deep South. Generally used as specimens. Unsited for foundation plantings.

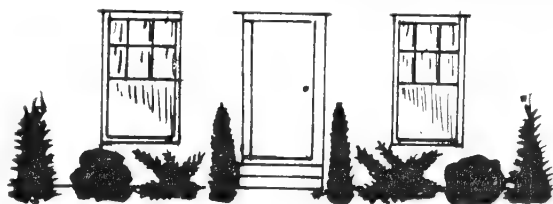

BALSAM (*Abies balsamea*). Dark green foliage. Makes an excellent live Christmas tree, which can be lighted and used from year to year. 24-30 in. \$5.00, 30-36 in. \$6.00, 3-4 ft. \$8.00, 4-5 ft. \$11.00.

DOUGLAS (*Pseudotsuga douglasii*). Tall, fast-growing Fir. Light green foliage, silvery underneath. 24-30 in. \$4.50, 30-36 in. \$5.50, 3-4 ft. \$7.25.

SILVER (*Abies concolor*). This beautiful Silver Fir corresponds to the Blue Spruces, but is more compact, uniform, and a better grower. Must be planted in well drained soil. 18-24 in. \$5.00, 24-30 in. \$6.50, 30-36 in. \$9.00.

Canadian Hemlock

A Model

FOUNDATION EVERGREEN PLANTING

Consisting of 8 Selected Evergreens Suitable for the Small Home

- 2 IRISH JUNIER—3-4 feet.....For each side of entrance
- 2 HEMLOCK—24-30 inches.....For corners of house
- 2 PFITZER JUNIER—18-24 inches.....At side of Irish Junier
- 2 GLOBE ARBORVITAE—15 inches.....Next to Hemlock

8 CHOICE EVERGREENS Offered as a Special Group — Planting No. CE-29—for only **\$28.75**

CHOICE CONIFEROUS EVERGREENS—Continued

HEMLOCK (*Tsuga*)

CANADIAN (*Tsuga canadensis*). Possibly America's most satisfactory and popular evergreen. Hardy, adapted to a wide range of soil. Strong growers, beautifully shaped, graceful trees with good foliage. Easily transplanted and may be kept sheared to almost any desired shape and size. Effective in foundation plantings, to be used at the corners and in other spaces where a taller growing Evergreen is required. Also makes excellent hedge and useful as a background or screen about the garden. 18-24 in. \$3.50, 24-30 in. \$4.25, 30-36 in. \$5.00, 3-4 ft. \$6.00, 4-5 ft. \$8.00.

CAROLINA (*Tsuga caroliniana*). An odd type found high in the mountains of western North Carolina. More dwarf and compact than the Canadian. Adapted to high altitude and well drained soil. 24-30 in. \$4.75, 30-36 in. \$6.00, 3-4 ft. \$7.50.

JUNIPER (*Juniperus*)

This group comprises one of our most useful families of Evergreens. They may be had in numerous shapes, colors, and textures of foliage, as well as in sizes to meet almost any requirement.

The Junipers, as a rule, prefer a rather dry, sunny location. An effective, complete landscape planting may be had by arranging according to height, spread, and color of foliage.

ANDORRA (*Juniperus communis depressa plumosa*). Compact, prostrate grower with beautiful, grayish green foliage in Summer turning to attractive bronze color during Winter. Hardy, strong grower. Especially suitable for covering banks, as a border, at the side of steps or the end of walkway near the gate. 18-24 in. \$3.00, 24-30 in. \$4.00, 30-36 in. \$5.00.

GREEK (*Juniperus excelsa stricta*). Semi-dwarf, massive grower, its spread generally equaling its height. Silvery green foliage. Hardy. 18-24 in. \$4.00, 24-30 in. \$5.00.

HORIZONTALIS (*Juniperus horizontalis*). A prostrate grower with dark green foliage. Used for covering banks, stones and other objects which cannot be covered with sod. 18-24 in. \$3.00, 2-3 ft. \$4.00.

White Pine

Norway Spruce

Pfitzer Juniper

JUNIPERS—Continued

IRISH (*Juniperus communis hibernica*). A tall, slender evergreen with silvery green foliage. Often used at corners and at posts in foundation plantings where a columnar type is required. Also used in formal gardens where it can be sheared to almost any desired height. A hardy, vigorous grower; easily transplanted. Prefers full sunlight. 18-24 in. \$2.75, 2-3 ft. \$3.50, 3-4 ft. \$4.50, 4-5 ft. \$6.00, 5-6 ft. \$8.00, 6-7 ft. \$10.00.

MEYER'S (*Juniperus squamata meyeri*). A Chinese, low growing, semi-prostrate variety. An odd, irregular shaped Evergreen, with silvery green, somewhat variegated foliage, which makes it a conspicuous plant in the garden. Approximately 5 ft. when mature 18-24 in. \$3.50, 24-30 in. \$4.50, 30-36 in. \$6.00, 3-4 ft. \$8.00.

PFITZER'S (*Juniperus chinensis pfitzeriana*). Possibly the best known and most extensively planted of all the Junipers, as well as it ranks near the top among Evergreens. A low grower, almost prostrate. Silvery green foliage. Hardy and adapted to almost all soils, other than a very wet soil which no Juniper likes. Especially useful in foundation plantings, under windows, in low Evergreen borders, etc. Withstands partial shade. 15-18 in. \$2.75, 18-24 in. \$3.50, 24-30 in. \$4.50, 30-36 in. \$5.50, 3-4 ft. \$7.00, 4-5 ft. \$10.00, 5-6 ft. heavy spe. \$25.00.

SAVIN (*Juniperus sabina*). Similar to the Pfitzer's other than foliage is green. Especially useful under windows in a foundation planting. 18-24 in. \$3.50, 24-30 in. \$4.50.

VIRGINIANA (*Virginia Red Cedar*). Upright, pyramidal, compact type of the native Red Cedar. Effectively used for screens, backgrounds, and as specimen plants. 2-3 ft. \$3.50, 3-4 ft. \$4.50, 4-5 ft. \$6.00, 5-6 ft. \$7.50.

PINES (*Pinus*)

For screens, backgrounds to gardens, along driveways, groups for framing in buildings. The small, dwarf Mugho is used in foundation plantings; in beds, at entrances, in numerous other positions in the garden where low growing Evergreens are required.

MUGHO (*Pinus montana mughus*). An interesting, dwarf Pine, seldom growing more than 4 ft. in height, the spread even exceeding the height. Especially effective in early Spring, when the new growth starts. 18-24 in. \$5.00, 24-30 in. \$6.50, 30-36 in. \$8.00, 36-42 in. \$10.00, 4-5 ft. \$25.00.

ORIENTAL RED (*Pinus densiflora*). Long, dark green needles. Resembles the Austrian, but a faster grower. Makes a very beautiful specimen tree. 2-3 ft. \$3.50, 3-4 ft. \$4.50.

PONDEROSA (*Western Yellow Pine*). A fast, large-growing Pine. Long, dark green needles. 3-4 ft. \$4.50, 4-5 ft. \$6.00.

WHITE (*Pinus strobus*). Native Evergreen, with soft, silvery green foliage; fast grower and one of most useful, satisfactory Pines. 2-3 ft. \$3.50, 3-4 ft. \$4.50, 4-5 ft. \$6.00.

PINES for Screens or Group Plantings

To be used as screens or in group plantings. **Austrian, Ponderosa and Scotch**—trees which are not suitable as specimens but ideal for planting as screens or in groups. When ordering, specify screen or group planting trees, offered as follows: **6-8 ft., \$8.00 each; 8-10 ft., \$12.00 each.**

RETINOSPORA

A fast-growing class of Evergreens, hardy and adapted to many uses. Can be kept sheared and used in foundation plantings, as well as in screens and groups.

FILIFERA (*Thread Retinospora*). Semi-dwarf. Globe-shaped when young, gradually assuming a more pyramidal form after becoming older; foliage weeping, effective. 2-3 ft. \$4.00, 3-4 ft. \$5.00.

PLUMOSA (*Plume Retinospora*). Fast growing, pyramidal type with soft green, feathery foliage. Used chiefly as specimens, but may be used in foundation plantings by shearing. 2-3 ft. \$3.50, 3-4 ft. \$4.50.

PLUMOSA AUREA (*Golden Plume Retinospora*). Differs from Plumosa by having golden-tipped foliage. 2-3 ft. \$3.50, 3-4 ft. \$4.50.

SQUARROSA VEITCHI (*Moss Retinospora*). Fine, soft, silvery foliage. Especially attractive when young, but subject to blight when becoming older. 2-3 ft. \$3.50, 3-4 ft. \$4.50, 4-5 ft. \$6.00.

CHOICE CONIFEROUS EVERGREENS—Continued

SPRUCE (*Picea*)

Useful type of Coniferous Evergreens. Especially desirable as specimens, but may be used as live, outdoor Christmas trees, screens, and as a background for smaller type plants. Some are used temporarily in foundation plantings, but we do not recommend this use of the Spruces; they soon become too large unless kept pruned severely.

COLORADO BLUE (*Picea pungens glauca*). Resembles Norway Spruce, but has slightly bluish tendency, the color being more pronounced during Spring and early Summer when the plants put on new growth. Most successful in cooler climate and high altitude. Should not be confused with Koster Blue Spruce, which is more uniform in color but less uniform in habit of growth. 18-24 in. \$5.00, 24-30 in. \$6.50, 30-36 in. \$8.00, 3-4 ft. \$10.50, 4-5 ft. \$15.00.

NORWAY (*Picea excelsa*). The best known of all the Spruces. Easily transplanted, fast, thrifty growers. Long-lived, and adapted to many uses. Retains its dark green foliage throughout the year. 18-24 in. \$2.75, 2-3 ft. \$3.50, 3-4 ft. \$4.50, 4-5 ft. \$6.00. Write for quotations on larger sizes.

YEWS (*Taxus*)Japanese
Pyramidal
Yew

The tendency in Evergreen plantings is towards the better, dwarf, slow-growing, permanent plants, rather than the fast growing, less permanent varieties which frequently become overgrown and ineffective within a few years. No family of Evergreens has created such interest in recent times as the Yews. They are now by far the most important family of Coniferous Evergreens.

The great interest in Yews is easily accounted for—their rich, dark green color, which is maintained at all seasons, in partial shade or full sunlight; the variation of form, ease of training and pruning—also their adaptability to various soils and uses. Another prized feature of the Yews is their scarlet berries, which frequently are borne in great abundance.

We can furnish Yews with the following habits of growth: Pyramidal, Columnar, Semi-Upright, Spreading, and Compact Low-Growing Dwarf. These types have a place in modern landscape plantings, and are displacing numerous less desirable Evergreens.

DWARF (*Taxus cuspidata nana*). Low-growing, compact, spreading; slow grower. 15-18 in. \$6.00

HATFIELD (*Taxus media hatfieldi*). Compact, conical shape, with upright branches and dense foliage. 18-24 in. \$6.00 each.

HICK'S (*Taxus hicksi*). An upright, columnar grower—but having more spread than the Irish Juniper. Compact, dark green foliage, which retains its lustrous green color throughout the year. Entirely hardy and adapted to a wide range of soils, but like all Yews, it responds to a deep, fertile soil. Suitable for planting at entrances and corners in foundation planting.

Also may be used as specimens in formal gardens and other positions requiring a columnar type plant. 15-18 in. \$4.00, 18-24 in. \$5.00, 24-30 in. \$7.00, 30-36 in. \$9.00, 36-42 in. \$12.00, 42-48 in. \$16.00.

JAPANESE PYRAMIDAL (*Taxus cuspidata capitata*). The normal growing habit of this Yew is pyramidal—broad at the base and tapering towards the top—but may be sheared into other forms if desired, as the Yews respond to pruning and become more compact from year to year when kept sheared. This pyramidal type is used extensively as an upright grower in foundation plantings, along with its companion, the spreading *Taxus cuspidata*. Both are adapted to full sunlight and partial shade. Remains dark green at all seasons of the year, and retains its bright, red berries for six months during Fall and Winter. 15-18 in. \$4.00, 18-24 in. \$5.00, 24-30 in. \$7.00, 30-36 in. \$9.00, 36-42 in. \$12.00, 42-48 in. \$16.00.

JAPANESE SPREADING (*Taxus cuspidata*). Wide, spreading habit, the width exceeding the height. Dark green foliage and red berries, the same as the Pyramidal Yew. Adapted to both full sunlight and partial shade, making it the most useful of all spreading type Coniferous Evergreens. 15-18 in. \$4.00, 18-24 in. \$5.00, 24-30 in. \$7.00, 30-36 in. \$9.00.

Hick's Yew

Plant an EVERGREEN HEDGE

Coniferous Evergreens make very satisfactory hedges. They, as a rule, require less shearing than Privet, as well as the varieties used for this purpose are hardy and beautiful.

NORWAY SPRUCE

Make a quick, not too expensive screen or hedge, 2-3 ft. size, planted 4 ft. apart, makes a screen in 2 to 3 yrs. under normal conditions. In lots of 30 or more we offer the 2-3 ft. at \$2.75 each; or we can furnish 3-4 ft. at \$3.75 each.

HEMLOCK

Make an ideal hedge. Can be kept sheared to almost any desired height or spread with little attention. In lots of 30 or more for hedge planting we can furnish 18-24 in. at \$2.75 each, 24-30 in. at \$3.50 each, 30-36 in. at \$4.25 each.

JAPANESE PYRAMIDAL YEW

One of the best Evergreens for a hedge, because of its rich, dark green color and its adaptability to various soils, as well as its graceful growth. In lots of 30 or more, 18-24 in. at \$4.25 each, 24-30 in. at \$5.75 each.

Japanese Spreading Yew

Boxwood, White Dogwood and Azaleas Bordering a Pathway in a Waynesboro Garden.

its, suitable for many uses, making possible complete plantings of selected material which retains its glossy green foliage throughout the year.

Note — Prices on Broadleaved Evergreens include Balling and Burlapping, with the exception of the smaller sizes in Boxwood, Ligustrum lucidum, Pyracantha and Scotch Broom, which are dug with Puddled Roots as indicated by ★.

ABELIA, Edward Goucher. Somewhat more dwarf and compact grower than the Grandiflora. Small, red-tinged evergreen foliage. Red stems, lilac-pink flowers throughout Summer and Fall. Valuable new Broadleaved plant. 18-24 in. \$2.50, 2-3 ft. \$3.25.

ABELIA grandiflora. Also listed under Shrubs, as it may be transplanted dug without ball. During severe Winters, it loses much of its foliage in the northern part of Virginia and farther north, but is reasonably hardy and even if affected by extreme cold, it comes right back, more beautiful than ever, blooming the first season. Light pink blossoms from early June until frost. We cannot recommend too highly this beautiful Broadleaved Evergreen, which has a place in every Southern garden. Offered in balled and burlapped plants as follows: 2-3 ft. \$2.50, 3-4 ft. \$3.25, 4-5 ft. \$4.50.

GORGEOUS DWARF AZALEAS

For a mass of color, no flower quite equals the Azalea, which may be had in assorted lovely shades. In the early Spring the entire plant is completely covered with a profusion of the most beautiful blossoms imaginable and when given a suitable setting, is something to be greatly admired. The varieties we list have been selected not only for color and abundance of bloom, but for hardiness and general adaptability to outdoor culture in the area we serve.

Until it became generally known that Azaleas require an acid soil, an abundance of humus and a uniform moisture supply, they were considered difficult to grow, but with proper culture, it is now possible to have beautiful Azaleas in almost any soil. **Rho-Za-Grow** supplies not only acidity, but necessary plant food. Uniform moisture and humus may be retained with a mulch of **Peat Moss** or even sawdust.

Responding to the increasing demand for Azaleas in larger quantities and a greater assortment of varieties, we have recently established between Waynesboro and Lynchburg, near Bryant, Virginia, on Route 151, **AZALEA GARDENS**, a Branch Nursery, where we grow the newer and better Azaleas, Rhododendrons, Boxwood, and many other Broadleaved Evergreens. Azalea lovers are invited to visit Azalea Gardens, especially during blossom time, when the plants can be dug and transplanted to their new home, where they may continue to bloom and be enjoyed. Azaleas dug with ball and ready to be loaded into your car also may be picked up at Boxwood Garden Shop.

Amoena (Kurume). Rosy purple flowers in dense masses. Hardy and early flowering.

Christmas Cheer (Kurume). Masses of deep, crimson flowers. Compact grower.

Coral Bells (Kurume). Bell-shaped, coral pink. Compact, dark, glossy green foliage.

Corsage (Hardy Gable). Single, large Orchid blooms, almost cover the bush. Not available in 12-15 in. size.

Hexe (Kurume). Midseason, large, deep red flowers. Low grower.

Hinodegiri (Kurume). Bright, carmine-red flowers produced so profusely as to completely cover the plant when in full bloom. Dense, compact bush, broader than high, with rounded green leaves. Most extensively planted of all garden Azaleas.

Hinomayo (Kurume). One of the best early soft pinks. Hardy, strong grower, profuse bloomer.

Macrantha. Large, salmon-pink. Plants similar to Hinodegiri, but blooming a month later, extending the season. One of the most hardy and popular dwarf Evergreen Azaleas.

Pink Pearl (Kurume). Beautiful shade of deep pink. Abundant bloomer.

Royalty (Hardy Gable). Bright purple. Selected from Gable's new, hardy strains which can be grown in a much colder climate than most other Azaleas. Compact, evergreen type.

Salmon Beauty (Kurume). Large, salmon-pink. Dense, compact grower; differs from the Macrantha chiefly by its earlier blooming.

Snow (Kurume). Pure snow white. Compact grower, profuse bloomer. Thick, glossy green foliage. Blooms with Hinodegiri. Valuable, hardy garden variety.

Sunrise (Kurume). Brilliant red with copper suffusion. One of the best early, evergreen, hardy, dwarf Azaleas.

AZALEA GROUP COLLECTION A-32

Six popular, hardy, evergreen, garden varieties — \$11.25
Assorted colors, 8-10 in. blooming size.....

Beautiful BROADLEAVED EVERGREENS COLORFUL THROUGHOUT THE YEAR

No group of Ornamentals has gained more in use and popularity within the past 25 years than Broadleaved Evergreens. Many offer a double and triple attraction by flowering and fruiting, berries remaining on well into Winter. This large group offers plants of various hab-

its, suitable for many uses, making possible complete plantings of selected material which retains its glossy green foliage throughout the year.

Note — Prices on Broadleaved Evergreens include Balling and Burlapping, with the exception of the smaller sizes in Boxwood, Ligustrum lucidum, Pyracantha and Scotch Broom, which are dug with Puddled Roots as indicated by ★.

DWARF AZALEAS — Continued

Sweetbrier (Kurume). New, beautiful rose-pink. Hardy, compact grower, abundant bloomer.

White Indica (Ledifolia alba). Abundance of large, white flowers showing occasional scarlet splashes. Hardy, strong grower. Popular in the Magnolia and Middleton Gardens of Charleston, South Carolina.

Prices on Dwarf Varieties of Azaleas:

6- 8 in. blooming size	\$1.65 each, \$18.00 per doz.
8-10 in. blooming size	\$2.15 each, \$24.00 per doz.
10-12 in. blooming size	\$2.85 each, \$33.00 per doz.
12-15 in. blooming size	\$3.90 each, \$45.00 per doz.

DECIDUOUS AZALEAS

Flame (Calendulacea). Most popular of the Native American Azaleas. Deciduous plants maturing at 3 to 4 ft. Large, Tulip-like flowers appearing in May and June. Practically every shade of yellow from lemon to copper-gold and orange, mingled in a lovely harmony of color. Perfectly hardy, easily transplanted and cultivated. One of our best sellers and becoming more popular each year. Excellent as a background for low-growing Azaleas.

Laurel Blossom (Nudiflora). More and more interest is being shown in the Native American plants. Among those receiving much attention is the Laurel Blossom, a well-known Pink Native Azalea bestowing Springtime beauty to the Blue Ridge and Alleghany Ranges, but equally at home when transplanted to cultivated areas and cared for as other Azaleas. Light pink, typical Azalea blossoms appearing in May before the foliage is fully developed. These Deciduous Azaleas recommended for mass background plantings for the more dwarf Evergreen Plants. Matured height 5 to 6 ft.

3 Years \$2.00

other varieties combined. Medium grower, maturing at a height of 15 ft. or more, with equal spread. Slender, pointed, dark green leaves, plant pyramidal in form when young, broader as it becomes older. Sometimes confused with its more dwarf companion, *Buxus suffruticosa*, which is a close rival for first place. *Buxus sempervirens* has many uses and has always been in great demand. Especially useful as specimens, in hedges and borders. Requires fertile soil and good drainage.

	Each	Doz.	50	100
* 6-8 in., 4 year.....	\$0.60	\$ 6.00	\$22.50	\$40.00

Special Hedge Size Sempervirens Boxwood

14-16 in., Puddled Roots, in lots of 10 to 30, \$1.20 each; 30 to 50, \$1.10 each; 50 to 100, \$1.00 each; 100 up, 90c. each.

BOXWOOD, Dwarf English (*Buxus suffruticosa*). This is the roundleaved, slow-growing, compact variety frequently found on old estates here in Virginia. Specimens several hundred years old having a spread of 8 or 10 ft. are still the pride of many of the famous gardens but the enormous prices offered for these old specimens have moved many of them to new homes. Young plants increase in value each year and serve to make the garden more beautiful.

Note—Boxwood sizes indicated by * dug with Puddled Roots, other sizes Balled and Burlapped				

Larger Specimen Boxwood Quoted on Request

CHERRY LAUREL (*Prunus laurocerasus*). A fast growing, small tree with large, dark, glossy green leaves. White flowers in Spring followed by blue-black berries. Can be kept sheared to almost any desired height and shape. Not hardy in western part of Virginia. 2-3 ft. \$3.75, 3-4 ft. \$5.00, 4-5 ft. \$7.00.

COTONEASTER microphylla. Prostrate; small, dark, evergreen foliage. White flowers followed by bright red berries. Useful for covering banks, and as a rock garden plant. 18-24 in. \$3.00, 24-30 in. \$3.75, 30-36 in. \$4.50.

Specimen Dwarf English Boxwood

ELAEOAGNUS pungens fruitlandi (Bronze Elaeagnus). Dark green leaves, silvery beneath. Creamy white flowers in Fall. Edible silvery grey fruits with red markings ripening early Spring. One of the most hardy Broadleaved Evergreens. Useful in foundation plantings, in groups, borders and as specimens. 18-24 in. \$3.00, 24-30 in. \$3.75, 30-36 in. \$4.50, 3-4 ft. \$5.50, 4-5 ft. \$7.00.

ENGLISH LAUREL (*Laurocerasus rotundifolia*). Large, glossy green leaves somewhat resembling the *Magnolia grandiflora*; hardy in eastern and southern Virginia and states farther South. Medium grower. Suitable for foundation and evergreen group planting. 3-4 ft. \$5.00, 4-5 ft. \$7.00.

ERICA gracilis. A beautiful, hardy, low-growing evergreen scarcely more than 12 in. in height, and 18 in. spread. Dark evergreen foliage. Entire plant covered with profusion of rose-colored, fragrant, tubular flowers from January until April. Even without flowering, this charming little plant would be worthy of a place in your garden. Ideal for the rock garden or border. 2 yr. \$1.00 each, \$10.00 per doz.; 3 yr. \$1.35 each, \$13.50 per doz.

EUONYMUS patens. 4 ft. The most satisfactory of all Euonymus. Low, dwarf grower; hardy. White flowers in the Spring, followed by red berries which remain on until well into Winter. An excellent foundation plant. 18-24 in. \$2.25, 2-3 ft. \$3.00.

HOLLYGRAPE, Oregon (*Mahonia aquifolium*). 4 to 5 ft. Holly-like leaves turning to glossy bronze during Winter. Yellow flowers in Summer, blue berries in Winter. 18-24 in. \$3.00, 2-3 ft. \$4.00.

KALMIA latifolia (Mountainlaurel). Well known native evergreen; dark, glossy, evergreen foliage. Masses of pink Azalea-like flowers in May. Adapted to acid soil conditions like the *Rhododendrons* and *Azaleas*. 18-24 in. \$3.50, 2-3 ft. \$4.50, 3-4 ft. \$6.00.

LEUCOTHOE (*Andromeda catesbaei*). Dark, shining evergreen leaves turning bronze during Winter; fragrant, creamy white flowers May and June; matured height, 3 to 5 ft. 15-18 in. \$2.75, 18-24 in. \$3.50.

Holly (ILEX)

Round-Leaf Oriental Holly

Well known, popular group of Broadleaved Evergreens; useful in garden as well as for Christmas decoration material. Glossy, dark green foliage and ornamental berries. We recommend use of Rho-Za-Grow on Hollies and the planting of groups of three or more for successful fruiting.

AMERICAN (*Ilex opaca*). Adapted to a wide range of soil and climate. In many places will grow into specimen trees 25 ft. or more in height but often kept sheared in the garden to small specimens. White flowers in early Spring, red berries which hang on throughout the Winter. 2-3 ft. \$4.50, 3-4 ft. \$6.00, 4-5 ft. \$9.00, 5-6 ft. \$14.00. Large specimens quoted on request.

BOXLEAF (*Ilex convexa*). Dwarf, compact grower. Most effective dark, glossy green, convex foliage; blue berries. We consider this one of the best Dwarf Evergreens suitable for foundation plantings. 12-15 in. \$3.50, 15-18 in. \$4.00.

CHINESE (*Ilex cornuta*). Masses of large red berries which appear on younger plants than the American. Not entirely hardy in the colder, higher altitudes of Virginia, but ideal in the eastern half and points farther south. Rather difficult to transplant. 18-24 in. \$4.50, 2-3 ft. \$6.00, 3-4 ft. \$9.00, 4-5 ft. \$14.00.

ROUND-LEAF ORIENTAL (*Ilex crenata rotundifolia*). Larger, rounder leaves than the *Ilex crenata*, making a broader more compact plant. Especially suited for spaces requiring a low, slow growing broadleaved evergreen. Can be effectively used with Boxwood and other Broadleaved material. 15-18 in. \$3.25, 18-24 in. \$4.50, 24-30 in. \$5.75, 30-36 in. \$7.50.

ORIENTAL (*Ilex crenata*). Differs from Chinese by having small thick, dark green foliage; blue berries. 15-18 in. \$3.00, 18-24 in. \$4.00, 2-3 ft. \$5.50, 3-4 ft. \$7.50, 4-5 ft. \$10.00.

YAUPON (*Ilex vomitoria*). Somewhat resembles Oriental but faster grower; during severe Winters it does not retain its foliage as well as Oriental; blue berries which hang on well into Winter. 2-3 ft. \$4.50, 3-4 ft. \$6.00.

ABELIA, Edward Goucher. Somewhat more dwarf and compact grower than the *Grandiflora*. Small, red-tinged evergreen foliage. Red stems, lilac-pink flowers throughout Summer and Fall. Valuable new Broadleaved plant. 18-24 in. \$2.50. 2-3 ft. \$3.25.

ABEL GRANDIFLORA. Also listed under Shrubs, as it may be transplanted dug without a ball, it is a native of the mountains of the northern part of Virginia and farther north, but is reasonably hardy and even survives by extreme cold, it comes right back, more beautiful than ever, blooming the first season. Light pink blossoms from early June until frost. We cannot recommend too highly this beautiful Broadleaved Evergreen, which has a place in every Southern garden. Offered in balled and burlapped plants as follows: 2-3 ft. \$2.50, 3-4 ft. \$3.25, 4-5 ft. \$4.50.

GORGEOUS DWARF AZALEAS

For a mass of color, no flower quite equals the Azalea, which may be had in assorted lovely shades. In the early Spring the entire plant is completely covered with a profusion of the most beautiful blossoms imaginable and when given a suitable setting, is something to be greatly admired. The varieties we list have been selected not only for color and abundance of bloom, but for hardiness and general adaptability to outdoor culture in the area we serve.

Until it became generally known that Azaleas require an acid soil, an abundance of humus and a uniform moisture supply, they were considered difficult to grow, but with proper culture, it is now possible to have beautiful Azaleas in almost any soil. **Rho-Za-Grow** supplies not only acidity, but necessary plant food. Uniform moisture and humus may be retained with a mulch of **Peat Moss** or even sawdust.

Responding to the increasing demand for Azaleas in larger quantities and a greater assortment of varieties, we have recently established between Waynesboro and Lynchburg, near Bryant, Virginia, on Route 151, **AZALEA GARDENS**, a Branch Nursery, where we grow the newer and better Azaleas, Rhododendrons, Boxwood, and many other Broadleaved Evergreens. Azalea lovers are invited to visit Azalea Gardens, especially during blossom time, when the plants can be dug and transplanted to their new home, where they may continue to bloom and be enjoyed. Azaleas dug with ball and ready to be loaded into your car also may be picked up at Boxwood Garden Shop.

Amoena (Kurume). Rosy purple flowers in dense masses. Hardy and early flowering.

Coral Bells (Kurume). Bell-shaped, coral pink. Compact, dark, glossy green foliage.

Corsage (Hardy Gable). Single, large Orchid blooms, almost cover the bush. Not available in 12-15 in. size.

Hexe (Kurume). Midseason, large, deep red flowers. Low grower.

Hinodegiri (Kurume). Bright, carmine-red flowers produced so profusely as to completely cover the plant when in full bloom. Dense, compact bush, broader than high, with rounded green leaves. Most extensively planted of all garden Azaleas.

Hinomayo (Kurume). One of the best early soft pinks. Hardy, strong grower, profuse bloomer.

Macrantha. Large, salmon-pink. Plants similar to Hinodegiri, but blooming a month later, extending the season. One of the most hardy and popular dwarf Evergreen Azaleas.

Pink Pearl (Kurume). Beautiful shade of deep pink. Abundant bloomer.

Royalty (Hardy Gable). Bright purple. Selected from Gable's new, hardy strains which can be grown in a much colder climate than most other Azaleas. Compact, evergreen type.

Salmon Beauty (Kurume). Large, salmon-pink. Dense, compact grower; differs from the *Macrantha* chiefly by its earlier blooming.

Snow (Kurume). Pure snow white. Compact grower, profuse bloomer. Thick, glossy green foliage. Blooms with Hinodegiri. Valuable, hardy garden variety.

Sunrise (Kurume). Brilliant red with copper suffusion. One of the best early, evergreen, hardy, dwarf Azaleas.

Azalea Hinodegiri

BROADLEAVED EVERGREENS—Continued

BARBERRY, Evergreen (*Berberis julianae*). Most useful of the upright, evergreen varieties; beautiful, large, dark, glossy green leaves, which turn to an attractive, bronze color during the Winter; very hardy. 15-18 in. \$2.25, 18-24 in. \$3.00, 2-3 ft. \$4.00, 3-4 ft. \$5.00, 4-5 ft. \$7.50.

BARBERRY verruculosa. Best of the low growing dwarf Barberries. Small, crinkly, light green leaves, silvery underneath. Perfectly hardy. 12-15 in. \$2.25, 15-18 in. \$3.00, 18-24 in. \$4.00.

BOXWOOD (*Buxus*)

The first group of Broadleaved Evergreens to be extensively used as landscape material in America. The old Boxwood Gardens of Virginia and other states of the South are recognized as being among the most interesting gardens in America and are visited annually by thousands of tourists.

Boxwood are long-lived, slow to medium growers, beautiful throughout the year. They have many uses in both old and modern gardens, are especially noted for the bordering of driveways, walks, perennial beds, groups of Azaleas, and other Broadleaved Evergreens and flowering plants. The taller varieties are even used as screens. Boxwood always carry a certain amount of dignity, yet can be effectively used in the small, modern garden. There are many varieties. We offer the most popular, practical types.

BOXWOOD, Belgian. Rather dwarf, slow-growing, compact Boxwood. Large, glossy foliage. 15-18 in. \$3.50, 18-24 in. \$5.00, 24-30 in. \$7.00, 18-24 in. \$9.00.

BOXWOOD, Blue Pyramidal (*Buxus sempervirens glauca*). This variety is rare, but its tall, pyramidal habit and beautiful blue-green foliage make it sure to become better known, more extensively used. 18-24 in. \$4.00, 24-30 in. \$5.00, 30-36 in. \$7.00.

BOXWOOD, Oriental (*Buxus japonica*). Fast growing variety with large, light green, foliage; especially adapted for South where climate is too hot for other varieties. 15-18 in. \$3.00, 18-24 in. \$4.50, 24-30 in. \$6.00, 30-36 in. \$8.00, 36-42 in. \$10.00.

BOXWOOD, Standard (*Buxus sempervirens*). Often referred to as American or Standard Box because of its general use. No doubt more of this useful type is grown than all other varieties combined. Medium grower, maturing at a height of 15 ft. or more, with equal spread. Slender, pointed, dark green leaves, plant pyramidal in form when young, broader as it becomes older. Sometimes confused with its more dwarf companion, *Buxus suffruticosa*, which is a close rival for first place. *Buxus sempervirens* has many uses and has always been in great demand. Especially useful as specimens, in hedges and borders. Requires fertile soil and good drainage.

CHERRY LAUREL (*Prunus laurocerasus*). A fast growing, small tree with large, dark, glossy green leaves. White flowers in Spring followed by blue-black berries. Can be kept sheared to almost any desired height and shape. Not hardy in western part of Virginia. 2-3 ft. \$3.75, 3-4 ft. \$5.00, 4-5 ft. \$7.00.

COTONEASTER microphylla. Prostrate; small, dark, evergreen foliage. White flowers followed by bright red berries. Useful for covering banks, and as a rock garden plant. 18-24 in. \$3.00, 24-30 in. \$3.75, 30-36 in. \$4.50.

**Specimen Dwarf English Boxwood**

ELAEOAGNUS pungens fruitlandi (Bronze Elaeagnus). Dark green leaves, silvery beneath. Creamy white flowers in Fall. Edible silvery grey fruits with red markings ripening early Spring. One of the most hardy Broadleaved Evergreens. Useful in foundation plantings, in groups, borders and as specimens. 18-24 in. \$3.00, 24-30 in. \$3.75, 30-36 in. \$4.50, 3-4 ft. \$5.50, 4-5 ft. \$7.00.

ENGLISH LAUREL (*Laurocerasus rotundifolia*). Large, glossy green leaves somewhat resembling the *Magnolia grandiflora*; hardy in eastern and southern Virginia and states farther South. Medium grower. Suitable for foundation and evergreen group planting. 3-4 ft. \$5.00, 4-5 ft. \$7.00.

ERICA gracilis. A beautiful, hardy, low-growing evergreen scarcely more than 12 in. in height, and 18 in. spread. Dark evergreen foliage. Entire plant covered with profusion of rose-colored, fragrant, tubular flowers from January until April. Even without flowering, this charming little plant would be worthy of a place in your garden. Ideal for the rock garden or border. 2 yr. \$1.00 each, \$10.00 per doz.; 3 yr. \$1.35 each, \$13.50 per doz.

EUONYMUS patens. 4 ft. The most satisfactory of all Euonymus. Low, dwarf grower; hardy. White flowers in the Spring, followed by red berries which remain on until well into Winter. An excellent foundation plant. 18-24 in. \$2.25, 2-3 ft. \$3.00.

HOLLYGRAPE, Oregon (*Mahonia aquifolium*). 4 to 5 ft. Holly-like leaves turning to glossy bronze during Winter. Yellow flowers in Summer, blue berries in Winter. 18-24 in. \$3.00, 2-3 ft. \$4.00.

KALMIA latifolia (Mountainlaurel). Well known native evergreen; dark, glossy, evergreen foliage. Masses of pink Azalea-like flowers in May. Adapted to acid soil conditions like the Rhododendrons and Azaleas. 18-24 in. \$3.50, 2-3 ft. \$4.50, 3-4 ft. \$6.00.

LEUCOTHOE (*Andromeda catesbaei*). Dark, shining evergreen leaves turning bronze during Winter; fragrant, creamy white flowers May and June; matured height, 3 to 5 ft. 15-18 in. \$2.75, 18-24 in. \$3.50.

Holly (ILEX)**Round-Leaf Oriental Holly**

Well known, popular group of Broadleaved Evergreens; useful in garden as well as for Christmas decoration material. Glossy, dark green foliage and ornamental berries. We recommend use of Rho-Za-Grow on Hollies and the planting of groups of three or more for successful fruiting.

AMERICAN (*Ilex opaca*). Adapted to a wide range of soil and climate. In many places will grow into specimen trees 25 ft. or more in height but often kept sheared in the garden to small specimens. White flowers in early Spring, red berries which hang on throughout the Winter. 2-3 ft. \$4.50, 3-4 ft. \$6.00, 4-5 ft. \$9.00, 5-6 ft. \$14.00. Large specimens quoted on request.

BOXLEAF (*Ilex convexa*). Dwarf, compact grower. Most effective dark, glossy green, convex foliage; blue berries. We consider this one of the best Dwarf Evergreens suitable for foundation plantings. 12-15 in. \$3.50, 15-18 in. \$4.00.

CHINESE (*Ilex cornuta*). Masses of large red berries which appear on younger plants than the American. Not entirely hardy in the colder, higher altitudes of Virginia, but ideal in the eastern half and points farther south. Rather difficult to transplant. 18-24 in. \$4.50, 2-3 ft. \$6.00, 3-4 ft. \$9.00, 4-5 ft. \$14.00.

ROUND-LEAF ORIENTAL (*Ilex crenata rotundifolia*). Larger, rounder leaves than the *Ilex crenata*, making a broader more compact plant. Especially suited for spaces requiring a low, slow growing broadleaved evergreen. Can be effectively used with Boxwood and other Broadleaved material. 15-18 in. \$3.25, 18-24 in. \$4.50, 24-30 in. \$5.75, 30-36 in. \$7.50.

ORIENTAL (*Ilex crenata*). Differs from Chinese by having small thick, dark green foliage; blue berries. 15-18 in. \$3.00, 18-24 in. \$4.00, 2-3 ft. \$5.50, 3-4 ft. \$7.50, 4-5 ft. \$10.00.

YAUPON (*Ilex vomitoria*). Somewhat resembles Oriental but faster grower; during severe Winters it does not retain its foliage as well as Oriental; blue berries which hang on well into Winter. 2-3 ft. \$4.50, 3-4 ft. \$6.00.

Ligustrum Lucidum

SCOTCH BROOM (*Cytisus scoparius*). An old plant, which is not as extensively used in America as in Europe. However, it can be successfully grown here. Dark green stems make it attractive throughout the year. Bright yellow flowers appear in May and June. Matured height 6 ft. *3 yr. clumps, \$1.75 each; *4 yr. clumps, \$2.25 each.

NOTE: Prices on Broadleaved Evergreens include Balling and Burlapping, with the exception of the smaller sizes of Boxwood, Ligustrum lucidum, Pyracantha and Scotch Broom, indicated with *, and dug with Puddled Roots.

Rhododendron Catawbiense

BROADLEAVED EVERGREENS -Cont'd

LIGUSTRUM lucidum. One of the South's most popular Broadleaved Evergreens. Ideal for foundation planting, borders and groups. Adapted to both full sunlight and partial shade. White flowers in Summer, blue berries throughout Winter. Not often used north of Virginia. *12-15 in. \$1.25, 18-24 in. \$2.75, 2-3 ft. \$4.00, 3-4 ft. \$5.50.

MAGNOLIA grandiflora. Possibly the best known southern evergreen flowering tree. Can be satisfactorily grown in most parts of Virginia but not hardy much farther north. In eastern part of state and farther south, tree grows to be quite large. Tuliplike, very fragrant, large, pure white flowers followed by pods of bright red berries. 18-24 in. \$4.00, 2-3 ft. \$5.00, 3-4 ft. \$7.00.

NANDINA domestica. 3 to 4 ft. Used throughout Virginia and near the coast farther North. Small light green foliage in Summer, turning to beautiful Autumn red, continuing so throughout Winter; white blossoms in Summer, large pods of bright red berries in Fall and Winter; useful and beautiful broad-leaved plants. 15-18 in. \$2.50, 18-24 in. \$3.50, 24-30 in. \$4.50.

PYRACANTHA (Firethorn) angustifolia. Beautiful as a background for more compact, low-growing Pyracantha rogersi. Light green foliage, small bright yellow berries.

PYRACANTHA gibbsi. Resembles Rogersi, but has orange-colored berries.

PYRACANTHA lalandi. Tall, irregular grower. Large, orange-colored berries from late Fall throughout Winter. Glossy, evergreen foliage. One of the most hardy Pyracanthas. 18-24 in. and 2-3 ft. sizes only.

PYRACANTHA rogersi. Compact, low-growing type. White flowers in May, bright red berries from August until Midwinter. Effective when planted in groups in front of the taller growing Angustifolia. Prune when planting.

PYRACANTHA yunnanensis. Upright, vigorous grower. Dark green, glossy foliage. Bright red berries which remain on well into Winter.

Pyracantha Prices:

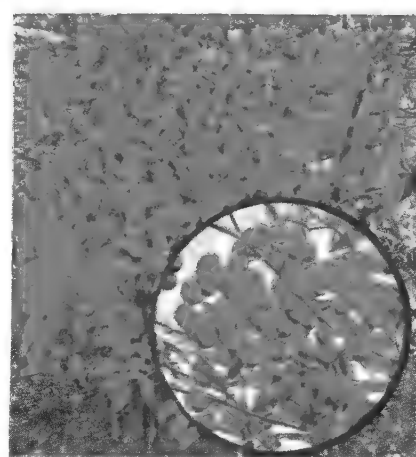

*18-24 in.	\$2.25	3-4 ft.	\$4.50
2-3 ft.	3.50	4-5 ft.	6.00
5-6 ft.	\$8.00		

Viburnum Rhytidophyllum

(LEATHERLEAF VIBURNUM)

One of the most hardy of all the Broad-leaved Evergreens. Thick, leatherlike, evergreen foliage; creamy white flowers in May and June followed by clusters of bright red berries during July and August, adding to the merits of this valuable plant. Grows to a height of 6 to 8 feet. May be used in foundation plantings or evergreen shrub borders. Thrives in full sunlight, but gives best results in partial shade. Its many good qualities merit more extensive use.

18-24 in.	\$3.00	3-4 ft.	\$5.00
2-3 ft.	3.75	4-5 ft.	7.00
5-6 ft.	\$10.00		

Nandina Domestica

Pyracantha Rogersi

RHODODENDRONS

The Rhododendrons would be worthy of a place in the garden even if they did not bloom, but few plants are more beautiful when blossoming under favorable conditions in the garden. We recommend using **Rho-Za-Grow** and Peat Moss or something containing organic matter to loosen the soil and retain moisture; also treating with **Rho-Za-Grow** once a year. May be grown in full sunlight, but partial shade is preferred.

Catawbiense. Most popular native variety. Low, compact grower. Round-tipped, glossy evergreen foliage; gorgeous purplish red flowers in May. Frequently used in front of Maximum in mass plantings. 18-24 in. \$3.50, 2-3 ft. \$4.50, 3-4 ft. \$6.00.

Maximum. The tallest strongest grower of the Rhododendrons. Large leaves, light pink flowers in June and July. Useful as a background in group plantings with low-growing types. 18-24 in. \$3.00, 2-3 ft. \$4.00, 3-4 ft. \$5.00.

HYBRID RHODODENDRONS

You have no doubt observed at various times during May and early June beautiful specimens and mass plantings of Hybrid Rhododendrons in numerous colors and shades, but have been unable to obtain the plants from local nurseries. At one time large quantities of Hybrid Rhododendrons were imported from Holland but for the past several years none have been available. Once again some are coming in and we are able to offer Hybrid Rhododendrons in the following varieties:

Caractacus. Warm crimson, tinged purple.

Dr. H. C. Dresselhuys. Bright red.

Dr. V. H. Rutgers. Fiery red.

Edward S. Rand. Rich scarlet.

F. D. Godman. Crimson with dark blotch.

Gomer Waterer. White.

Lee's Dark Purple. Compact grower.

Prof. Bettex. Scarlet.

Roseum elegans. Rose-pink to lilac.

12-15 in. \$4.50 each, 15-18 in. \$6.00 each

Waynesboro Ornamental Trees

FLOWERING TREES FOR SHADE AND COLOR

Especially Useful as Specimens and as Border Backgrounds for Flowering Shrubs

Flowering Trees can often be used for both shade and ornamental effect. They have many uses on the large estates as well as small home grounds.

APPLE TREES. Generally planted for its fruit, but is one of our most beautiful ornamental trees. A scene more picturesque than Apple trees in full blossom is difficult to imagine. Also makes satisfactory shade tree, Specimen Trees, in choice varieties, selected for ornamental purposes, are twice transplanted and pruned so as to conform with the landscape. 5 yr., 7-8 ft. \$4.50 each; 6 yr., 8-10 ft. \$6.00 each.

Pinkflowering Dogwood

Springtime scene in a Waynesboro garden. Pink and white Dogwoods used as a background in Rock Garden, Azaleas and Pool.

DOGWOODS

(*Cornus*)

No native tree is more admired and extensively used than the Dogwood, which is a shapely, dwarf, rapid grower blooming while quite young. Beautiful as specimens and is especially useful at edge of woodland among taller growing trees or as a border to an evergreen background, affording a most pleasing effect in the Spring when in full blossom. See *Dogwood Group Planting on front cover*.

The Dogwood may be had in pure white or deep pink. The two colors combined in group plantings produce a striking Springtime picture; the flowering season will vary but here in Virginia is usually late April, just ahead of Apple blossom time. Four-petal blossoms 1 to 2 inches across. Brilliant Autumn foliage and red berries which carry well into Winter.

DOGWOOD, Pinkflowering (*Cornus florida rubra*). An outstanding flowering tree. Tree and habits of growth identical to the White flowering other than producing dark pink flowers. 18-24 in. \$2.75 each, 2-3 ft. \$3.50 each, 3-4 ft. \$5.00 each. We can also furnish the following sizes in balled and burlapped specimens: 3-4 ft., B&B, \$6.50 each; 4-5 ft., B&B, \$8.50 each; 7-8 ft., B&B, \$22.50 each; 8-10 ft., B&B, \$35.00 each.

DOGWOOD, White-flowering (*Cornus florida*). Virginia's State flower. This is the native White Dogwood admired by all who have seen it growing wild. Offered in nursery-grown, acclimated trees. 2-3 ft. \$2.00 each, \$22.00 per doz.; 3-4 ft. \$2.50 each, \$27.00 per doz. We can furnish the following sizes in balled and burlapped specimens: 3-4 ft., B&B, \$4.00 each; 4-5 ft., B&B, \$6.00 each; 5-6 ft., B&B, \$8.50 each; 7-8 ft., B&B, \$15.00 each; 8-10 ft., B&B, \$25.00 each.

FLOWERING CRAB TREES (*Malus*)

This class of small, early Spring flowering trees had not been given proper recognition until recent years when they began coming into their own. Now available in a large assortment of varieties, blossoming in April or May. Used as specimens or planted in groups as a border to taller growing trees. We offer a carefully selected list of the better ones, as follows:

ELEY'S (*Malus eleyi*). Red foliage resembling Japanese Redleaved Maple. Masses of red flowers followed in early Fall by scarlet fruits which are excellent for jellies and pickles. Strong, vigorous grower. Desirable as a specimen shade tree.

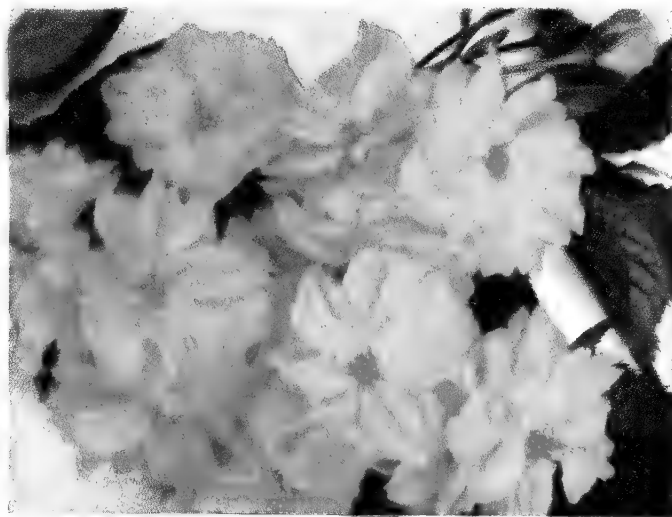

HOPA (*Malus hoppi*). Bright rose-red, double flowers in profusion. Red fruits which are used for jellies and pickles. Another good grower. Excellent as a specimen or as a green-leaved companion to the Eley's.

ORIENTAL (*Malus floribunda*). Pink buds, white flowers, followed by yellow fruits. Good, low-growing tree.

PARKMAN (*Malus parkmani*). Semi-double. Bright rose flowers. Purplish-red fruit. Slow, compact grower.

TEA (*Malus thiefera*). Sturdy, spreading. Literally covered with pink flowers which gradually change to bluish white. Waxy yellow fruits.

VIRGINIA SWEET (*Malus coronaria*). Single, large, bluish-pink blossoms; yellow fruits. Strong, vigorous grower. Late bloomer. Prices on above Flowering Crabs: 3-4 ft. \$2.00 each, \$21.00 per doz.; 4-6 ft. \$2.50 each, \$27.00 per doz.; 3-4 in. caliper, B&B, blooming and fruiting size specimens in Eleyi and Hopa, \$35.00 each

Hopa Flowering Crab

ORNAMENTAL TREES—Continued

FLOWERING CHERRY (*Prunus*). Flowering Cherries are now so well established and in such popular demand that you need not be told of their value for ornamental purposes. Upright, strong growers, frequently blooming the first season after being transplanted. Blossoms large, full, literally covering the stems.

Double Pink. A large percent of the trees in the famous Potomac Basin Planting at Washington, D. C. are of this type.

Single Pink. Earlier than the Double Pink. Among the first Spring flowering trees to blossom.

White. In mass or group plantings of Flowering Trees, the White Flowering Cherry is very effective. Not only used with Pink Flowering Cherries, but with Flowering Crabs, Dogwoods, and other dwarf-growing trees. Free bloomer.

Prices on above Upright Flowering Cherries: 3-4 ft., \$3.00 each; 4-5 ft., \$4.00 each. Write for quotations on larger specimens

FLOWERING CHERRY, Weeping. Differs from the Standard Flowering Cherry by being weeping in form. 5 ft. stems, blooming size specimens, \$12.50 each. Write for quotations on large B&B specimens.

FLOWERING PEACH (*Amygdalus persica*). One of the most showy flowering trees, bursting into blossom two weeks ahead of Dogwoods; double, long-lasting flowers literally cover the twigs, remaining on for 10 days or more. May be had in pink, red, and white. 2-3 ft. \$1.50 each; 3-4 ft. \$2.00 each; 4-6 ft. \$2.50 each.

GOLDEN CHAIN (*Laburnum vossii*). Shrub-like tree with golden yellow flowers which hang from green branches in May. 4-6 ft. \$3.50 each.

LINDEN (*Tilia*), American (*Tilia americana*). Large green leaves. Fragrant, creamy white flowers; good grower, uniform, shapely tree. Useful for both specimens and street planting. 6-8 ft. \$3.50 each, 8-10 ft. \$4.50 each, 10-12 ft. \$6.00 each, 2-2½ in. caliper, \$9.00 each, 2½-3 in. caliper, \$12.00 each.

European Little Leaf (*Tilia cordata*). Smaller leaves than the American, more dwarf, compact grower. Excellent shade tree for small home grounds or planting on narrow streets. 5-6 ft. \$2.50 each, 6-8 ft. \$3.50 each, 8-10 ft. \$4.50 each, 2-2½ in. caliper, \$9.00 each, 2½-3 in. caliper, \$12.00 each.

MAGNOLIA, New Purplish Red (*Magnolia soulangeana nigra*). Most showy and satisfactory of the rare Oriental types; large, Tulip-like, purplish red flowers. The best bloomer; at its best in early Spring, some flowers during Fall. Grows only 12 to 15 ft. branched from the ground. 6-7 ft., B&B specimens, \$25.00 each.

MIMOSA (*Albizia julibrissin*). Dwarf-like, irregular, spreading grower. Lacy foliage, pink, silky flowers in June and July. Purely a southern tree, not often used north of Virginia. Fast grower, early bloomer and most effective as a specimen or in groups on large grounds. 5-6 ft. \$2.50 each, 6-8 ft. \$3.50 each. Larger B&B specimens, quoted on request.

REDBUD (*Cercis canadensis*). Beautiful, small tree which only recently has become

recognized as one of our most valuable native flowering trees. Small pink flowers literally cover stems in early Spring, before foliage appears. Effective in plantings with Dogwoods, around edges of forests, bordering lawn, in group plantings and as specimens. 3-4 ft. \$1.50 each, \$16.50 per doz.; 4-6 ft. \$2.25 each, \$24.00 per doz.; 6-7 ft. \$3.50 each; 7-8 ft., B&B, specimens, \$12.50 each; 8-10 ft., B&B, \$17.50 each.

RED-LEAVED PLUM (*Prunus pissardi*)

A larger, more vigorous grower than the Japanese Red-leaved Maple, but the foliage is equally as ornamental and tree costs less. Purplish red foliage in the Spring, retaining its color well throughout the Summer. Ornamental, bright red fruits. 3-4 ft. \$2.00 each, 4-6 ft. \$2.50 each, 6-8 ft. \$4.00 each.

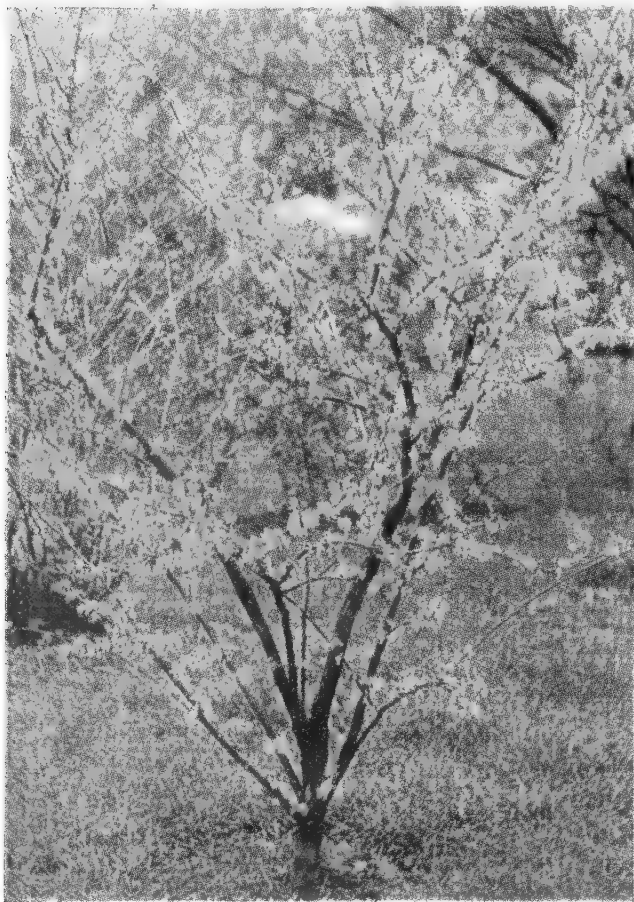

SOURWOOD (*Oxydendrum arboreum*). Medium-sized tree. Long, glossy green leaves turning brilliant red in late Summer, making it one of the most beautiful Autumn forest and lawn trees. Creamy white flowers during June and July. Unfortunately, this valuable tree is rather difficult to transplant, so we offer dug with and without ball. 5-6 ft., without ball, \$3.50 each; B&B, \$7.50 each; 6-7 ft., B&B, \$10.00 each; 8-10 ft., B&B, \$17.50 each.

TEXAS UMBRELLA (*Melia azedarach umbraculiformis*). An umbrella-shaped, dwarf ornamental tree, with dense, dark, glossy green foliage. Not hardy in colder parts of Virginia. 4-6 ft., \$2.50 each, 6-7 ft., \$3.50 each.

TULIP TREE (*Liriodendron tulipifera*). Also known as Tulip Poplar. Large, stately, pyramidal, fast growing, native tree. Fragrant, creamy, cup-shaped. Tuliplike flowers blotched orange. Spring planting recommended. 5-6 ft. \$2.50 each; 6-8 ft. \$3.50 each; 8-10 ft. \$4.50 each; 10-12 ft. \$6.50 each. Larger B&B trees quoted on request.

Weeping Flowering Cherry

Red Bud

Eley Flowering Crab

Waynesboro

SHADE TREES

Good shade trees afford both comfort and beauty and in some cases, bloom, fruit and Autumn coloring as well as serve as a screen or background for other plantings.

The following selection of varieties has been made up with those qualities in mind. We, however, are listing separately under "Flowering Trees," a group planted especially for ornamental effect. Both groups are planted for shade.

ASH, American White (*Fraxinus americana*). Strong growers, spreading and giving excellent shade, yet not so dense as to destroy grass beneath the branches. Suitable for street and campuses, as well as on lawns, where space permits. 6-8 ft., \$3.00 each, \$33.00 per doz.; 8-10 ft. \$3.75 each, \$42.00 per doz.; 10-12 ft., \$5.00 each; 2-2½ in. caliper, \$8.00 each; 2½-3 in. caliper, \$12.00 each.

BEECH, American (*Fagus americana*). This famous tree is denied more extensive use because of its being difficult to transplant. So we offer only balled and burlapped specimens. 4-5 ft., B&B, \$8.00 each; 5-6 ft. B&B, \$12.00 each; 6-8 ft., B&B, \$18.00 each. Write for quotations on larger B&B specimens.

BIRCH (BETULA) Cutleaved Weeping (*Betula alba pendula laciniata*).

Slender tree with white bark, gracefully weeping branches, fernlike cut leaves, all of which combine to make it one of the most beautiful trees. May be used as specimen or in groups with other varieties. 4-6 ft. \$3.50 each, 6-8 ft. \$4.50 each.

European White (*Betula alba*). White bark, larger leaves and stiffer branches than the weeping type, but a good shade tree as well as effective in group plantings. 8-10 ft. \$4.50 each, 10-12 ft. \$6.00 each, 2-2½ in. caliper, \$10.00 each.

CATALPA bungei (Umbrella Catalpa). Small, umbrella-like tree, suitable where space is limited. Seldom grows higher than 10 to 12 ft., with an umbrella-like spread equaling the height. 4-5 ft. \$3.50 each.

Speciosa (Western Catalpa). Fast growing, open top tree, popular where quick effect is required. 6-8 ft. \$3.00 each, 8-10 ft. \$3.75 each, 10-12 ft. \$5.00 each.

American Elm

ELMS (*Ulmus*). The Elm comprises one of the best known and most practical groups of shade trees, being adapted to almost all kinds of soil and climate. Easily transplanted and reasonably fast growers.

American (*Ulmus americana*). This famous American shade tree is at its best when planted in the parks and broad streets of the New England states, where specimens are found more than 100 years old. Yet it succeeds equally as well throughout the South. 5-6 ft. \$2.00 each, \$22.00 per doz.; 6-8 ft. \$3.00 each, \$33.00 per doz.; 8-10 ft. \$3.75 each, \$42.00 per doz.; 10-12 ft. \$5.00 each; 2-2½ in. caliper, \$8.00 each; 2½-3 in. caliper, \$12.00 each; 3-4 in. caliper, \$18.00 each.

CHINESE ELM

(*Ulmus Pumila*)

A comparatively new type of Elm in this country. However, it has been used for ornamental purposes for hundreds of years in China, having been imported from Siberia. Resembles American Elm, but is more compact, has finer branches, less spread, and does not grow to be as large a tree. Suitable for streets, on home grounds, and other places where a fast growing, medium size tree is desired. Sends its roots deep into the soil, interfering very little with the grass. One of the fastest growers of all shade trees; also one of the first to come out in leaf in the Spring, and the last to lose its foliage in the Fall.

	Each	Doz.
4- 5 ft.....	\$1.50	\$16.50
5- 6 ft.....	2.00	22.00
6- 8 ft.....	3.00	33.00
8-10 ft.....	3.75	42.00
	Each	
10-12 ft.....	\$5.00	
2-2½ in. caliper.....	8.00	
2½-3 in. caliper.....	12.00	
3-4 in. caliper.....	18.00	

GUM, Sour (*Nyssa sylvatica*). Medium to small grower. Noted for its scarlet foliage in Autumn. Difficult to transplant. 5-6 ft. \$3.00 each, 6-8 ft. \$4.00 each, 8-10 ft., B&B, \$12.00 each; 2-2½ in. caliper, B&B, \$20.00 each; 2½ to 3 in. caliper, B&B, \$30.00 each.

GUM, Sweet (*Liquidambar styraciflua*). Medium size, reasonably fast growing shade tree with odd, corklike bark. Large, green leaves during the Summer, turning to beautiful, golden and scarlet in the Fall, making it a very satisfactory shade tree, but like the Sour Gum, is difficult to transplant. 5-6 ft. \$2.00 each, 6-8 ft. \$4.00 each, 8-10 ft., B&B, \$12.00 each; 2-2½ in. caliper, B&B, \$20.00 each; 2½-3 in. caliper, B&B, \$30.00 each.

Plant a Tree as a Memorial

Trees make ideal gifts, not only being appreciated at the time, but will increase in value as the years go by.

Silver Maple (See page 38 for description)

WAYNESBORO SHADE TREES -Continued

HACKBERRY (*Celtis occidentalis*). A small, slow growing tree with spreading branches. 5-6 ft. \$3.00 each, 6-8 ft. \$4.00 each, 8-10 ft. \$5.00 each.

HONEYLOCUST (*Gleditsia triacanthos*). An odd shaped, straggly growing tree. Flat top, somewhat weeping branches, smooth bark, finely cut, dark green foliage. Fragrant, white flowers in May. 4-6 ft. \$2.25 each, 6-8 ft. \$3.00 each, 8-10 ft. \$3.75 each, 2½-3 in. caliper, \$12.00 each.

KENTUCKY COFFEETREE (*Gymnocladus dioica*). Irregular shaped tree, blue-green foliage. Somewhat resembles the Walnut. 6-8 ft. \$3.00 each, 8-10 ft. \$3.75 each, 10-12 ft. \$5.00 each.

MAPLE (*Acer*). This group of shade trees is well known and extensively planted since the Maples can be satisfactorily grown in a large part of this country. There are numerous varieties. We offer only the most choice ones, as follows:

Norway (*Acer platanoides*). Especially suited for street planting and on the grounds of small homes. As it makes only a medium size tree, can be used where space does not permit larger trees like the Sugar Maple and American Elm. Large, dark green foliage; dense, spreading. Rather slow grower. 5-6 ft. \$2.50 each, 6-8 ft. \$3.50 each, 8-10 ft. \$4.50 each.

Scarlet (*Acer rubrum*). A medium grower. Light, green foliage turning scarlet in Fall. Not quite as dense as Norway. 5-6 ft. \$2.50 each, 6-8 ft. \$3.50 each, 8-10 ft. \$4.50 each, 10-12 ft. \$6.00 each.

Schwedler's (*Acer platanoides schwedleri*). Leaves bright reddish purple in Spring turning deep green later in the season. Splendid lawn variety. 5-6 ft. \$3.00 each, 6-8 ft. \$4.00 each, 8-10 ft. \$5.00 each.

Silver (*Acer dasycarpum*). Especially popular because of being a fast grower. Light green foliage slightly silvery underneath. Trees grow to be larger and more spreading than the Norway and should be given more space. Excellent for broad streets and large home grounds as well as useful in public parks. 6-8 ft. \$3.00 each, 8-10 ft. \$3.75 each, 10-12 ft. \$5.00 each; 2 2½ in. caliper, \$8.00 each; 2½-3 in. caliper, \$12.00 each; 3-4 in. caliper, \$18.00 each. See Illustration page 37.

Sugar (*Acer saccharum*). A native of the East, found growing in forests. In some localities the trees are tapped for the sugar water which is boiled into syrup and maple sugar. Tall, pyramidal shape requiring more space than its cousin, the Norway. 5-6 ft. \$3.00 each, 6-8 ft. \$4.00 each, 8-10 ft. \$5.00 each.

OAK (*Quercus*). For permanent shade, few trees excel the Oaks, which are long-lived, sturdy and stately. Among the many varieties we attempt to offer only those most useful for shade and ornamental effect. More difficult to transplant than some shade trees and slower in becoming established. Reasonably fast growers and become more valuable with age. Write for quotations on larger B&B specimens.

Austrian Turkey (*Quercus cerris laciniata*). Serrate leaves, gray underneath. Tree slow grower, reaching 100 ft. when matured. Difficult to transplant. 6-8 ft. \$4.00 each, 8-10 ft. \$5.00 each, 10-12 ft. \$7.00 each.

Chestnut (*Quercus montana*). Tall, rather slender grower with foliage less dense than Pin Oak. Most useful when planted in groups with other varieties. 6-8 ft. \$4.00 each, 8-10 ft. \$5.00 each, 10-12 ft. \$7.00 each.

Laurel (*Quercus laurifolia*). Handsome tree with round-topped head and lustrous foliage. Evergreen in the Deep South. 5-6 ft. \$3.00 each, 6-8 ft. \$4.00 each, 8-10 ft. \$5.00 each.

Pin (*Quercus palustris*). The most extensively planted of all Oaks because it lends itself better as a shade tree for narrow streets and small home grounds. Also useful in parks, bordering driveways and almost anywhere a medium size shade tree is required. A very uniform, pyramidal grower. Large, glossy green foliage, turning to red in Fall—making the tree ornamental as well as affording desirable shade. 5-6 ft. \$3.00 each, 6-8 ft. \$4.00 each, 8-10 ft. \$5.00 each.

OAK, Red (*Quercus rubra*). Another good Oak which makes a beautiful shade tree from the time it is established on lawn or street. Grows to be very old and a giant in the forest. When planting a tree as a lasting memorial, we recommend Red Oak as being one of the best. Has large, glossy green foliage which turns scarlet in the Fall. 5-6 ft. \$3.00 each, 6-8 ft. \$4.00 each, 8-10 ft. \$5.00 each.

Scarlet (*Quercus coccinea*). Very similar to the Red Oak in general appearance and habit of growth. Foliage somewhat more serrated and turns to a more uniform red in Autumn. A beautiful satisfactory tree. Sizes and prices same as Red Oak.

Water (*Quercus nigra*). Handsome tree, with slender branches. 5-6 ft. \$3.00 each, 6-8 ft. \$4.00 each.

White (*Quercus alba*). The well known, native American White Oak. Rather difficult to transplant, but makes a beautiful tree, especially when planted in groups in parks or on large estates. Same sizes and prices as Red Oak.

OAK, Willow (*Quercus phellos*). So named because of its willow-like foliage. Beautiful ornamental tree, but rather difficult to transplant. Matured height, 60-80 ft. 5-6 ft. \$3.00 each, 6-8 ft. \$4.00 each, 8-10 ft. \$5.00 each.

PLANE, Oriental (*Platanus orientalis*). The Plane is a good grower and especially desirable in cities where some varieties do not succeed because of smoke. Useful as a street tree, as well as on the lawn. 6-8 ft. \$3.50 each, 8-10 ft. \$4.50 each, 10-12 ft. \$6.00 each, 2-2½ in. caliper, \$10.00 each, 2½-3 in. caliper, \$15.00 each.

POPLAR boileana (*Populus boileana*). Glossy green leaves, silvery underneath. Slender grower but wider than Lombardy and much longer lived. 5-6 ft. \$1.50 each, 6-8 ft. \$2.25 each, 8-10 ft. \$3.00 each.

Lombardy (*Populus nigra italica*). Tall, slender, rapid grower. Suitable as a background, planting along driveways, screening off outbuildings, and other unsightly objects. 6-8 ft. \$1.25 each, \$13.75 per doz., \$75.00 per 100; 8-10 ft. \$1.75 each, \$19.25 per doz., \$110.00 per 100; 10-12 ft. \$2.50 each, \$27.50 per doz.

WALNUT, American Black (*Juglans nigra*). Fast growing, spreading shade tree. Profitable for both timber and nuts. Especially useful for planting in pasture fields as the grass thrives underneath. Makes good shade for the stock and at the same time is growing into valuable timber. 6-8 ft. \$3.00 each, \$33.00 per doz.; 8-10 ft. \$3.75 each, \$42.00 per doz.

WILLOW, WEEPING (*Salix babylonica*). One of the most beautiful weeping trees. Especially suitable for planting along streams but can be grown in well drained soil. 5-6 ft. \$2.00 each, 6-8 ft. \$3.00 each.

Lombardy Poplar

Oriental Plane

Six of the World's Finest Roses

All-America Rose Selections

Each an All-America Rose Selection, as indicated by the symbol which stands for the results of two-year testing in widely separated test gardens, ranging from the Atlantic to the Pacific and from Minnesota to the Gulf. The All-America rating is zealously guarded, and some years the award may be granted to only one variety if no more appear to measure up to this high standard. These Roses have qualities demanded in a hardy, everblooming garden Rose, such as beauty of form, vigor, hardiness and abundance of bloom in various colors. Surely you have room in your garden for this group of Six New, Superior All-America Hybrid Tea Roses.

**ALL SIX
in 2-Year
Blooming
Size Plants**

\$10.00

**2 of each, a
full dozen
\$19.35**

① **TALLYHO** Pat. No. 828 **Each \$2.00**

Winner A.A.R.S. for 1949

An entirely new shade in Roses—true old-rose. Blooms are two-toned the outside a dark shade of the rare color, the inside lighter.

② **SUTTER'S GOLD**
(Patent Applied for) **Each \$2.50**

A.A.R.S. Award for 1950

Beautiful, long, pointed buds richly shaded with orange and red. Rich tea fragrance not found in any other yellow Rose.

③ **FORTY-NINER** (Pat. No. 792)
Each \$2.00

Winner of A.A.R.S. for 1949

Brilliant and attractive bicolor. The rich, contrasting bright color is the outstanding feature. Outside of petals rich yellow, the inside a vivid red. Long pointed buds and well-shaped, open flowers.

④ **NOCTURNE** (Pat. No. 713)
Each \$1.50

Long, pointed buds of perfect form open to blooms of bright cardinal red with dark shadings. Intensely fragrant.

⑤ **CHARLOTTE ARMSTRONG**
(Pat. No. 455) **Each \$1.50**

Long, slender carmine buds open to extra large, rich cerise blooms. Blossoms and plant among the best.

⑥ **PEACE**
(Pat. No. 591)
Each \$2.00

Huge, yet perfectly formed and delicately colored in tones of gold, buff, pearly white, edged in cerise. Strong grower, free bloomer. Has possibly been awarded more medals and honors than any one Rose.

Beautiful HARDY

Prevailing fashions in flowers come and go, but the Rose is always in style. It is now more extensively planted than ever and new varieties in many shades and blends are introduced annually, replacing the less desirable old ones. So whether your home is large or small, surely you have a place for a dozen or so Roses.

IMPERIAL DOZEN

It would be difficult for the average planter to select a few dozen Roses from thousands of known varieties. We have carefully studied and tested the old and most promising new ones as they have become available, and believe you will agree that our Imperial Dozen meets the average planter's requirements in beautiful, Everblooming, Garden Roses. This collection has been chosen as to adaptability to outdoor culture, color, bud, stem, blooming qualities and habits of growth. We offer the following Imperial Dozen:

Ami Quinard. Deep velvety red. Beautiful buds, semidouble flowers.

Betty Uprichard. In a color class to itself; beautiful, harmonizing shades of carmine and salmon. Long pointed buds, thick-textured petals which hold their form and color.

Caledonia. Large pure white. Long, strong stems, pointed buds, good foliage.

SIX Favorite Everblooming

6-One of Each \$5.40

Separately
\$1.00 Each

Dame Edith Helen. Color similar to Editor McFarland. Long stems, abundance of soft pink blossoms.

K. A. Viktoria. Creamy white, long, pointed buds, snow-white flowers. Delightfully fragrant. *Illustrated back cover.*

CLIMBING ROSES

Climbing Roses are doubly attractive—serving as vines and producing an abundance of lovely blossoms. Disease resistant, modern Climbers are excellent for a screen, serve as a background for other flowers, beautify trellises, walls, garden fences and other objects over which they climb.

Everblooming Climbing Hybrid Teas

Especially recommended for milder climates, including Virginia and states farther South.

HIGH NOON (Patent No. 704)

Regional A.A.R.S. winner. New Everblooming Golden Yellow Climber. Canes not as long as one-season bloomers but afford constant masses of yellow, pointed buds and flowers throughout Summer on long stems. Excellent for cutting and especially effective for trellises. 2 yr. No. 1 Blooming Size Plants, \$2.00 each.

Etoile de Hollande Climber. Differs from the bush type only by being a strong-growing, free-blooming Red Climber.

Mrs. P. S. DuPont Climber. Yellow buds and flowers, same as the bush form; plant a good Climber. Excellent foliage.

Talisman Climber. Climbing type of the well-known Talisman Rose. Blend of pink and shades of gold.

PRICES on Etoile de Hollande, Mrs. P. S. DuPont and Talisman Climbers: 2 yr. No. 1 Blooming Size Plants, \$1.00 each, 6 for \$5.40, \$10.20 per dozen—your choice of varieties

Spring-Blooming Climbers

Normally, this class blooms only for a few weeks in May and June, but the New, Patented New Dawn is an exception, blooming intermittently from May until frost.

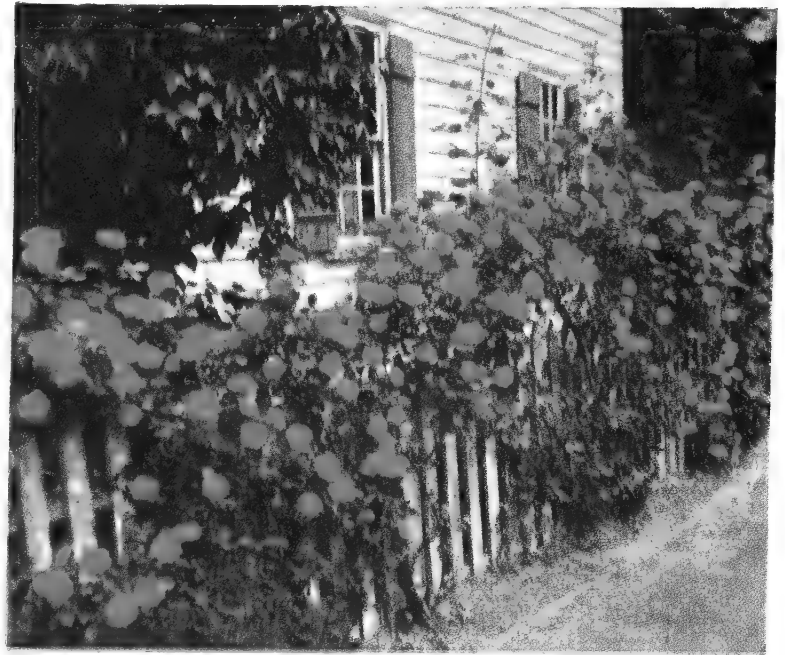

American Beauty Climber. True American Beauty color. Large flowers, long stems.

Dr. W. Van Fleet. Delicate flesh-pink on the outer surface, deepening to rose-flesh in center. Strong grower, good foliage.

NEW DAWN (Plant Patent No. 1)

HARDY EVERBLOOMING CLIMBING ROSE

The first Rose ever to be honored with a U. S. Plant Patent and still the outstanding Hardy Everblooming Climber. Sport of the well-known Dr. Van Fleet, possessing all the good qualities of its parent and blooming intermittently from May until frost. Ideal for trellis at entrance to Rose Garden. Flesh-pink. \$1.75 each

Paul's Scarlet Climber

! SPRING-BLOOMING CLIMBERS—Continued

Paul's Scarlet Climber. Vivid scarlet, semi-double blooms. Profuse bloomer. Most popular and widely planted Red Climber.

Silver Moon. Clear, silvery white, with a mass of bright yellow stamens. Vigorous, dark green glossy foliage. Successfully used for covering steep banks

PRICES on Spring-blooming Climbers: 2 yr. No. 1 Blooming Size Plants, \$1.00 each, 6 for \$5.40, \$10.20 per dozen—your choice of varieties

New Hardy Everblooming Floribundas

This popular class of Roses is being given much publicity due to their adaptability to many uses in the garden, continuous bloom, hardiness, and ease of culture.

Effective as a shrub in the shrub border, foundation planting, shrub groups, as well as in the Rose Garden—affording masses of colorful blooms from May until frost.

Goldilocks (Patent No. 672). Something new—a true Floribunda in a rich shade of golden yellow. Compact bush produces masses of lovely flowers from early Spring until late Fall. Long-lasting cut flower. \$1.50 each, 6 for \$8.25, 12 for \$15.00.

Pinkie (Patent No. 712). A. A. R. S. Winner for 1948. Perfection of form never before seen in buds and flowers of this type. The perfect, long, slender, pink buds open to fully double flowers about 2 inches across. Blooms continuously from early Spring until late Fall. \$1.50 each, 6 for \$8.25, 12 for \$15.00.

Floradora Highest rated of all Floribundas. All-America Rose Selection. Brilliant cinnabar red, representing a new shade in Roses. Free bloomer. You may enjoy Floradora in your garden from May until frost and the long-stemmed cut flowers will retain their true color for a week or more. \$1.50 each, 6 for \$8.25, 12 for \$15.00.

POLYANTHUS ROSES

Also known as Baby Rambler, or Cluster Roses. Dwarf, shrub-like in form, and bloom from May until frost. Effective in mass group plantings or as a border.

Edith Cavell. Free bloomer. Brilliant scarlet.

Ellen Poulsen. Rose-pink flowers in large clusters on bushy plant.

Golden Salmon. Large clusters bright salmon orange.

Ideal. Good grower, continuous bloomer. Large clusters of dark red.

Katharina Zeimet. Pure white. Fragrant; profuse bloomer.

Orleans. An old favorite. Pink.

PRICES: 2 yr. No. 1 Blooming Size Plants, \$1.00 each, 6 for \$5.40, \$10.20 per dozen your choice of varieties

Floradora

Hardy Perennials

40c. each, 3 of any one variety for \$1.10
\$4.00 per doz., except as noted

For best effect we recommend planting not fewer than three of a variety

You may not have room for Shade Trees, Evergreens, Shrubs, or even Roses, but can use effectively arranged Perennials in spaces too limited for other types of Ornamentals.

They also have an important place on the grounds of the average home, large estate and park.

May be had in various heights from 1 inch to several feet, in numerous shades, from the first call of Spring until silenced by chill Winter winds. While they carry over from year to year, transplanting and renewing Perennial Beds occasionally is essential to best results. Furthermore, we like our gardens to be in style and must find space for the new, improved varieties—discarding the less desirable ones. Our list of Hardy Perennials is revised from time to time so that from the following collection you may choose varieties which will meet normal requirements. *Suitable for Rock Gardens

AEGOPODIUM. Silvery variegated foliage; white flowers. Used as a border plant. 12 in.

HARDY ASTERS

Improved varieties in this old garden plant have created much new interest. The Asters bloom in September and October at a time the garden is most in need of color.

We offer the following choice varieties ranging in height 2 to 4 feet:

Beechwood Challenger. Clear crimson-red; free flowering.

Blue Plume. Stately, deep purple-blue.

Harrington's Pink. Deep rose pink; one of the best.

Mt. Everest. Excellent White Aster.

Sunset. Large, clear pink.

Violetta. Semi-double, deep violet-blue. Sturdy grower; large flowers.

Prices: 50c. each, 3 of one variety \$1.35, \$5.00 per doz.

***AJUGA (Bugle).** Blue flowers in May and June. 6 to 8 in.

***ALYSSUM saxatile compactum (Basket of Gold).** Bright yellow. Early Spring. 1 ft.

BAPTISIA australis (False Indigo). Dark blue, pea-shaped flowers in June. 2 ft.

***BLEEDINGHEART (Dicentra spectabilis).** Old fashioned flower with long racemes of heart-shaped pink flowers in May and June. 2 to 2½ ft. 75c. each, \$7.50 per doz.

***CANDYTUFT, Hardy (Iberis sempervirens).** Dwarf plant 8 to 10 in. across covered in Spring with waxy white flowers.

***COLUMBINE (Aquilegia), Mrs. Scott Elliott's Hybrids.** A choice old English strain of one of the best known and loved Perennials. Pastel shades of rose, blue and yellow in many delightful combinations. Mixed. May and June. 2 ft.

Algonquin

Clara Curtis

Autumn Lights

GARDEN CHRYSANTHEMUMS

Also known as Hardy Chrysanthemums. However that does not mean that they are absolutely hardy everywhere under all conditions. Even here at Waynesboro we lose some of our Chrysanthemums during severe Winters. These garden varieties start blooming in July, continuing until freezing weather, supplying color when the garden most needs it. There are many varieties, but we attempt to list only the ones we consider most suitable for the communities we serve.

Cushion Mums

Low growing, spreading type, especially suitable for rock gardens and low borders.

***Bronze Cushion.** Bronze flowers turning to a bronzy, coppery yellow. August.

***Pink Cushion.** Solid, compact grower. Covered with pink blossoms in August.

***Red Cushion.** Similar habits to popular Pink Cushion but a dark red. September.

***White Cushion.** Opens a delicate pink, turning pure white as flowers develop. August.

***Yellow Cushion.** Bright glistening yellow. August

***Champion.** New reddish deep bronze, a distinct color. August.

***Lavender Lassie.** New silvery lavender shade. August.

***Major.** Best pink Cushion. Bright salmon-pink that does not fade. September.

***New Gold.** New golden yellow Cushion. August.

***Santa Claus.** Bright red. September.

***Serene.** Profuse-blooming white. September. 50c. each, 3 of one variety for \$1.35, \$5.00 per doz.

Miscellaneous Mums

Alabaster. Very large, early, white English Mum.

Algonquin. Double golden yellow. September.

Autumn Lights. Semi-double coppery bronze. September.

Clara Curtis. New, large rose-pink. August.

Fleur. New double purple. Late September.

Joan Helen. Semi-double garnet red. September.

Judith Anderson. Brilliant yellow button. September.

Olive Longland. New, huge double salmon-orange. September.

Orchid Spoon. Orchid-pink spoon type. Late September.

Rose Glow. Pompon. Sweet-scented pink. September.

50c. each, 3 of one variety for \$1.35, \$5.00 per doz.

New Gold

Lavender Lassie

Santa Claus

Judith Anderson

COREOPSIS. Popular yellow flower which can be used for cutting from June until frost. 2 ft.

DELPHINIUM, English Hybrids, Wrexham Strain (Perennial Larkspur). A most beautiful Perennial in the garden and one of the best cut flowers. Tall-growing with spikes as much as 2 ft. Various shades of blue, blending into delicate shades of pink. At its best in early June. Some flowers throughout the Summer.

***DIANTHUS deltoides (Maiden Pink).** Masses of small pink flowers in May and June. 1 ft.

FOXGLOVE (Digitalis). While Foxgloves are listed under Perennials, they are biannuals and should be planted each year. 3 to 4 ft. colorful spikes in many shades add attraction to the May and June Perennial garden.

GYPSOPHILA paniculata (Babysbreath). Minute, starry, white flowers borne in profusion on a massive spreading plant with small, threadlike stems. Useful for cut flowers, with coarser, larger blossoms. Blooms for a long period during the Summer. 3 ft.

HIBISCUS (Mallow Marvels). Hollyhock-like, single flowers appearing in Midsummer. Mixed colors. 5 ft.

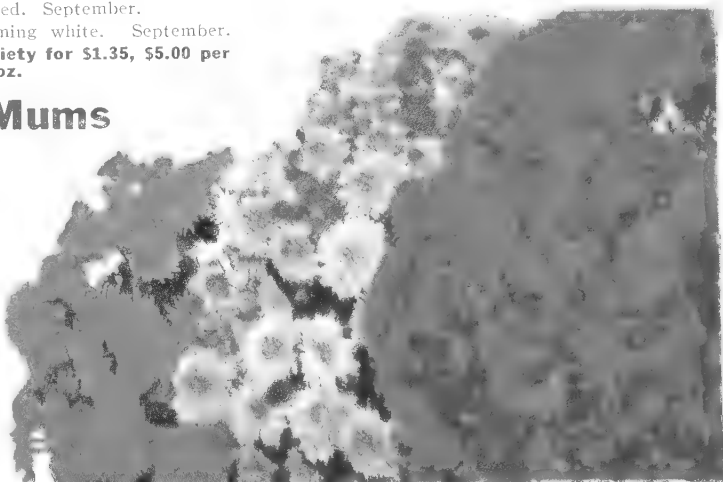

HOLLYHOCKS. Popular old-time flower. Mixed colors. July and August. 5 ft.

LIATRIS (Gayfeather). Showy, slender plant with purple flower spikes in July and August. 3 to 4 ft.

***LILY-OF-THE-VALLEY (Convallaria majalis).** An old favorite garden plant. Also popular with florists. Dainty, white, bell-shaped flowers appearing in May are beautiful in the garden as well as desirable for cut flowers. Very fragrant. Can be grown in considerable shade. 6 to 10 in.

PHYSOSTEGIA virginica. Handsome plants for sunny borders or wild gardens; long spikes of delicate pink flowers in July and August. 3 to 4 ft.

PLATYCODON (Balloonflower). Broad blue and white, bell-shaped flowers all Summer.

HARDY PERENNIALS—Continued

- ***PLUMBAGO larpentae**. Lovely, low growing plants with small, heart-shaped leaves of bronze green; flowers deep Peacock blue in small clusters. 6 in.
- ***PRIMULA veris (Hardy Primrose)**. One of the most beautiful early Spring-flowering perennials. Various shades of yellow, orange and red. Prefers a shady location. 6 in.
- ***SEDUM (Stonecrop)**. Hardy, easily grown ground cover plants. Thrive in both shade and full sunlight. Used for covering shady spots where grass will not succeed, also in rock gardens and as a border plant. Assorted varieties.
- SHASTA DAISY (Chrysanthemum maximum)**. Large white blossoms. June, July and August. 2 ft.
- ***STOKESIA (Cornflower Aster)**. Immense light blue flowers. Vigorous grower, free bloomer. September. 12 to 18 in.

ORNAMENTAL GRASSES

Easily grown; long, shiny leaves, numerous fluffy, silky plumes which are beautiful in the garden through Fall and early Winter. May also be cut and used for indoor decoration. Should be more used as a background for the Perennial border, as a screen for hiding unsightly objects as well as having many other uses. 6 to 8 feet.

Clumps—35c. each, \$3.50 per doz.

TALL GROWING PHLOX

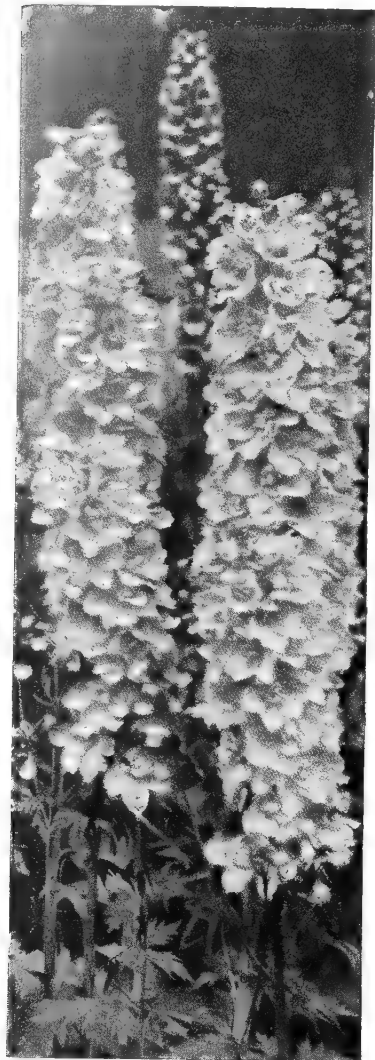

Generally conceded as one of the best Perennials. May be had in large assortment of varieties, in various colors, blooming over an extended period through Midsummer.

It is not possible to offer all the good varieties, but selections we offer are made up of the best.

OUTSTANDING NEW PHLOX

60c. each, 3 of one variety for \$1.65, \$6.00 per dozen

- Charles Curtis**. Magnificent Phlox of brilliant sunset-red. The flower head is large and unusually clear and sparkling as the flowers do not discolor in the sun or fade with age.
- Columbia** (Plant Patent No. 118). Delicate cameo-pink with faint blue shading at center. Out of each joint grows a lateral or secondary flower spike, continuing the display of bloom long after the main flower head has disappeared.
- Eva Foerster**. Very large flowers and trusses of bright salmon-rose with white eye.
- Flash**. Showy new variety. Carmine crimson flowers with orange-scarlet center. Free bloomer, medium height.

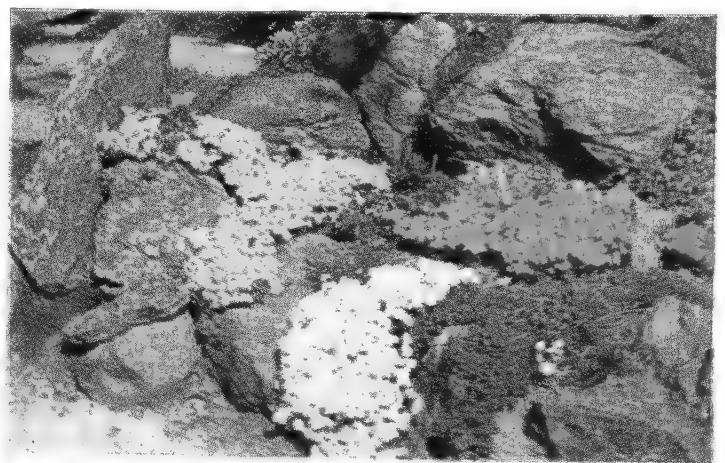

Delphinium

Mary Louise. Variety of great merit. Glistening waxy white flowers in extra large heads. Good grower, clean foliage, and unusually prolific bloomer.

SELECTED STANDARD PHLOX

- Border Queen**. Very large heads brilliant watermelon pink flowers. Blooms freely over a long period.
- Colonial**. Strong grower, extra large, blue flowers.
- Daily Sketch**. Large trusses and individual florets. Light salmon pink, crimson eye. One of the best.

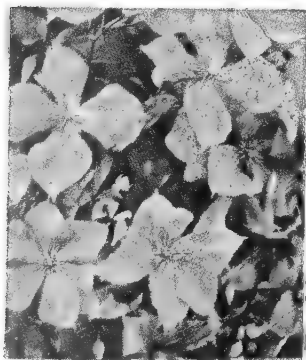

Phlox Subulata in Rock Garden at Boxwood Gardens, Near Afton, Va.

- Miss Lingard**. Most hardy, easily grown of all white Phlox. Flowers from June until October. Large heads of white flowers with pink shading in center.
- Prime Minister**. Pure white, distinct crimson eye.
- Standard varieties**: 50c. each, 3 of one variety for \$1.35, \$5.00 per doz.

CLIMBING VINES

HARDY, 2-YEAR, FOR DECORATION, SHADE AND SCREENS
GROUND COVERS—See page 24H

BITTERSWEET (Celastrus scandens). Frequently planted to cover fences and for screening unsightly buildings. Especially noted for its orange-colored berries which hang on well into Winter. 75c. each, \$7.50 per doz.

Clematis Jackmani

- BOSTON IVY (Ampelopsis veitchii)**. Most popular deciduous climber. Clings to smooth surface walls. Often planted as a support to Evergreen English Ivy, the two climbing to great heights. 75c. each, \$7.50 per doz.
- CLEMATIS, Large Flowering**. No other climbing vine equals in attractiveness the beautiful, large flowering Clematis. Available in various colors, blooming profusely in May, followed with some blooms throughout the Summer. Excellent for porch and trellis planting.
- Henryi**. Large, single white.
- Jackmani**. Most popular large purple. Blooms throughout Summer.
- Mme. Andre**. Large violet red.
- Prices on Large-flowering Clematis**: 2-Year: \$1.35 each, \$15.00 per doz.
- CLEMATIS paniculata**. The finest of all Small-flowering Clematis. In Midsummer the entire vine is clothed in a mass of white bloom. 75c. each, \$7.50 per doz.

Just as curtains are used for decoration for the interior, so do Climbing Vines beautify the exterior. They absorb heat, furnish shade, regulate the temperature and break the monotony of plain stone and brick walls. Especially suited for this purpose is a combination of Boston and English Ivy, the Boston clinging tenaciously to the wall, supporting the Evergreen English, which is beautiful throughout the year. Vines are also useful and ornamental for screening porches, and covering pergolas, such varieties as Clematis, Honeysuckles and Wisteria furnishing an added attraction during the flowering season. Unsightly objects can be economically screened by planting a vine.

- DUTCHMAN'S PIPE (Aristolochia durior)**. Rapid grower; broad leaves, brownish colored flowers. 75c. each, \$7.50 per doz.
- ENGLISH IVY (Hedera helix)**. Broad, glossy evergreen foliage. Used as a ground cover in low, shady places, as well as a border to walks and garden paths. Can be planted for covering walls, but should be used in connection with Boston Ivy for climbing smooth walls. 4 in. pots, 75c. each, \$7.50 per doz.; 2 in. pots, 35c. each, \$3.50 per doz.
- GOLDFLAME HONEYSUCKLE (Lonicera heckrottii)**. Large flame-coral, trumpet-shaped flowers lined with gold; May until frost. May be used as a porch screen. Also useful as a ground cover in shady or sunny locations; new and rare. 75c. each, \$7.50 per doz.
- KUDZU VINE (Pueraria)**. Large, bean-shaped leaves; one of the fastest growers of all vines; useful for covering steep banks, unsightly buildings or for making a quick screen or shade. A vine in good soil will grow 50 ft. or more in length. 75c. each, \$7.50 per doz.
- VIRGINIA CREEPER (Ampelopsis quinquefolia)**. This well known native climber is one of the best and quickest growing varieties. Useful for covering trees, trellises and arbors or brick or stone walls. Its large, deep green foliage assumes brilliant shades of crimson and scarlet in Fall. 75c. each, \$7.50 per doz.
- WISTERIA**. Possibly most spectacular of all flowering vines; vigorous growers, requiring considerable space and support. We offer the following types: **Sinensis**. Old favorite Chinese Wisteria. Long, pendulous clusters of lavender-blue flowers in May. 4 yr., \$1.50 each.
- Sinensis alba**. Fragrant white. May. 4 yr., \$2.00 each.
- Multijuga rosea**. Long-clustered, clear pink. 4 yr., \$2.00 each.
- Sierra Madre**. Vigorous profuse-blooming California variety. Purple. 4 yr. \$2.00 each.

SPRING FLOWERING BULBS

Imported From Holland

**OFFERED IN THE FOLLOWING HIGH-SCORING VARIETIES
SOLD FOR FALL AND EARLY WINTER PLANTING**

Again Holland Bulb Growers are back in production offering the newer and better varieties, along with the popular older ones. We call your special attention to the outstanding new varieties and types which will add color, charm, and interest to the Spring garden. This excellent assortment is made possible by our contracting in advance with Holland growers for our estimated requirements.

TULIPS

Improvements in Tulips have kept pace with Roses, Iris and other classes of plant material. The following selection has been chosen as to rating, size, color and adaptability to garden culture. We know it will please you.

DARWIN TULIPS

The most popular class of Tulips; adapted to both bedding and forcing.

Bleu Aimable. Well rated, blue-heliotrope.

Clara Butt. Not as new as other varieties we offer, but still one of the most popular. Beautiful, soft, rose-pink flushed salmon.

Eclipse. Brilliant deep crimson, blue base. Tall, stiff stems. Large and beautiful.

Golden Age. Large, well shaped flowers of deep yellow.

Pride of Zwanenburg. Salmon-rose of a captivating tint.

Red Master. New, clear carmine-red.

Scotch Lassie. Lavender with a darker shade inside. Huge flowers.

Sunkist. Fine, rich, bright golden yellow.

Zwanenburg. Pure white throughout; large, tall; one of the best whites.

COTTAGE or Mayflowering TULIPS

Beautiful in border plantings and as cut flowers. Stems tall and erect. **Advance.** Considered one of the best of all Tulips. Tall, red, with an appealing orange flush.

Carrara. Well-rated pure white.

Mrs. J. T. Scheepers. Fine large, deep yellow.

Rosabella. Soft pink with light edge.

BREEDER TULIPS

Noted for their enormous-sized bloom and remarkable, rich, color tones.

Indian Chief. Coppery red, flushed purple. Perhaps the most artistic of all Breeder Tulips.

Tantalus. Lilac and buff-yellow. Very sturdy. High rating.

Hyacinths

Daffodils or Narcissus

An old garden flower which has been in cultivation for more than a thousand years, but is extensively used in modern gardens. Much improvement has taken place, making possible a new Daffodil planting even though you may have a garden full of older varieties. We offer the following Daffodils, which are rated among the highest in their respective classes:

YELLOW TRUMPET:

King Alfred. Not as new as some but listed because of its excellent qualities and popularity. Bold trumpet, strong grower.

Magnificence. Early, clear deep yellow. Vigorous grower. New.

WHITE TRUMPET:

Imperator. One of the largest whites. Substantial flower, strong stems.

Mrs. E. H. Krelage. Well-known, creamy white; strong grower.

BARRI:

Afterglow. Perianth sulphur-yellow, cup yellow with broad orange edge.

Lady Diana Manners. Creamy white perianth, orange-red cup.

INCOMPARABILIS:

Carlton. Clear yellow. Enormous cup with frilled edge. Free flowering.

Clamor. White perianth, cup yellow with a broad, deep orange frilled edge.

LEEDSI:

White Nile. Pure white all through. Early, large, free flowering.

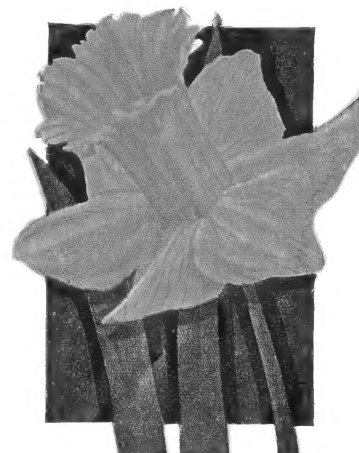

POETAZ HYBRID:

Geranium. Large, pure white perianth; orange-red cup. Late.

POETICUS HYBRID:

Actea. Purest white, scarlet-rimmed eye.

DAY LILY SPECIAL OFFER NO. 46H

Collection consisting of one dozen Mixed Varieties, Various Shades—\$6.00

GLADIOLUS

The garden should not only supply an effective, pleasing landscape, but a succession of suitable cut flowers for the home. It is difficult to imagine a more satisfactory cut flower than the Gladiolus which can be had in various shades and may be planted over a period of 3 months, extending the blooming season from July to late Autumn. There are hundreds of named varieties many of which are no longer being grown. From the better ones we have selected the following which we consider at the top of their class, meeting requirements for the average home garden either to be left in garden or cut for the home.

PRICES—Not less than 3 of a variety

	Doz.	25	50	100
Good Mixture	\$1.25	\$2.00	\$3.50	\$6.50

Choice Peonies

IMPERIAL DOZEN

The varieties of Peonies run into possibly a thousand or more. We attempt to list eighteen of the better, most practical ones, including the **Imperial Dozen**, made up of twelve of the highest scoring Peonies known. These are still considered new, but each has been thoroughly tested and on the market long enough for the price to be reasonable and within the reach of anyone interested in good Peonies.

Culture—Plant in deep, fertile soil, covering the top bud not more than 2 inches.

\$1.50 each, \$16.50 per dozen

- Felix Crousse.** Large ball-shaped rich red. Fine cut flower variety. Midseason.
- Jeannot.** Delicate flesh-pink, softly tinted lavender. One of the very finest. Large, globular, rose type flowers. Late.
- Karl Rosenfield.** Outstanding red of magnificent coloring. Large, semi-rose type. Midseason.
- Lady Alexander Duff.** Lovely creamy white tinted with delicate shade of blush-pink. One of the very best, both for cut flowers and landscape effect. Midseason.
- Martha Bulloch.** Mammoth cup-shaped blossoms of soft rose-pink. Stalks strong and erect. Late.
- Mary Brand.** A red in which there is little trace of purple. Long-lasting cut flowers. Midseason.
- Mme. Jules Dessert.** Delicate flesh-pink shading to creamy white. Rates as one of the highest. Midseason.
- Mons. Jules Elie.** Wonderful glossy lilac-pink shading to deeper rose at the base. Strong grower, free bloomer. Early.
- Sarah Bernhardt.** Exquisite apple-blossom pink, silver tipped. Deserves the high honors it has won. Late.
- Solange.** Very large, full, compact flower of rose type. Has almost indescribable beauty. Waxy white suffused with reddish golden tints. Strong grower. Late.
- Therese.** One of the very highest scoring Peonies. Enormous, rose type flowers of rich, satiny pink. Midseason.
- Walter Faxon.** Bright rose-pink, shaded salmon and deeper rose pink at base. Top-rating, beautifully formed flowers of medium size, semi-rose type. Midseason.

GOLD MEDAL PEONIES

Popular Garden Varieties, 85c. each, \$9.00 per dozen

It is not possible to include in one dozen or even two dozen all the good varieties. So we have selected another group, each Peony for some special feature and merit. Not all varieties in this class are as high-rating as the Imperial Dozen, but the selection is good and will afford you much joy and satisfaction.

- Baroness Schroeder.** Immense, globular type white. Very fragrant. Late.
- Carolina Mother.** Old favorite red; free bloomer. Midseason.
- Edulis Superba.** Tall, free-blooming dark pink. Good grower. Early.
- Festiva Maxima.** Possibly the most extensively grown of all Peonies. Enormous pure white flowers flecked with carmine spot. Early.
- Reine Hortense.** Delicate Hydrangea-pink. Well rated. Midseason.
- Rubra Superba.** Large, compact crimson.
- One each of the Six Gold Medal Peonies, \$4.80**

PEONIES—Unnamed Varieties in Pink, Red, and White, 75c. each, \$7.50 per dozen.

PEONIES—Dozen Mixed Choice Varieties—\$5.00

IRIS

One of the oldest and most extensively used garden flowers being cultivated in almost all countries of the world; in numerous soils and climates. Easily grown, requiring very little attention. Useful as a border plant as well as having many other uses in both old and modern gardens, large and small. There are many named varieties, but we attempt to offer only those found best suited for the area we serve. Fall planting preferred.

Note—Not fewer than 3 of a variety furnished at dozen rate, or 10 of a variety at 100 rate

RARE IRIS

In our **Imperial Dozen**, we offer excellent varieties, carefully selected, and sure to please you. For the benefit of those desiring to add later introductions, we offer the following six, which we consider tops:

- Artic.** New white and gold of gigantic size. The golden color of the throat spreads into the creamy white falls. Crisp, frosty appearance.
- Elsa Sass.** Exquisite new Iris of unusual color—sparkling clear yellow with a greenish cast. Beautifully frilled, very fragrant.
- Golden Majesty.** Rich, deep yellow Iris of top quality. One of the best lates.
- Grand Canyon.** An odd blend of plum, copper and gold. Flowers over a long season.
- Great Lakes.** Strikingly fine, clear sky-blue. Dykes Medal Winner.
- Red Douglas.** An intense red of colossal size. Dykes Medal Winner.

Selection of above Six Rare Iris, \$5.50—\$1.00 each

IMPERIAL DOZEN TALL BEARDED IRIS

50c. each, \$5.00 per dozen

From hundreds of named varieties we have selected one dozen Iris of assorted colors, among the best the world affords. Some sold for very high prices when introduced, but are now being offered at a price within the reach of every Iris lover.

- Angelus.** Lilac-pink blend. Large, beautifully shaped flower.
- Blue Velvet.** Deep, intense blue. Flower seems to be cut out of velvet.
- Buechley's Giant.** Extra large flower of soft lavender-blue.
- Coronet.** A soft rose-beige with golden tone.
- Copper Lustre.** Copper and gold blend. Dykes Medal Winner.
- Depute Nomblot.** Tall bronze. Dykes Medal Winner.

- Frank Adams.** Rosy tan standards, rose-red falls; beautifully blended.
- Los Angeles.** Immense, cool white flowers lightly edged in blue.
- Missouri.** Very fine, deep blue. Dykes Medal Winner.
- Shining Waters.** Uniform, clear sky-blue. Good-sized flowers.
- Stardom.** Salmon shading to apricot-buff. Extremely vigorous.
- Tiffany.** Soft yellow blended with bronze-rose.

GOLD MEDAL IRIS

Not the newest varieties, but popular, thoroughly tested Bearded Iris worthy of a place in any garden.

35c. each, \$3.50 per dozen, \$25.00 per 100

- Ambassadeur.** Standards pearl-pink; falls, deep maroon. Fine.
- Blackamoor.** Very dark blue-purple.
- Cheerio.** Standards tan; falls, velvety red.
- Dolly Madison.** Pinkish mauve, blended with lilac.
- Gold Imperial.** Beautiful, free-blooming, chrome-yellow.
- Indian Chief.** Outstanding, red-toned Iris.
- King Midas.** Golden buff, suffused with garnet and orange.
- Lent A. Williamson.** Favorite violet-purple.
- Midgard.** One of the best yellow and pink blends.
- Pink Satin.** Tall, true pink.
- Pluie d'Or.** Yellow. Dykes Medal winner.
- Pongee.** Soft buff.
- President Pilkington.** Blend of buff, blue and lavender.
- Rameses.** Rose-pink and bluff blend. Dykes Medal winner.
- Rheine Nixe.** Standards white; falls, blue with white edge.
- Sierra Blue.** Immense clear blue. Dykes Medal winner.
- Valor.** Deep blue and violet bicolor.

- Edgewood.** Medium toned pink bicolor of high quality.
- Eleanor Roosevelt.** Rich dark purple fall bloomer.
- Euphony.** Ruffled copper and violet blend.
- Frieda Mohr.** Massive blooms of lilac-pink.
